Set during the final 24 hours before the armistice at 11 a.m. on 11th November 1918, the story follows a German storm trooper, an American airman and a British Tommy. Their destinies converge during the death throes of the first ever conflict to spread across the globe. War becomes incredibly personal as nationality and geography cease to matter to each of these teenagers on the Western Front, and friendship becomes the defining aspect of their encounter. But who will live and who will die before the end of the day?

The State of European Integration provides scholars, practitioners, experts and students with a comprehensive account of the state of the European Union today. With contributions from leading scholars including Richard G. Whitman, Meltem Müftüleri-Baç, Gülnur Aybet, Leila Simona Talani and Gareth Dale, the book examines the EU in a theoretically informed and empirically grounded manner. Opening with an exploration into the nature of the European Union as an international actor, it then assesses the impact of enlargement on institutions, policies and identity. The contributors investigate issues related to the degree of convergence and cohesion among members, and analyze the economic and monetary state of integration. The volume comes at a timely interval when

there is a need to understand the present and future of the European Union.

Microbial Toxins: A Comprehensive Treatise, Volume VIII, Fungal Toxins is devoted to topics related to algal and fungal toxins and includes critically reviewed articles from different experts in related fields. The text is divided into three sections. Section A covers coumarins — its isolation, identification, biological action, natural occurrence, and uses. Section B deals with the epizootiology, clinical characteristics, and pathological findings of Stachybotryotoxicosis. Section C talks about phytopathogenic and helminthosporium toxins, toxic peptides found in *Amanita* species as well as other mushroom toxins, compounds accumulating in plants after an infection, and ergot. The book is recommended for microbiologists and toxicologists, especially those who would like to know more about the toxins produced by algae and fungi and their effects.

La Ragazza Carla / a Girl Named Carla

University of Pennsylvania Press

Il celebre frustino Giles Langford è stupito nell'apprendere che il suo fabbro è una ragazza, sconvolto nel rendersi conto che si tratta dell'inaccessibile sorella di un duca, e inorridito nello scoprire di essere comunque innamorato di questa donna indomabile. Privo di ricchezze e di titoli, Giles non ha altro da offrire che il suo cuore... Felicity Sutton ha conosciuto da vicino la povertà e non intende sperimentarla di nuovo. Sente la mancanza della vecchia fucina, ma non di certo quella della disperazione incessante di chi non possiede una casa e ha la pancia vuota. Ed è logico che sia disposta ad accettare la stabilità offerta da un ricco corteggiatore del ton. Per quanto riguarda lo spiantato scavezzacollo che ama, beh... Potranno condividere una notte da ricordare. Ecco a voi gli indimenticabili frequentatori della più famosa taverna di Londra, Il Duca Malandrino. Belli e seducenti, con fascino e arguzia da vendere, una notte con questi libertini e farabutti non basterà mai...

Cheetahs of the Serengeti Plains

University of Chicago Press

Klappentext: In the days when cheetahs roamed from the steppes of Soviet Russia to the southern African Cape, there was an abundance of food, and the great running cats were masters of a domain that spanned the globe. Today that habitat is but a shadow of its former range. The cheetah's retreat has been dramatic. Its old habitat has been increasingly usurped by mankind for urban and agricultural development. More and more driven away from the

open grassland of its former range towards the edges of woodland and forest, the cheetah must adapt. That we are witnessing just such an environmental adaptation evolving in the King Cheetah, is the eloquently argued conclusion reached in this account by Lena Godsall Bottriell of one of the most thoroughly researched and adventurous expeditions to come out of Africa in recent times. In 1978, following 18 months preliminary planning, Lena and her husband Paul Bottriell launched an expedition to southern Africa with the aim of increasing the current field knowledge of the legendary King Cheetah. Fourteen months fieldwork, from Botswana, through war-torn Rhodesia, to a final, unique balloon search in Kruger National Park marked the beginning of a further eight years comprehensive research which while documenting nearly forty specimens, and firmly establishing the existence of King Cheetah in the wild, convincingly argues the case for the legendary striped cheetah of southern Africa, being a new geographic race of cheetah in the process of evolving. King Cheetah, an eminently readable account illustrated with breathtaking photographs, offers a major contribution to natural history.

Hellmann argues that "new journalism" is a new genre of fiction, one that deals with fact through fable, discovering, constructing and self-consciously exploring meaning beyond our media-constructed reality. He applies his theory to books by Wolfe, Thompson, Mailer and Herr.

'Liquid life' is the kind of life commonly lived in our contemporary, liquid-modern society. Liquid life cannot stay on course, as liquid-modern society cannot keep its shape for long. Liquid life is a precarious life, lived under conditions of constant uncertainty. The most acute and stubborn worries that haunt this liquid life are the fears of being caught napping, of failing to catch up with fast moving events, of overlooking the 'use by' dates and being saddled with worthless possessions, of missing the moment calling for a change of tack and being left behind. Liquid life is also shot through by a contradiction: it ought to be a (possibly unending) series of new beginnings, yet precisely for that reason it is full of worries about swift and painless endings, without which new beginnings would be unthinkable. Among the arts of liquid-modern living and the skills needed to practice them, getting rid of things takes precedence over their acquisition. This and other challenges of life in a liquid-modern society are traced and unravelled in the successive chapters of this new book by one of the most brilliant and original social thinkers of our time.

A “haunting meditation on trust, hope and love” by a woman who adopts and trains a Golden Retriever puppy to become a search-and-rescue dog (People). In the wake of the Oklahoma City bombing, Susannah Charleson’s attention was caught by a newspaper photograph of a canine handler, his exhausted face buried in the fur of his search-and-rescue dog. Susannah, a dog lover and pilot with search experience herself, was so moved by the image that she decided to volunteer with a local canine team, plunging herself into an astonishing new world. While the team worked long hours for nonexistent pay and often heart-wrenching results, Charleson discovered the joy of working in partnership with a canine friend and the satisfaction of using their combined skills to help her fellow human beings. Once she qualified to train a dog of her own, Charleson adopted Puzzle—a smart, spirited Golden Retriever puppy who exhibited unique aptitudes as a working dog, but was a bit less interested in the role of compliant house pet. *Scent of the Missing* is the story of Charleson’s adventures with Puzzle as they search for a lost teen; an Alzheimer’s patient wandering in the cold; and signs of the crew amid the debris of the space shuttle Columbia disaster—all while unraveling the mystery of the bond between humans and dogs. “A riveting view of both the human animal bond and the training of search and rescue dogs. All dog lovers and people interested in training service dogs should read this book.” —Temple Grandin, author of *Animals Make Us Human*

Welcome to the world of Gormenghast, the classic fantasy series from the imagination of Mervyn Peake As the first novel opens, Titus, heir to Lord Sepulchrove, has just been born: he stands to inherit the miles of rambling stone and mortar that stand for Gormenghast Castle. Inside, all events are predetermined by a complex ritual, lost in history, understood only by Sourdust, Lord of the Library. There are tears and strange laughter; fierce births and deaths beneath umbrageous ceilings; dreams and violence and disenchantment contained within a labyrinth of stone. Iceland's 1100 Years recounts the history of a society on the margin of Europe as well as on the margin of reaching the size and wealth of a proper state. Iceland is unique among the European societies in being founded as

late as the Viking Age, and in surviving for centuries without any central power after Christianity had introduced the art of writing. This was the age of the Sagas, which are not only literature but also a rare treasury of sources about a stateless society. In sharp contrast to the prosperous society portrayed by the Sagas, early modern Iceland appears to have been extremely poor and miserable. It is challenging to question whether the deterioration was due to foreign rule, to a colder climate, or to an unfortunate internal power structure. Or

was the Golden Age perhaps the invention of 19th-century nationalists? Iceland adopted nationalism quickly and thoroughly. In the mid-nineteenth century about 60,000 inhabitants, mostly poor peasants, set out to gain independence from Denmark, which was finally achieved in 1944 with the foundation of a republic. In recent decades Iceland has caught up economically with its closest neighbours. This has come about mainly through the mechanisation of fishing, which gave rise to a second battle for sovereignty, this time over the country's fishing grounds.
