A timely look at the healthcare valuation process in an era of dynamic healthcare reform, including theory, methodology, and professional standards In light of the dynamic nature of the healthcare industry sector, the analysis supporting business valuation engagements for healthcare enterprises, assets, and services must address the expected economic conditions and events resulting from the four pillars of the

healthcare industry: Reimbursement, Regulation, Competition, and Technology. Healthcare Valuation presents specific attributes of each of these enterprises, assets, and services and how research needs and valuation processes differentiate depending on the subject of the appraisal, the environment the property interest exists, and the nature of the practices. Includes theory, methodology, and professional standards as well as requisite research, analytical, and reporting functions in delivering healthcare valuation services Provides useful process tools such as worksheets and checklists, relevant case studies, plus a website that will include comprehensive glossaries and topical bibliographies Read Healthcare Valuation for a comprehensive treatise

of valuation issues in the healthcare field including trends of compensation and reimbursement, technology and intellectual property, and newly emerging healthcare entities.

This newly updated guide for matrimonial lawyers and accountants is the companion publication for Feder's Valuation Strategies in Divorce. In individual chapters, detailed information is provided on how to evaluate specific types of marital assets; the particular accounting and financial conventions

that affect the owner's income from the asset and the value of the asset; and the rules, regulations and issues peculiar to the particular asset. The reader is also provided with checklists of documents needed to appraise the asset, sources of industry information, lists of trade associations and journals, a bibliography, and a case study and report. Part I on closely-held corporations contains chapters devoted to automobile dealerships, media companies, high-tech companies, property and casualty insurance companies, construction companies, and small businesses such as bars, restaurants and gas stations. Part II covers the evaluation of various professional practices, and Part III discusses the valuation of different types of real estate assets. Federal civil service

pensions, military pensions and the pensions provided by Fortune 500 corporations are examined in Part IV. The methodologies for evaluating personal property, such as gems, jewelry, and oriental rugs are found in Part V. Besides aiding attorneys and accountants, this publication will be of great assistance to appraisers, actuaries, and pension experts.

Practical Guide to Cost Segregation John Wiley & Sons

The study of investment under

uncertainty was stagnant for several decades until developments in real options revitalized the field. The topics covered in this book include the reasons behind the under-investment programme.

One of the major trends in health care is the consolidation of physician practices. To compete effectively for patients and control costs, physicians are either combining into larger groups or deciding to sell their practices to hospitals. The Valuation of Physician Practices and Clinics provides buyers with a basic how to approach to the valuation of physician practices and outlines how sellers can get the most for their money.

Praise for Financial Valuation "This Second Edition addresses virtually all of the recent hot topics in business valuation, and there are many of them since the first edition. Most chapters are updated with new material, including, especially, the Duff & Phelps Risk Premium Report as an alternative to Ibbotson's risk premium data. As with the first edition, the authors are very well-known and provide incisive analysis." --Shannon Pratt, CFA, FASA, MCBA, CM&AA, CEO, Shannon Pratt Valuations, LLC "Though the first edition of Mr. Hitchner's book was excellent in all regards, this Second Edition squarely puts Hitchner and his team of authors at the top of the list of authorities in the field of business valuation. Few publications on the subject even come

close to the book's thorough coverage of the topic, but equally impressive is the clarity with which Hitchner depicts and explains highly complex subject matters. So impressed with Financial Valuation Applications and Models, the National Association of Certified Valuation Analysts has developed a three-day course based upon this book entitled, 'Advanced Valuation and Case Study Workshop,' which is now a cornerstone training program for our organization." --Parnell Black, MBA, CPA, CVA, Chief Executive Officer, NACVA "This book is a valuable resource for every BV library. It has material not covered in other BV books and this Second Edition has much more information than the first. Financial Valuation Applications and Models is the primary textbook for AICPA's business

valuation education and it covers most of the topics on the test for the AICPA's Accredited in Business Valuation (ABV) credential. Its thirty authors are nationally respected practitioners who have written this book for practitioners. Many of the authors are current or former members of the AICPA Business Valuation Committee and the AICPA BV Hall of Fame." --Michael A. Crain, CPA/ABV, ASA, CFA, CFE, Chair, AICPA Business Valuation Committee, Managing Director, The Financial Valuation Group "This book has a tremendous wealth of information that all valuation analysts must have in their libraries. From those just starting their careers to the most experienced practitioner, all valuation analysts will benefit from the invaluable information,

ranging from fundamental practices to the most innovative economic and valuation ideas of today." --Scott R. Saltzman, CPA, CVA, ASA, DABFA, Managing Member, Saltzman LLC; President, National Association of Certified Valuation Analysts Coauthors: Mel H. Abraham, R.
