ROBINSON MCDANIEL

Boekblad CRC Press

The tenth century dawned in violence and disorder. Charlemagne's empire was in ruins, most of Spain had been claimed by Moorish invaders, and even the papacy in Rome was embroiled in petty, provincial conflicts. To many historians, it was a prime example of the ignorance and uncertainty of the Dark Ages. Yet according to historian Paul Collins, the story of the tenth century is the story of our culture's birth, of the emergence of our civilization into the light of day. The Birth of the West tells the story of a transformation from chaos to order, exploring the

alien landscape of Europe in transition. It is a fascinating narrative that thoroughly renovates older conceptions of feudalism and what medieval life was actually like. The result is a wholly new vision of how civilization sprang from the unlikeliest of origins, and proof that our tenth-century ancestors are not as remote as we might think.

The Big Zero Hachette UK

Do you want to achieve startup speed at enterprise scale? Growth. It's what every company strives for. But it's become more and more elusive as companies struggle to hit their projected growth rates in an increasingly competitive market. While zero-based budgeting (ZBB) has been wielded for decades to cut costs, it falls short when it comes to spurring growth. But a zero-based mindset (ZBx) does that and more. ZBx facilitates

forensic oversight into resource allocation that funnels savings back into growth initiatives and encourages new sources of innovation. The Big Zero shows how a ZBx approach focuses on agility over austerity, visibility over guesswork and the future over the past to fuel growth and competitiveness.

The Birth of the West BRILL

In this original and lucid guide to the proper reading of Gibbon, Ranke, Macaulay, and Burckhardt--great historians who were also great stylists--Peter Gay demonstrates that style is an invaluable clue to the historian's insight.

The Trap New World Library

Published originally in the Netherlands as *De Fûke*, in 1966, *The Trap*, a short war novel based on a real incident, tells the story of a Netherlands fisherman whose cottage on the lake becomes a refuge for those who need a hiding place. One day his only son is caught by the Germans, and the fisherman must make a choice between cooperation and resistance.

Employers look for two things when hiring or promoting people: knowledge and skill. They rarely, if ever, consider character. Yet character is the key to extraordinary business success. *The Good Ones* presents ten crucial qualities of high-character employees, qualities that enhance employee satisfaction, client relationships, and the bottom line. You'll read stories from managers and employees across the U.S. and beyond who reveal how honesty, courage, loyalty, and patience have helped their organizations maintain an edge over the competition. Each chapter is devoted to a single quality of character and ends with questions employers can use to hire and promote the Good Ones — people who are consistently honest, accountable, fair, and grateful. Whether you're looking to bring new people into your organization or seeking a job or promotion yourself, *The Good Ones* will help you appreciate in practical terms why character is the missing link to excellence.

Drawing the Curtain Penguin UK

This book explains the dynamics behind the economic transformation from the colonial era to the post-independence period in Indonesia and Vietnam. It analyses the different Vietnamese and Indonesian government approaches to the economic legacies of colonialism remaining in these countries after independence. It also demonstrates that despite critical differences between the two nation-states, the Vietnamese and Indonesian leaderships were pursuing similar long-term goals: to

create a truly independent national economy. The book discusses the way in which the Indonesian government established complete economic control, resembling the socialist transformation of North Vietnam in the 1950s, and the various means by which the government of South Vietnam concentrated economic power in its own hands during the late 1950s and early 1960s. It also explores how the Indonesian government was determined to remove the economic legacy of Dutch colonialism by placing the entire economy under strong state control and ownership in accordance with the spirit of Guided Democracy and Guided Economy in the late 1950s and the early 1960s. This book is a point of reference for students, researchers and academics interested in a comparative analysis of the economic systems implemented by the colonial and fascist powers in Indonesia and Vietnam.

Remembering the Second World War W. W. Norton & Company
As elected coroners came to be replaced by medical examiners with scientific training, the American public became fascinated with their work. From the grisly investigations showcased on highly rated television shows like *C.S.I.* to the bestselling mysteries that revolve around forensic science, medical examiners have never been so visible—or compelling. They, and they alone, solve the riddle of suspicious death and the existential questions that come with it. Why did someone die? Could it have been prevented? Should someone be held accountable? What are the implications of ruling a death a suicide, a homicide, or an accident? Can medical examiners unmask the perfect crime? *Postmortem* goes deep inside the world of medical examiners to uncover the intricate web of

pathological, social, legal, and moral issues in which they operate. Stefan Timmermans spent years in a medical examiner's office, following cases, interviewing examiners, and watching autopsies. While he relates fascinating cases here, he is also more broadly interested in the cultural authority and responsibilities that come with being a medical examiner. Although these professionals attempt to remain objective, medical examiners are nonetheless responsible for evaluating subtle human intentions. Consequently, they may end—or start—criminal investigations, issue public health alerts, and even cause financial gain or harm to survivors. How medical examiners speak to the living on behalf of the dead, is Timmermans's subject, revealed here in the day-to-day lives of the examiners themselves.

History Princeton University Press

The history of the smaller European countries is rather neglected in the teaching of European history at university level. We are therefore pleased to announce the publication of the first comprehensive history of the Low Countries - in English - from Roman Times to the present. Remaining politically and culturally fragmented, with its inhabitants speaking Dutch, French, Frisian, and German, the Low Countries offer a fascinating picture of European history en miniature. For historical reasons, parts of northern France and western Germany also have to be included in the "Low Countries," a term that must remain both broad and fluid, a convenient label for a region which has seldom, if ever, composed a unified whole. In earlier ages it was even more difficult to the region set parameters, again reflecting Europe as a whole, when tribes and kingdoms stretched across expanses not limited

to the present states of Belgium, Luxembourg, and the Netherlands. Nevertheless, its parts did demonstrate many common traits and similar developments that differentiated them from surrounding countries and lent them a distinct character. Internationally, the region often served both as a mediator for and a buffer to the surrounding great powers, France, Britain, and Germany; an important role still played today as Belgium and the Netherlands have increasingly become involved in the broader process of European integration, in which they often share the same interest and follow parallel policies. This highly illustrated volume serves as an ideal introduction to the rich history of the Low Countries for students and the generally interested reader alike.

Beyond the Canon Рипол Классик

This book describes a process framework for business information management: the Business Information Services Library (BiSL®) – a public domain standard that is consistent with the IT Infrastructure Library (ITIL) and Application Services Library (ASL). BiSL establishes a bridge between IT and business processes, and between business information administrators and information managers. The BiSL process model provides an insight into all of the primary processes within their field of operations and into the relationship between the various processes. It offers a starting point for the improvement of these processes using best practices, amongst other things, and it provides uniform terminology. This book explains BiSL, a process framework for business information management, encompassing the best way to manage and execute business information management in day-to-day practice, and explains how the

framework BiSL can help to improve business processes and the alignment of business and IT. Additional Training material is available for free for APMG accredited trainers. History of the Low Countries Stichting Winkel de Nieuwe Kerk Comparing various European and American historiographies from the past two hundred years, Gendering Historiography provides insights into the establishment and cultivation of gendered power relations in different societies and outlines the devastating effects that exclusionary practices can have on each national canon. This detailed and revealing book will change the face of history writing, bringing overlooked and previously excluded histories back into modern historiography.

A Latin Grammar For Schools And Colleges Hachette UK This book gives an excellent overview of Flemish art from the Hermitage in St Petersburg. A large proportion was acquired in the eighteenth century by Catherine the Great, from superb collections such as those of Crozat and Brühl, which she bought up in their entirety. Many of these paintings originally hung in churches and monasteries in Antwerp and other European cities. Most attention focuses on the 'big three': Peter Paul Rubens, Anthony van Dyck and Jacob Jordaens. Rubens was the most important, the most talented, and the most influential seventeenth-century Flemish painter. He was also a phenomenon in his day, a true homo universalis. The portraits produced by Van

Dyck for the court of King Charles I of England also share the limelight, along with impressive history paintings by Jordaens, exuding the vibrant atmosphere in which he excelled. Exhibition: De Nieuwe Kerk - Hermitage, Amsterdam, 17.9.2011 to 16.3.2012.

Memories of the East Berghahn Books

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The

Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world. *Essential Cell Biology* Pushkin Press

This introductory guide to financial management and accounting familiarizes students with the basics in these crucial areas. No prior knowledge of business economics is assumed. This book is user-friendly, accessible, yet comprehensive in its approach. It takes an in-depth, integrated look at the principles of management accounting, financial accounting and finance. Examples and case studies from newspapers and professional journals encourage the practical application of the material. Study questions reinforce and test the student's understanding of the key concepts. A glossary of key terms is included at the end of each chapter. The book also contains multiple choice questions and other assignments designed to stimulate thinking about the topics that are discussed. The Basics of Financial Management is an ideal introductory textbook for students at both undergraduate and graduate levels in a wide range of degree and professional programmes, such as Economics, MBA, Business Studies, Finance and Management Studies.

The Rise and Fall of Human Rights provides a groundbreaking ethnographic investigation of the Palestinian human rights world—its NGOs, activists, and "victims," as well as their politics, training, and discourse—since 1979. Though human rights activity began as a means of struggle against the Israeli occupation, in failing to end the Israeli occupation, protect basic human rights, or establish an accountable Palestinian government, the human rights industry has become the object of cynicism for many Palestinians. But far from indicating apathy, such cynicism generates a productive critique of domestic politics and Western interventionism. This book illuminates the successes and failures of Palestinians' varied engagements with human rights in their quest for independence.
