**The Uninhabitable Earth** Harvard  
University Press

This is the story of tropical agricultural science and agricultural development in the 20th century, focusing on the African farmer and African farming methods. It describes successes as well as fads and failures, many based on the author's first-hand observations during more than 40

years in tropical agronomy-related fields. Moving into the 21st century, the book explores the rise of computer modeling of crops and crop production.

Quarterly Essay 83 Top Blokes Springer  
Arguing that the climate crisis confronting the world today is rooted mainly in the wealthy economies' abuse of fossil fuels, indigenous forests, and global commercial agriculture, this important book investigates how Africa has been exploited and how Africans should respond for the good of all. As it examines the oil industry in Africa and probes the causes of global

warming, this record warns of its insidious impacts and explores false solutions. Demonstrating that the issues around natural resource exploitation, corporate profiteering, and climate change must be considered together if the planet is to be saved, the book suggests how Africa can overcome the crises of environment and global warming.

*Financial Crisis Management and Democracy* UNESCO Publishing  
"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19

disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

A Cry From the Far Middle Emerald Group Publishing

This edited volume examines the opportunities to think, do, and/or create jointly afforded by digital storytelling. The contributors discuss digital storytelling in the context of educational programs,

teaching anthropology, and ethnographic research

Slow Violence and the Environmentalism of the Poor de Gruyter Open Poland

Taking as its premise that the proposed epoch of the Anthropocene is necessarily an aesthetic event, this collection explores the relationship between contemporary art and knowledge production in an era of ecological crisis. Art in the Anthropocene brings together a multitude of disciplinary conversations, drawing together artists, curators, scientists, theorists and activists to address the geological reformation of the human species. With contributions by Amy Balkin, Ursula Biemann, Amanda Boetzkes, Lindsay Bremner, Joshua Clover & Juliana Spahr, Heather Davis, Sara Dean, Elizabeth Ellsworth & Jamie Kruse (smudge studio), Irmgard Emmelhainz, Anselm Franke, Peter Galison, Fabien Giraud, & Ida Soulard, Laurent Gutierrez & Valerie Portefaix (MAP Office), Terike Haapoja & Laura Gustafsson, Laura Hall, Ilana Halperin, Donna Haraway & Martha Kenney, Ho Tzu Nyen, Bruno Latour, Jeffrey Malecki, Mary Mattingly, Mixrice (Cho Jieun & Yang Chulmo), Natasha Myers, Jean-Luc Nancy & John Paul Ricco,

Vincent Normand, Richard Pell & Emily Kutil, Tomas Saraceno, Sasha Engelmann & Bronislaw Szerszynski, Ada Smallbegovic, Karolina Sobocka, Richard Streitmatter-Tran & Vi Le, Anna-Sophie Springer, Sylvere Lotringer, Peter Sloterdijk, Zoe Todd, Etienne Turpin, Pinar Yoldas, and Una Chaudhuri, Fritz Ertl, Oliver Kellhammer & Marina Zurkow. This book is also available as an open access publication through the Open Humanities Press: <http://openhumanitiespress.org/art-in-the-anthropocene.html>

*Photography and the Art of Chance* Plume  
This impressive collection of original essays explores the relationship between social conflict and the environment - a topic that has received little attention within criminology. The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments, as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems. Largely informed by green criminology perspectives, the chapters in the book are intended to stimulate new understandings of the

relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world. With a goal of creating a typology of environment-social conflict relationships useful for green criminological research, this study is essential reading for scholars and academics in criminology, as well as those interested in crime, law and justice. New Multicultural Identities in Europe ISBN Agentur Schweiz

For over a decade Living Justice has introduced readers to Catholic social teaching. The second classroom edition has been revised and updated throughout to better meet the needs of students today. Key updates include further reflection on the use of the just-war theory in light of events in Iraq and Afghanistan, the revival of terrorist threats, the papacy of Benedict XVI, the social encyclical Caritas in Veritate, the recent financial crisis, business ethics today, and ongoing environmental concerns.

UNESCO Science Report

Fahamu/Pambazuka

This book explores Sustainable

Development Goal (SDG) 11, providing insights into viable pathways and policy designs for a transition towards sustainable, inclusive and resilient cities. The volume discusses existing scientific literature on SDG 11 and provides conceptual frameworks relating to systemic transitions, sectoral transitions and behavioural transitions for overcoming challenges related to governance and implementation. Through detailed case studies from cities and settlements, in Europe, Middle East and Asia, it showcases the dynamic processes involved in urban transformations. Drawing from these comparative analyses, the book provides robust frameworks and tools for better solutions and viable pathways to achieve SDG targets in diverse urban settings. Rich in empirical data, this book will be useful for scholars and researchers of development studies, environment studies, urban studies, urban sociology, political economy, political studies, public policy and sociology. It will also be useful for policy makers, professionals, non-governmental organisations (NGOs) and think tanks working in the area of sustainable development and urban

planning.

Business Ethics and Values Verso Books

Tracing the impact of Australia's #MeToo moment In 2021, Australia saw rage and revelation, as #MeToo powered an insurgency against sexism and sexual violence. From once isolated survivors to political staffers, women everywhere were refusing to keep men's secrets. In this electrifying essay, Jess Hill traces the conditions that gave birth to #MeToo and tells the stories of women who - often at great personal cost - found themselves at the centre of this movement. Hill exposes the networks of backlash against them - in government, media, schools, and in our national psyche. This is a powerful essay about shame, secrecy and, most of all, a revolutionary movement for accountability. "Here's what men like Scott Morrison don't understand: political spin has no power against the rage unleashed by #MeToo. At its heart, this is an accountability movement . . . The cultural revolution of #MeToo is not just about sexual violence. It is taking aim at patriarchy's most sacred compact: the keeping of men's secrets."—Jess Hill, *The Reckoning*

*Art in the Anthropocene* U of Minnesota Press

This book critically analyses how politics and power affect the ways that medicine is taught and learned. Challenging society's historic reluctance to connect the realm of politics to the realm of medicine, *Medical Education, Politics and Social Justice: The Contradiction Cure* emphasizes the need for medical students to engage with social justice issues, including global health crises resulting from the climate emergency, and the health implications of widening social inequality. Arguing for an increased focus on community-based learning, rather than acute care, this innovative text maps the territory of medicine's contradictory engagement with politics as a springboard for creative curriculum design. It demonstrates why the socially disempowered - such as political and climate refugees, the homeless, or those without health insurance should be primary subjects of attention for medical students, while exploring how political engagement can be refined, sharp, cultivated and creative, engaging imagination and demanding innovation Exploring how the medical

humanities can promote engagement with politics to improve medical education, this book is a ground-breaking and inspiring contribution. It is an essential read for all those with a focus on medical education and medical humanities, as well as medical and healthcare students with an interest in the social determinants of health.

**Tales of Research Misconduct** MIT Press

Who can be a larrikin and how is it used politically? The figure of the larrikin goes deep in Australian culture. But who can be a larrikin, and what are its political uses? This brilliant essay looks at Australian politics through the prisms of class, egalitarianism and masculinity. Lech Blaine examines some "top blokes," with particular focus on Scott Morrison and Anthony Albanese, but stretching back to Bob Hawke and Kerry Packer. He shows how Morrison brought a cohort of voters over to the Coalition side, "flipping" what was once working-class Labor culture. Blaine weaves his own experiences through the essay as he explores the persona of the Aussie larrikin. What are its hidden contradictions - can a larrikin be

female, or Indigenous, say? - and how has it been transformed by an age of affluence and image?

*America's Security Role in a Changing World* Springer

This book proposes a holistic transdisciplinary approach to sustainability as a subject of social sciences. At the same time, this approach shows new ways, as perspectives of philosophy, political science, law, economics, sociology, cultural studies and others are here no longer regarded separately. Instead, integrated perspectives on the key issues are carved out: Perspectives on conditions of transformation to sustainability, on key instruments and the normative questions. This allows for a concise answer to urgent and controversial questions such as the following: Is the EU an environmental pioneer? Is it possible to achieve sustainability by purely technical means? If not: will that mean to end of the growth society? How to deal with the follow-up problems? How will societal change be successful? Are political power and capitalism the main barriers to sustainability? What is the role of

emotions and conceptions of normality in the transformation process? To which degree are rebound and shifting effects the reason why sustainability politics fail? How much climate protection can be claimed ethically and legally e.g. on grounds of human rights? And what is freedom? Despite all rhetoric, the weak transition in energy, climate, agriculture and conservation serves as key example in this book. It is shown how the Paris Agreement is weak with regard to details and at the same time overrules the growth society by means of a radical 1,5-1,8 degrees temperature limit. It is shown how emissions trading must – and can – be reformed radically. It is shown why CSR, education, cooperation and happiness research are overrated. And we will see what an integrated politics on climate, biodiversity, nitrogen and soil might look like. This book deals with conditions of transformation, governance instruments, ethics and law of sustainability. The relevance of the humanities to sustainability has never before been demonstrated so vividly and broadly as here. And in every area it opens up some completely new perspectives. (Prof. Dr. Dr.

h.c. mult. Ernst Ulrich von Weizsäcker, Club of Rome, Honorary President) Taking a transdisciplinary perspective, the book canvasses the entire spectrum of issues relevant to sustainability. A most valuable and timely contribution to the debate. (Prof. Dr. Klaus Bosselmann, University of Auckland, Author of “The Principle of Sustainability”) This book breathes life into the concept of sustainability. Felix Ekardt tears down the barriers between disciplines and builds a holistic fundament for sustainability; fit to guide long-term decision-making on the necessary transformation and societal change. (Prof. Dr. Christina Voigt, Oslo University, Dept. of Public and International Law)

**Environmental Justice and Environmentalism** Leuven University Press

This book offers the first comprehensive and in-depth analysis of the provisions of the ‘Malabo Protocol’—the amendment protocol to the Statute of the African Court of Justice and Human and Peoples’ Rights—adopted by the African Union at its 2014 Summit in Malabo, Equatorial Guinea. The Annex to the protocol, once it has received the required number of

ratifications, will create a new Section in the African Court of Justice and Human and Peoples’ Rights with jurisdiction over international and transnational crimes, hence an ‘African Criminal Court’. In this book, leading experts in the field of international criminal law analyze the main provisions of the Annex to the Malabo Protocol. The book provides an essential and topical source of information for scholars, practitioners and students in the field of international criminal law, and for all readers with an interest in political science and African studies. Gerhard Werle is Professor of German and International Criminal Law, Criminal Procedure and Modern Legal History at Humboldt-Universität zu Berlin and Director of the South African-German Centre for Transnational Criminal Justice. In addition, he is an Extraordinary Professor at the University of the Western Cape and Honorary Professor at North-West University of Political Science and Law (Xi’an, China). Moritz Vormbaum received his doctoral degree in criminal law from the University of Münster (Germany) and his postdoctoral degree from Humboldt-Universität zu Berlin. He is a Senior

Researcher at Humboldt-Universität, as well as a coordinator and lecturer at the South African-German Centre for Transnational Criminal Justice.

**Crude Existence** Harvard University Press

Based on more than 30 case studies in eight different countries, this book explores the governance dynamics of local social innovations in the field of poverty reduction. The diverse team of contributors reflects on the trajectory of social innovation in European governance. They illustrate how different governance dynamics and welfare mixes enable or hinder poverty reduction strategies and analyse how such dynamics involve a diversity of actors, instruments and resources at different spatial scales. The contributions are based on research motivated by the standstill in the fight against poverty in Europe and the anxiety that conventional macro-social policies are insufficient to deal with the current challenges.

*Peasants, Farmers and Scientists* Black Inc.

This exciting textbook introduces students to the ways in which the theories and tools

of International Relations can be used to analyse and address global environmental problems. Kate O'Neill develops an historical and analytical framework for understanding global environmental issues, and identifies the main actors and their roles, allowing students to grasp the core theories and facts about global environmental governance. She examines how governments, international bodies, scientists, activists and corporations address global environmental problems including climate change, biodiversity loss, ozone depletion and trade in hazardous wastes. The book represents a new and innovative theoretical approach to this area, as well as integrating insights from different disciplines, thereby encouraging students to engage with the issues, to equip themselves with the knowledge they need, and to apply their own critical insights. This will be invaluable for students of environmental issues both from political science and environmental studies perspectives.

Living Justice Rowman & Littlefield Publishers

Since the mid-20th century, organizational theorists have increasingly distanced

themselves from the study of core societal power centers and important policy issues of the day. This title addresses the global financial crisis debates and struggles around how to organize economies and societies around the world.

*Just Peace Companion* World Council of Churches

Pearl Harbor will long stand out in mens minds as an example of the results of basic unpreparedness of a peace loving nation, of highly efficient treacherous surprise attack and of the resulting unification of America into a single tidal wave of purpose to victory. Therefore, all will be interested in this unique narrative by Admiral Wallin. The Navy has long needed a succinct account of the salvage operations at Pearl Harbor that miraculously resurrected what appeared to be a forever shattered fleet. Admiral Wallin agreed to undertake the job. He was exactly the right man for it \_ in talent, in perception, and in experience. He had served intimately with Admiral Nimitz and with Admiral Halsey in the South Pacific, has commanded three different Navy Yards, and was a highly successful Chief of the Bureau of Ships. On 7 December 1941

the then Captain Wallin was serving at Pearl Harbor. He witnessed the events of that shattering and unifying "Day of Infamy." His mind began to race at high speeds at once on the problems and means of getting the broken fleet back into service for its giant task. Unless the United States regained control of the sea, even greater disaster loomed. Without victory at sea, tyranny soon would surely rule all Asia and Europe. In a matter of time it would surely rule the Americas. Captain Wallin salvaged most of the broken Pearl Harbor fleet that went on to figure prominently in the United States Navys victory. So the account he masterfully tells covers what he masterfully accomplished. The United States owes him an unpayable debt for this high service among many others in his

long career.

**Virality** Quarterly Essay

Disasters and History offers the first comprehensive historical overview of hazards and disasters. Drawing on a range of case studies, including the Black Death, the Lisbon earthquake of 1755 and the Fukushima disaster, the authors examine how societies dealt with shocks and hazards and their potentially disastrous outcomes. They reveal the ways in which the consequences and outcomes of these disasters varied widely not only between societies but also within the same societies according to social groups, ethnicity and gender. They also demonstrate how studying past disasters, including earthquakes, droughts, floods and epidemics, can provide a lens through which to understand the social, economic and political functioning of past societies

and reveal features of a society which may otherwise remain hidden from view. This title is also available as Open Access on Cambridge Core.

**Science and the Media** Univ of California Press

This second edition of *The Space Economy at a Glance* paints an updated and richly detailed picture of the space industry, its downstream services activities, and its wider economic and social impacts.

The New Left Ashgate Publishing, Ltd.

As anyone who has wielded a camera knows, photography has a unique relationship to chance. It also represents a struggle to reconcile aesthetic aspiration with a mechanical process. Robin Kelsey reveals how daring innovators expanded the aesthetic limits of photography in order to create art for a modern world.
