This is a guide to rails, a relatively homogeneous family of birds spread throughout the world. Barry Taylor and Ber van Perlo have described and illustrated 145 species of rails, including two that

are newly described, and also ten that are recently extinct and two that are almost certainly extinct. The book, based on up-to-date references and on new observations, is the first to give comprehensive information on field identification (including voice), covering all species and races for which details are known. It is also the first to provide descriptions of the immature and juvenile plumages of many species. The authors provide a detailed summary of current knowledge of all aspects of rail biology and their often complex behaviour, social structure, and family life. They explain how such apparently poorly flying birds can undertake intercontinental migrations and are such widespread and successful colonists of remote oceanic islands. They also discuss the remarkable ease and speed with which species on such islands have evolved into flightless forms in the absence of predators, a fact that has led to the rapid extinction of numerous island taxa following the arrival of man. Rail habitats are fast disappearing, say the authors, and many rails become endangered before enough is known about them to plan effective conservation measures. The book provides information on distribution, status, habitat requirements, and current threats, and it gives conservation priorities for threatened species.

New York Times Bestseller A moving and inspiring memoir from the beloved sports broadcaster Craig Sager on his battle with leukemia and how he maintained a positive outlook on life in face of incredible circumstances. "Time is something that cannot be bought, it cannot be wagered with God, and it is not in endless supply. Time is simply how you live your life." —Craig Sager Thanks to an eccentric wardrobe filled with brightly colored suits and a love of sports that knows no bounds, Craig Sager is one of the most beloved and recognizable broadcasters on television. So when the sports world learned that he was diagnosed with acute myeloid leukemia (AML) there was an outpouring of love and support from everyone who was inspired by his colorful life and his fearless decision to continue doing the job he loved—despite being told that he would have only three-to-six months to live. Sager has undergone three stem cell transplants—with his son as the donor for two of them—and more than twenty chemotherapy

cycles since his diagnosis. In *Living Out Loud*, Craig Sager shares incredible stories from his remarkable career and chronicles his heroic battle. Whether he's sprinting across Wrigley Field mid-game as a college student with cops in pursuit, chasing down Hank Aaron on the field for an interview after Aaron broke Babe Ruth's home run record, running with the bulls in Pamplona, or hunkering down to face the daunting physical challenges of fighting leukemia, Craig Sager is always ready to defy expectations, embrace life, and live it to the fullest. Including a foreword by Charles Barkley and with unique insight from his son Craig Sager II, this entertaining, honest, and introspective account of a life lived in sports reveals the enduring lessons Sager has learned throughout his career and reminds you that no matter what life throws at you, to always look at the bright side.

The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

As occupational therapy celebrates its centennial in 2017, attention returns to the profession's founding belief in the value of therapeutic occupations as a way to remediate illness and maintain health. The founders emphasized the importance of establishing a therapeutic relationship with each client and designing an intervention plan based on the knowledge about a client's context and environment, values, goals, and needs. Using today's lexicon, the profession's founders proposed a vision for the profession that was occupation based, client centered, and

evidence based--the vision articulated in the third edition of the Occupational Therapy Practice Framework: Domain and Process. The Framework is a must-have official document from the American Occupational Therapy Association. Intended for occupational therapy practitioners and students, other health care professionals, educators, researchers, payers, and consumers, the Framework summarizes the interrelated constructs that describe occupational therapy practice. In addition to the creation of a new preface to set the tone for the work, this new edition includes the following highlights: a redefinition of the overarching statement describing occupational therapy's domain; a new definition of clients that includes persons, groups, and populations; further delineation of the profession's relationship to organizations; inclusion of activity demands as part of the process; and even more up-to-date analysis and guidance for today's occupational therapy practitioners. Achieving health, well-being, and participation in life through engagement in occupation is the overarching statement that describes the domain and process of occupational therapy in the fullest sense. The Framework can provide the structure and guidance that practitioners can use to meet this important goal.

A young Russian woman comes into her own in the midst of revolution and civil war in this "brilliant" novel set in "a world of furious beauty" (Los Angeles Review of Books). After the loves and betrayals of The Revolution of Marina M., young poet Marina Makarova finds herself alone amid the devastation of the Russian Civil War -- pregnant and adrift, forced to rely on her own resourcefulness to find a place to wait out the birth of her child and eventually make her way back to her native city, Petrograd. After two years of revolution, the city that was once St. Petersburg is almost unrecognizable, the haunted, half-emptied, starving Capital of Once Had Been, its streets teeming with homeless children. Moved by their plight, though hardly better off herself, she takes on the challenge of caring for these orphans, until they become the tool of tragedy from an unexpected direction. Shaped by her country's ordeals and her own trials -- betrayal and privation and inconceivable loss -- Marina evolves as a poet and a woman of sensibility and substance hardly imaginable at the beginning of her transformative odyssey. Chimes of a Lost Cathedral is the culmination of one woman's s journey through some of the most dramatic events of the last century -- the epic story of an artist who discovers her full power, passion, and creativity just as her revolution reveals its true direction for the future.
