The definitive text—completely revised—on the professional and legal standards of school psychology Fully revised and now in its sixth edition, the single best source of authoritative information on the ethical and legal issues associated with school psychological practice includes the most up-to-date standards and requirements of the profession. Citing recent legal rulings and publications as well as historical references, *Ethics and Law for School Psychologists* provides the most comprehensive foundation for scholarship in this area. A key reference for understanding and delivering ethically and legally sound services, the text combines the expertise of three leading professionals at the forefront of the field. Completely updated to reflect the National Association of School Psychologists' (NASP) revised 2010 Principles for Professional Ethics, the new edition of this classic text also addresses the final regulations in implementing the Individuals with Disabilities Education Act (IDEA) and the amended Americans with Disabilities Act (ADA). In addition, the Sixth Edition features: New material on the management of sensitive, private student information and a revised section on privileged communication

Broader coverage of ethical-legal issues in school-based intervention, including a new section on interventions in the general education classroom. The latest research and professional literature related to ethics and law in school psychology. Covering the ethical and legal issues that impact every school psychologist, and with numerous pedagogical features including case vignettes, end-of-chapter questions, and topics for discussion, *Ethics and Law for School Psychologists, Sixth Edition* is well suited for graduate students in school psychology and is a must-have resource for all practicing school psychologists, educators, and school administrators.

This manual, published by the Illinois Association of School Boards, was designed to be used as a teaching tool and reference source for overseeing effective school maintenance. Section 1 describes the basics of good school maintenance, including managing the program, using computers, controlling energy costs, ensuring safe practices, designing buildings for efficient maintenance, and being informed about environmental issues. Section 2 details guidelines for operating cleaning and general building services, such as custodial operations, area cleaning programs, and equipment and supplies. A custodian's glossary is included. The third section provides guidelines for building maintenance, specifically, caring for the exterior and roof. Procedures for maintaining school grounds are detailed in the fourth section. The fifth section describes the maintenance of mechanical equipment, including heating and air conditioning systems, sanitary systems and fixtures, sewage treatment plants, and electrical systems. A management tools appendix contains a list of environmental resources; sections on cleaning and general building services, grounds

maintenance, and mechanical equipment; and annual inspection checklists. (LMI)

Symposium on Electronics Maintenance
How2Become Ltd

Abstract: The re-emergence of testing in the American school system and ways in which the education and measurement fields are attempting to enhance the potential value and importance of tests are examined in this sourcebook. A national profile of the use of testing in schools describes the wide variety of tests used, the purposes for which principals and teachers use test results, and their opinions on how successful test data are in meeting their goals.

Guidelines are provided to help teachers and parents better prepare students for standardized testing. The issue of equity in the testing of minority children and ways in which testing can be used to help all children learn are explored.

Additional topics include 1) the strengths, limitations, and inner workings of teacher-made tests, 2) understanding, evaluating, and using latent trait research analysis and item response theory, and 3) current and future applications of microcomputer technology in school testing. Five case studies in specific school systems illustrate how some of the theoretical issues in testing have been applied in state and local practices. Case studies

describe 1) improvement of test results dissemination and use through cooperative planning, integrated database development, and public media, 2) ways in which a testing program can support a district-wide instructional improvement process and formation of a building test coordinators' network, and 3) testing as an effective part of a statewide accountability and instructional improvement program.
