## JAZMYN KADE

*Port and Terminal Facilities* IMO Publishing

Operational psychology plays a unique role in supporting issues of national security, national defense, and public safety. In this book, authors Mark A. Staal and Sally C. Harvey, both operational psychologists and retired military colonels, lead a team of experts explaining the field, its many roles, and how it is expanding--back cover.

**Procedures for Port State Control 2019** National Academies Press

This comprehensive and engaging text explores contemporary Mexico's political, economic, and social development and examines the most important policy issues facing the country today. Readers will find this widely praised book continues to be the most current and accessible work available on Mexico's politics and policy.

*Tanker Management and Self Assessment* Rowman & Littlefield

The National Strategy for Combating Antibiotic Resistant Bacteria, published in 2014, sets out a plan for government work to mitigate the emergence and spread of resistant bacteria.

Direction on the implementation of this strategy is provided in five-year national action plans, the first covering 2015 to 2020, and the second covering 2020 to 2025. Combating Antimicrobial Resistance and Protecting the Miracle of Modern Medicine evaluates progress made against the national strategy. This report discusses ways to improve detection of resistant infections and estimate the risk to human health from environmental sources of resistance. In addition, the report considers the effect of agricultural practices on human and animal health and animal welfare and ways these practices could be improved, and advises on key drugs and diseases for which animal-specific test breakpoints are needed.

General Analysis; Digital Repository; Preservation Strategies; Current Activities; Conclusion.

*Protecting Controlled Unclassified Information in Nonfederal Systems and Organizations* IMO Publishing

Experts explore the biological, social, and economic complexities of eradicating disease. Disease eradication represents the ultimate in global equity and the definitive outcome of good public health practice. Thirty years ago, the elimination of smallpox defined disease eradication as a monumental global achievement with lasting benefits for society. Today, the global commitment to eradicate polio and guinea worm and heightened

interest in the potential eradication of other infectious diseases, including measles/rubella, lymphatic filariasis, onchocerciasis, and malaria, dominate public health concerns. But what does it take to eradicate a disease? This book takes a fresh look at the evolving concepts of disease eradication, influenced by scientific advances, field experience, societal issues, and economic realities. A diverse group of experts from around the world, representing a range of disciplines, examines the biological, social, political, and economic complexities of eradicating a disease. The book details lessons learned from the initiatives against polio, measles/rubella, and onchocerciasis. Further chapters examine ethical issues, the investment case, governance models, organizational and institutional arrangements, political and social factors, feasibility of eradication goals, priority setting, and the integration of disease eradication programs with existing health systems. Contributors Stephen L. Cochi, Walter R. Dowdle, Claudia I. Emerson, Kimberly M. Thompson, Radboud J. Duintjer Tebbens, Regina Rabinovich, Lesong Conteh, B. Fenton Hall, Peter A. Singer, Maya Vijayaraghavan, Damian G. Walker, Kari Stoeber, Julie Jacobson, Andy Wright, Chris Maher, Bruce Aylward, Ali Jaffer Mohamed, T. Jacob John, Robert S. Scott, Robert Hall, Jeffrey Bates, Sherine Guirguis, Thomas Moran, Peter Strebel, Eric A. Ottesen, Ciro de Quadros, Linda Muller, Jai Prakash Narain, Ole Wichmann, Alan R. Hinman, Stewart Tyson, Robin Biellik, Piya Hanvoravongchai, Sandra Mounier-Jack, Valeria Oliveira Cruz, Dina Balabanova, Yayehiyar Kitaw, Tracey Koehlmoos, Sebastião Loureiro, Mitike Molla, Ha Trong Nguyen, Pierre Ongolo-Zogo, Umeda Sadykova, Harbandhu Sarma, Maria Gloria Teixeira M, Jasim Uddin, Aliya Dabbagh, Ulla Kou Griffiths, Muhammad Ali Pate, John O. *Ship to Ship Transfer Guide for Petroleum, Chemicals and Liquefied Gases* Anchor Books

Publicly funded archive services have a vital role within the communities they serve to contribute to local democracy, strong and cohesive communities, social policy, education, research, history and culture. This document sets out the strategic vision for the sustainable development of a vigorous, publicly funded archive sector across England and Wales. It replaces the "Government policy on archives" that was issued by the Lord Chancellor in 1999 (Cm. 4516, ISBN 9780101451628) and focuses on actions for publicly funded archives while acknowledging that private archives remain vital to the archival health of the nation. Section 1 outlines how the landscape in which archive services operate has changed: large organisations now keep most, if not all, of their information in electronic form. Section 2 provides a vision of the true potential of publicly funded archives. Section 3 outlines the challenges facing archive services in the delivery of

their core task of preserving authentic information and helping people to access and understand the past. Section 4 sets out five key recommendations: develop bigger and better services in partnership; strengthened leadership and a responsive, skilled workforce; co-ordinated response to the growing challenge of managing digital information; comprehensive online access for archive discovery through catalogues and to digitised archive content by citizens at a time and place that suits them; active participation in cultural and learning partnerships promoting a sense of identity and place within the community. Section 5 highlights the need for concerted action by all parties connected with the archive sector to ensure a sustainable future.

**STS SERVICE PROVIDER MANAGEMENT AND SELF ASSESSMENT, SECOND EDITION 2020** Springer

The conceptualization and formulation of skin care products intended for topical use is a multifaceted and evolving area of science. Formulators must account for myriad skin types, emerging opportunities for product development as well as a very temperamental retail market. Originally published as "Apply Topically" in 2013 (now out of print), this reissued detailed and comprehensive handbook offers a practical approach to the formulation chemist's day-to-day endeavors by: Addressing the innumerable challenges facing the chemist both in design and at the bench, such as formulating with/for specific properties; formulation, processing and production techniques; sensory and elegance; stability and preservation; color cosmetics; sunscreens; Offering valuable guidance to troubleshooting issues regarding ingredient selection and interaction, regulatory concerns that must be addressed early in development, and the extrapolation of preservative systems, fragrances, stability and texture aids; Exploring the advantages and limitations of raw materials; Addressing scale-up and pilot production process and concerns; Testing and Measurements Methods. The 22 chapters written by industry experts such as Roger L. McMullen, Paul Thau, Hemi Nae, Ada Polla, Howard Epstein, Joseph Albanese, Mark Chandler, Steve Herman, Gary Kelm, Patricia Aikens, and Sam Shefer, along with many others, give the reader and user the ultimate handbook on topical product development.

*Disease Eradication in the 21st Century* Stationery Office

This is a guide to recommended practices for crime scene investigation. The guide is presented in five major sections, with sub-sections as noted: (1) Arriving at the Scene: Initial Response/Prioritization of Efforts (receipt of information, safety procedures, emergency care, secure and control persons at the scene, boundaries, turn over control of the scene and brief investigator/s in charge, document actions and observations); (2) Preliminary Documentation and Evaluation of the Scene (scene assessment, "walk-through" and initial documentation); (3)

Processing the Scene (team composition, contamination control, documentation and prioritize, collect, preserve, inventory, package, transport, and submit evidence); (4) Completing and Recording the Crime Scene Investigation (establish debriefing team, perform final survey, document the scene); and (5) Crime Scene Equipment (initial responding officers, investigator/evidence technician, evidence collection kits).

*Transitional Justice and Education* John Wiley & Sons

Improving how our government works is urgent business for America. In this book experts from the RAND corporation provide practical ways for government to reorganize and restructure, enhance leadership, and create flexible, performance-driven agencies.

**Guidelines for the Control and Management of Ships' Ballast Water to Minimize the Transfer of Harmful Aquatic Organisms and Pathogens** Walter de Gruyter

New York Times bestselling author Michael Crichton delivers another action-packed techno-thriller in *State of Fear*. When a group of eco-terrorists engage in a global conspiracy to generate weather-related natural disasters, it's up to environmental lawyer Peter Evans and his team to uncover the subterfuge. From Tokyo to Los Angeles, from Antarctica to the Solomon Islands, Michael Crichton mixes cutting edge science and action-packed adventure, leading readers on an edge-of-your-seat ride while offering up a thought-provoking commentary on the issue of global warming. A deftly-crafted novel, in true Crichton style, *State of Fear* is an exciting, stunning tale that not only entertains and educates, but will make you think.

*Offshore Vessel Management and Self Assessment (OVMSA)* IMO Publishing

The *Chemical Scythe* is the first book in a projected series to be published by Plenum Press in association with the International Disaster Institute. The aim of the series, *Disaster Research in Practice*, is to provide scientific and readable accounts on the most urgent areas of disaster research. It is fitting, therefore, that Dr. Hay's investigation into the nature and effects of dioxins heralds the new series. The problem of chemical hazards is one that we will have to learn to live with in future decades. Dr. Hay's book is an authoritative account of the chemistry and proven and potential effects of dioxins, and of the implications for safety planning. He concludes with a cautious, yet optimistic note—that indeed we can learn to live with such hazards, providing that we are prepared to understand and plan for the unexpected. The accident at Seveso in 1976 alerted the world to an imperfectly understood but immensely alarming environmental hazard. Public debate and argument as to the implications of dioxins and, indeed, the use of herbicides as aggressive weapons in Vietnam, rage on. And yet it is only through the painstaking research exemplified in this book that it will eventually be possible to

promote the vital accountability on the part of industrialists and governments.

**Tanker Operations** Anchor Books

Now updated with the latest developments in this field, this guide for parents of easily frustrated, chronically inflexible children lays out a practical approach to helping children at home and school, and shows parents how to handle their child's difficulties competently and with compassion.

*Handbook of Formulating Dermal Applications* Springer Nature

After periods of conflict and authoritarianism, educational institutions often need to be reformed or rebuilt. But in settings where education has been used to support repressive policies and human rights violations, or where conflict and abuses have resulted in lost educational opportunities, legacies of injustice may pose significant challenges to effective reform. Peacebuilding and development perspectives, which normally drive the reconstruction agenda, pay little attention to the violent past. *Transitional Justice and Education: Learning Peace* presents the findings of a research project of the International Center for Transitional Justice and education in peacebuilding contexts. The book examines how transitional justice can shape the reform of education systems by ensuring programs are sensitive to the legacies of the past, how it can facilitate the reintegration of children and youth into society, and how education can engage younger generations in the work of transitional justice.

*Hazardous Cargo Bulletin* World Bank Publications

Explicates political economy factors that have brought about greater transparency and participation in budget settings across Asia, Africa, and Latin America. This title presents the strategies, policies, and institutions through which improvements can occur and produce change in policy and institutional outcomes.

**Archives for the 21st Century** Springer Science & Business Media

This publication, prepared by the OPRC-HNS Technical Group and approved by IMO's Marine Environmental Protection Committee, provides guidance on the establishment of an incident management system (IMS) for marine pollution incidents. An established IMS provides for the safe, effective and efficient management and deployment of resources for all types of emergency incidents. It is essential for effective pollution incident management, providing a clear command structure and well-defined roles and responsibilities within an optimal span-of-control. The IMS is intended to be staffed and operated by qualified personnel from any agency and is scalable so that it can adapt organizationally based on the needs of the incident. This Guidance document would ideally be used during the contingency planning process in conjunction with the IMO Manual on Oil Pollution, Section II - Contingency Planning and Section IV -

Combating Oil Spills.

*Inert Gas Systems* Elsevier

This book covers diesel engine theory, technology, operation and maintenance for candidates for the Department of Transport's Certificates of Competency in Marine Engineering, Class One and Class Two. The book has been updated throughout to include new engine types and operating systems that are currently in active development or recently introduced.

*Open Budgets* OECD Publishing

The Condition Assessment Scheme (CAS) for oil tankers was adopted in 2001 and is applicable to all single-hull tankers of 15 years or older. Although the CAS does not specify structural standards in excess of the provisions of other IMO conventions, codes and recommendations, its requirements stipulate more stringent and transparent verification of the reported structural condition of the ship and that documentary and survey procedures have been properly carried out and completed. The Scheme requires that compliance with the CAS is assessed during the Enhanced Survey Program of Inspections concurrent with intermediate or renewal surveys currently required by resolution A.744(18), as amended.--Publisher's description.

**Operational Psychology** Schiffer + ORM

This open access book summarises the latest developments on data management in the EU H2020 ENVRIplus project, which brought together more than 20 environmental and Earth science research infrastructures into a single community. It provides readers with a systematic overview of the common challenges faced by research infrastructures and how a 'reference model guided' engineering approach can be used to achieve greater interoperability among such infrastructures in the environmental and earth sciences. The 20 contributions in this book are structured in 5 parts on the design, development, deployment, operation and use of research infrastructures. Part one provides an overview of the state of the art of research infrastructure and relevant e-Infrastructure technologies, part two discusses the reference model guided engineering approach, the third part presents the software and tools developed for common data management challenges, the fourth part demonstrates the software via several use cases, and the last part discusses the sustainability and future directions.

*Ship Simulator and Bridge Teamwork* World Bank Publications

Examines the relationship between globalization and environmental, safety, and labor standards in the context of the shipping industry and explores the extent to which international competition affects regulatory standards.

*Dirty Politics* Dirty Times Praeger

This publication contains the text of guidelines for inert gas systems and relevant IMO documents on inert gas systems and supersedes the publication 860 83.15.E.
