The devastating terrorist attacks on the World Trade Center and the

Pentagon and America's first domestic bio-terrorism mail attacks have shifted America's attention and resources to the immediate threat of international terrorism. But we shouldn't be fooled. Since the publication of the hardcover edition of *The China Threat* in November of 2000, one thing remains very much the same: the People's Republic of China is the most serious long-term national security challenge to the United States. In fact, after the

events of September 11, the China threat should seem all the more real, for Communist China is one of the most important backers of states that support international terrorism. —From the new introduction by the author

The debate on censorship in India has hinged primarily on two issues - the depiction of sex in the various media, and the representation of events that could, potentially, lead to violent communal clashes. This title traces the trajectory of debates by Indian feminists over the years around the

issue of gender and censorship.

It is now more than 100 years since the first woman became editor of a national newspaper. She lasted in the job only a

few weeks... before being replaced by a man. Since then, scores of determined and ambitious women journalists have stormed the newspaper offices of Fleet Street, gradually beating down all the barriers that tried to keep them firmly out. Who were these extraordinary pioneering women? Their stories are all here, from the superstars such as Marje Proops, Claire Rayner, Jean Rook, Anne Robinson, Katharine Whitehorn, Jilly Cooper, Felicity Green, Nancy

Banks Smith, Doreen Spooner, Sheila Black and Mary Stott, to the supporting cast who largely toiled without any recognition. Many of these women blasted their way into jobs previously reserved exclusively for men and they dared to write about things that had never been written about before in the public prints, for a large and grateful readership. Here is the story of Fleet Street in its bold, brash, powerful, influential - and often alcohol-soaked - heyday, and of the

women who, by their courage, persistence and sheer talent, feminised and humanised national newspaper journalism.

In this thought-provoking work, Tony D. Sampson presents a contagion theory fit for the age of networks. Unlike memes and microbial contagions, Virality does not restrict itself to biological analogies and medical metaphors. It instead

points toward a theory of contagious assemblages, events, and affects. For Sampson, contagion is not necessarily a positive or negative force of encounter; it is how society comes together and relates. Sampson argues that a biological knowledge of contagion has been universally distributed by way of the rhetoric of fear used in the antivirus industry and other popular discourses surrounding network culture. This awareness is also detectable in concerns over too much

connectivity, such as problems of global financial crisis and terrorism. Sampson's "virality" is as established as that of the biological meme and microbe but is not understood through representational thinking expressed in metaphors and analogies. Rather, Sampson interprets contagion theory through the social relationalities first established in Gabriel Tarde's microsociology and subsequently recognized in Gilles Deleuze's ontological worldview. According to

Sampson, the reliance on representational thinking to explain the social behavior of networking--including that engaged in by nonhumans such as computers--allows language to overcategorize and limit analysis by imposing identities, oppositions, and resemblances on contagious phenomena. It is the power of these categories that impinges on social and cultural domains. Assemblage theory, on the other hand, is all about relationality and encounter, helping us

to understand the viral as a positively sociological event, building from the molecular outward, long before it becomes biological.

American Culture in the 1950s

Peter Lang GmbH, Internationaler Verlag Der Wissenschaften
This book provides a stimulating account of the dominant cultural forms of 1950s America: fiction and poetry; theatre and performance; film and television; music and radio; and the visual arts. Through detailed

commentary and focused case studies of influential texts and events - from Invisible Man to West Side Story, from Disneyland to the Seattle World's Fair, from Rear Window to The Americans - the book examines the way in which modernism and the cold war offer two frames of reference for understanding the trajectory of postwar culture. The two core aims of this volume are to chart the changing complexion of American culture in the years following World War II and to provide readers

with a critical investigation of 'the 1950s'. The book provides an intellectual context for approaching 1950s American culture and considers the historical impact of the decade on recent social and cultural developments.
