Real-life scenarios let you practice coding with cases taken from actual documentation. An outline format includes plenty of practice questions, making it easy to review and prepare for E/M certification exams. Written by coding author and educator Carol J. Buck, this edition covers both ICD-9 and ICD-10 code sets, and helps you gain the accuracy and proficiency you need for success in auditing records and in E/M

Part two, the largest section, covers the many aspects of overall quality management and its implementation - staff and patient management, cryobank and PGD/PGS management, and data management - as well as optimization of treatment outcomes and statistical process control analysis to assess quality variation. Part three addresses the relationship between IVF units and society at large, including the ethics of IVF treatment, as well as public/low-cost and private/corporate IVF units. Advertising and marketing for IVF units is discussed in part four, including the building and managing of websites and the use of traditional print and social media.
