Bitter Honey, seasoned  
chef Letitia Clark invites  
us into her home on one  
of the most beautiful  
islands in the  
Mediterranean Sea -  
Sardinia. The recipes in  
this book do not take long

to make, but you can  
taste the ethos behind  
every one of them - one  
which invites you to slow  
down, and nourish  
yourself with fresh food,  
friends and family. The  
importance of eating well  
is even more pronounced  
here on this forgotten

island. Try your hand at Roasted Aubergines with Honey, Mint, Garlic and Salted honey, or a Salad of Pecorino with Walnuts and Honey, followed by Malloreddus (the shell-shaped pasta from the region) with Sausage and Tomato. Each recipe and the story behind it will transport you to the glittering, turquoise waters and laid-back lifestyle of this Italian paradise. With beautiful design, photography, full colour illustrations and joyful anecdotes throughout, Bitter Honey

is a holiday, a cookbook and a window onto a covetable lifestyle in the sun - all rolled into one. **Sediments** Lonely Planet  
 \* Adventure memoir from a renowned winter climber at the top of his game \* Moro reflects on some of his most significant climbs \* A bestseller in Italy, this is

the first English-language edition of Moro's story Simone Moro is a celebrated Italian alpinist who specializes in winter climbing: He holds the record for first winter ascents of 8000-meter peaks—Shisha Pangma, Makalu, and Gasherbrum II. A passionate climber, he is also an accomplished helicopter pilot and founder of a helicopter rescue program in Nepal. The Call of the Ice was written during Moro's dramatic winter attempt on Nanga Parbat in 2012—his twelfth

attempt on that mountain—during weather delays and other breaks in the climb. Moro reflects on past climbs and partners, including the death of his longtime friend and climbing partner, Anatoli Boukreev, on Annapurna, his mourning when Boukreev died, and his subsequent recovery; Denis Urubko and the nature of climbing partnerships; two attempts on Shisha Pangma; Broad Peak; Makalu; and Gasherbrum II, which he, Urubko, and Cory Richards completed

in February 2011 despite near-tragic moments when they miraculously escaped after being swept away by an avalanche. Many of Moro's climbs do not result in a summit and he explains why his interest lies in the attempt itself. In addition to these reflections, we relive in real-time his attempt on Nanga Parbat, which he and Urubko had to abandon after 51 days and 6600 meters! "I will go in winter. Again. Yes in winter. Just because it's my dream. Just because exploration never ends." –

 John E. Mylroie and Ira D. Sasowsky' Caves occupy incongruous positions in both our culture and our science. The oldest records of modern human culture are the vivid cave paintings from southern France and northern Spain, which are in some cases more than 30,000 years old (Chauvet, et al, 1996). Yet, to call someone a "caveman" is to declare them primitive

and ignorant. Caves, being cryptic and mysterious, occupied important roles in many cultures. For example, Greece, a country with abundant karst, had the oracle at Delphi and Hades the god of death working from caves. People are both drawn to and mortified by caves. Written records of cave exploration exist from as early as 852 BC (Shaw, 1992). In the decade of the 1920's, which was rich in news events, the second biggest story (as measured by column

inches of newsprint) was the entrapment of Floyd Collins in Sand Cave, Kentucky, USA. This was surpassed only by Lindbergh's flight across the Atlantic (Murray and Brucker, 1979).

**The Adula Alps**

Routledge

This book is the result of a research project designed and carried out at the Department of Architecture, University of Florence. This research was based on the transfer of knowledge from members of the Albanian Diaspora in Italy (university students, young architects and researchers) to their

home country. This unique process blazed a trail in the Albania-related studies by creating a methodology, which could be replicated not only in Albanian rural contexts, but also elsewhere. The book constitutes a structured tool for generating sustainable and socially inclusive territorial development processes in five lesser-known Albanian cultural sites. Their tangible and intangible cultural heritage was seen as a driving factor for triggering development

processes aimed at improving the inhabitants' quality of life and strengthening local identity and social networks. Through concrete proposals and strategies, the book offers scenarios and solutions capable of enhancing the potential of each village and, at the same time, counteracting the effects of land abandonment that so often characterise them.

Including two new chapters on Alex

Honnold's free solo ascent of the iconic 3,000-foot El Capitan in Yosemite National Park. On June 3rd, 2017, Alex Honnold became the first person to free solo Yosemite's El Capitan—to scale the wall without rope, a partner, or any protective gear—completing what was described as "the greatest feat of pure rock climbing in the history of the sport" (National Geographic) and "one of the great athletic feats of any kind, ever" (New York Times). Already one of the most famous adventure

athletes in the world, Honnold has now been hailed as "the greatest climber of all time" (Vertical magazine). Alone on the Wall recounts the most astonishing achievements of Honnold's extraordinary life and career, brimming with lessons on living fearlessly, taking risks, and maintaining focus even in the face of extreme danger. Now Honnold tells, for the first time and in his own words, the story of his 3 hours and 56 minutes on the sheer face of El Cap,

which Outside called "the moon landing of free soloing...a generation-defining climb. Bad ass and beyond words...one of the pinnacle sporting moments of all time."

The book deals with the most striking landscapes and landforms of Italy. Attention is given to landform diversity and landscape evolution through time which has been controlled by very diverse geological conditions and dramatic

climate changes that have characterized the Italian peninsula and islands since the end of the last glaciation. In addition, various examples of human impact on the landscape are presented. Landscapes and Landforms of Italy contains more than thirty case studies of a multitude of Italian geographical landmarks. The topics and sites described in this book range from the Alpine glaciers to the Etna and Vesuvius volcanoes, taking into account the

most representative fluvial, coastal, gravity-induced, karst and structural landscapes of the country. Chapters on the geomorphological landmarks of the cities of Rome and Venice are also included. The book provides the readers with the opportunity to explore the variety of Italian landscapes and landforms through informative texts illustrated with several color maps and photos. This book will be relevant to scientists, scholars and any readers interested in geology, physical

geography, geomorphology, landscape tourism, geoheritage and environmental protection.

**Learn how to take professional-quality photographs using the same tricks today's top photographers use (surprisingly, it's easier than you'd think)!**

This is a completely, totally updated version of the #1 best-selling digital photography book of all time! It's the award winning, worldwide smash hit, written by Scott Kelby, that's been translated into dozens of different languages.

Here's how Scott de-

scribes this book's brilliant premise: "If you and I were out on a shoot, and you asked me, 'Hey, how do I get this flower to be in focus, with the background out of focus?,' I wouldn't stand there and give you a photography lecture. In real life, I'd just say, 'Put on your zoom lens, set your f-stop to f/2.8, focus on the flower, and fire away.' That's what this book is all about: you and I out shooting where I answer questions, give you advice, and share the secrets I've learned just like I would

with a friend—without all the technical explanations and techie photo speak.”

This isn't a book of theory—full of confusing jargon and detailed concepts. This is a book on which button to push, which setting to use, and when to use it. With over 200 of the most closely guarded photographic “tricks of the trade,” this book gets you shooting dramatically better-looking, sharper, more colorful, more professional-looking photos every time.

Each page covers a single concept that makes your

photography better. Every time you turn the page, you'll learn another pro setting, tool, or trick to transform your work from snapshots into gallery prints. If you're tired of taking shots that look “okay,” and if you're tired of looking in photography magazines and thinking, “Why don't my shots look like that?” then this is the book for you.

Wolfwatching was the fourteenth collection published by Ted Hughes

(1930-98), England's former Poet Laureate. In it, we encounter several poems that feature his typically striking yet somber exactitude, a style of perception and depiction always unclouded by sentiment. Other poems find Hughes returning to the Yorkshire

landscape of his childhood, recounting the tragic effects of World War I, or revisiting the dire plight of that region's coal miners and textile workers. Wolfwatching is an unflinching book about the struggles of this world, struggles both physical and spiritual, both in and out of nature.
