India is a multifaceted, multicultural nation with a rich tradition of ethnic, religious, linguistic, social and cultural mores, beliefs and practices. What has allowed for such a rich diversity of people and what have been the challenges to effective communication between and among these groups? India is also Bharat, and where does the twain meet between the imagined and the real India and the imagined and the real Bharat? This book offers insights into understanding how we deal with difference, how we perceive one another and what we do about religious, caste and regional conflicts using the lens of "communication studies". It can be read by both intelligent and lay readers as well as students of communication, culture and other social sciences.

It's never too early to share the joy of learning with a child! Sally Goldberg gives parents the tools to provide such rewarding experiences in an organized, fun way with this special book. Here are more than fifty entertaining activities to enjoy with very young children, with instructions for making the toys needed for play. Baby and Toddler Learning Fun also provides smart tips for

enriching the home environment in other ways for baby's learning. As children grow, the activities can be easily adapted so they remain as much fun for a toddler as for an infant. It's quick and inexpensive to make the toys out of the stuff infants and toddlers already enjoy looking at or handling-plastic containers, stiff paper, brightly colored scraps of material, and other household items. This hands-on book not only helps parents teach babies important concepts about colors, shapes, letters, and numbers, but also brings parent and child closer through engaging playtimes. The activities aren't to be used as drills but rather as part of dynamic play that parent and child will enjoy. Charts help parents keep track of concepts as they are introduced. The activities are equally appropriate for children with learning delays.
