A fascinating journey through the origins of American tourism In the early nineteenth century, thanks to a booming transportation industry, Americans began to journey away from home simply for the sake of traveling, giving rise to a new cultural phenomenon—the tourist. In *Selling the Sights*, Will B. Mackintosh describes the origins and cultural significance of this new type of traveler and the moment in time when the emerging American market economy began to reshape the availability of geographical knowledge, the material conditions of travel, and the variety of destinations that sought to profit from visitors with money to spend. Entrepreneurs began to transform the critical steps of travel—deciding where to go and how to get there—into commodities that could be produced in volume and sold to a marketplace of consumers. The identities of Americans prosperous enough to afford such commodities were fundamentally changed as they came to define themselves through the consumption of experiences. Mackintosh ultimately demonstrates that the cultural values and market forces surrounding tourism in the early nineteenth century continue to shape our experience of travel to this day.

Joel Beath and Elizabeth Price explore this question drawing inspiration from a diverse collection of apartment designs, all smaller than 50m²/540ft². Through the lens of five small-footprint design principles and drawing on architectural images and detailed floor plans, the authors examine how architects and designers are reimagining small space living. Full of inspiration we can each apply to our own spaces, this is a book that offers hope and inspiration for a future of our cities and their citizens in which sustainability and style, comfort and affordability can co-exist. *Never Too Small* proves living better doesn't have to mean living larger.

Shivya Nath quit her corporate job at age twenty-three to travel the world. She gave up her home

and the need for a permanent address, sold most of her possessions and embarked on a nomadic journey that has taken her everywhere from remote Himalayan villages to the Amazon rainforests of Ecuador. Along the way, she lived with an indigenous Mayan community in Guatemala, hiked alone in the Ecuadorian Andes, got mugged in Costa Rica, swam across the border from Costa Rica to Panama, slept under a meteor shower in the cracked salt desert of Gujarat and learnt to conquer her deepest fears. With its vivid descriptions, cinematic landscapes, moving encounters and uplifting adventures, *The Shooting Star* is a travel memoir that maps not just the world but the human spirit.

Not all World Heritage Sites have people living within or close by their boundaries, but many do. The designation of World Heritage status brings a new dimension to the functioning of local communities and particularly through tourism. Too many tourists accentuated by the World Heritage label, or in some cases not enough tourists, despite anticipation of increased numbers, can act to disrupt and disturb relations within a community and between communities. Either way, tourism can be seen as a form of activity that can generate interest and concern as it is played out within World Heritage Sites. But the relationships that World Heritage Sites and their consequent tourism share with communities are not just a function of the number of tourists. The relationships are complex and ever changing as the communities themselves change and are built upon long-standing and wider contextual factors that stretch beyond tourism. This volume, drawing upon a wide range of international cases relating to some 33 World Heritage Sites, reveals the multiple dimensions of the relations that exist between the sites and local communities. The designation of the sites can create, obscure and heighten the power relations between different parts of a community, between different communities and between the tourism and the heritage sector. Increasingly, the management of World Heritage is not only about the management of buildings and landscapes but about managing the communities that live and work in or near them.

There are hundreds of travel guides that tell you all the good things about a place and gloss over the not so good. This guide acts as an antidote to that and tells you what you really want to know. What are the chances of leaving the place alive? Will the food kill you, or will it be the water? How friendly or violent are the locals? Most of the time you don't get to know this until you're actually there - but by then it's too late. '101 Places Not to Visit' takes you through a selection of cities and countries that any wise traveller should give a miss. Its tongue-in-cheek, laugh-out-loud humour outlines every not-so-attractive element of each place. A star rating of boredom, likelihood of fatal visit, friendliness of people and ease of travelling is included at the start of each entry to give the reader a taster. This is followed by an historical outline, its culture - or lack of it - and what culinary delights you can hope to endure. All the well-researched facts are sure to put off any foolish potential visitor. Well, at least they have been warned! Arranged by continent, the chapters are in alphabetical order for easy reference and concentrate on each nation's cities. History, climate and visas are all discussed with extra box text as appropriate.
