Working from the Heart advocates for a deeper understanding that the therapist's expressions of non-sexual, non-romantic love are a core ingredient in effective psychotherapy. From a heart-centered perspective it provides therapists with ways of helping their patients forgive themselves, remove their blocks to receiving love, and engaging the realms of their emotional hearts and Higher Self in order to solve complex life dilemmas.

DC Motors - Speed Controls - Servo Systems: An Engineering Handbook is a seven-chapter text that covers the basic concept, principles, and applications of DC and speed motors and servo systems. After providing the terminology, symbols, and systems of units, this book goes on dealing with the basic theory, motor comparison, and basic speed control methods of motors. The subsequent chapters describe the phase-locked servo systems and their optimization and

applications. These topics are followed by a discussion of the developments made by Electro-Craft in the field of DC Brushless Motors. The final chapter provides revised data sheets on Electro-Craft products and describes the models in the motomatic range of speed controls, servomotor controls, and digital positioning systems. This handbook is of great value to professional engineers and engineering students.

Written with the absolute beginner in mind, this book teaches all the basics for machine sewing with step-by-step instructions and photographs. Sewing skills are learned by working on projects, beginning with something very easy and getting progressively more difficult as the reader works through the book. New skills are explored in depth as they are introduced. The projects are divided into two sections: garment sewing and home decor/accessory sewing, making this the most comprehensive beginner's book available. The accompanying online videos include complete step-by-step sewing basics, demonstrate all projects, and offer the complete book pages in PDF format. *Catalogue of Copyright Entries ...*

Essential Sewing Guide

The book discusses the dangers of the "unipolar view" of world politics, one in which the United States is overwhelmingly predominant and should act accordingly. The book notes the damage

caused by this view in action - as in the Middle East and Europe. It assesses the real strengths and weaknesses of American power - "soft," military, economic, and moral. It contrasts the federal systems of "Old America" and "New Europe" as models for governing today's increasingly plural system. It notes how friendly balancing from Europe is critical for maintaining America's own constitutional equilibrium.
