Many of our oldest traditions are linked with the position of the Sun, so this book is aimed at readers from a pagan background and those interested in the astrological technique of declination.

Expert Card Technique Wessex Astrologer Limited
Linking astrology with the seven rays enables people to recognise their own deepest qualities. According to the ageless wisdom, the seven rays are cosmic streams of energy that pervade all life on earth. Astrology and the Seven Rays introduces the psychological application of the rays, giving insights that could not otherwise be

obtained from the astrological chart. Bruno Huber discovered a new method that can be used by both specialist and layman to determine the rays in the individual horoscope. This enables you to find your own personal ray combination, and those of others. Astrology and the Seven Rays opens up a new approach to esoteric psychology and esoteric astrology, and provides insight into the process of spiritual development. Bruno and Louise Huber have taught a new dynamic direction of astrology for over thirty years, reflected in their series of eight books on astrological psychology. Their work was grounded in the esoteric teaching of

Alice Bailey and in the psychosynthesis of Roberto Assagioli. They are founders of the internationally known Swiss school of astrological psychology in Zurich. The text is an edited transcript of an inspirational seminar given by the Hubers in England in 1998, supplemented with some new material. It represents the fruit of a lifelong dedication to the synthesis of spiritual, psychological and astrological understanding. A ground breaking work for the new age. *Color Change Hanky* Pavilion Books, Limited A book about the magic principle known as Out To Lunch. This book is a collection of over 60 routines by eighteen well known magicians.

 Francis Hopkinson
 Smith (1838-1915) was
 an engineer, artist,

illustrator, and short story writer. As a successful engineer he took on difficult feats such as the foundations for the Statue of Liberty, the foundation of Penfield Reef Lighthouse in Long Island Sound, the design of Butlers Flat Lighthouse at the entrance to the harbor of New Bedford, Massachusetts, and the Race Rock Light in Fisher's Island Sound. As he devoted more and more time to his

hobby, which was painting, he traveled frequently to Europe and became known for his work in portraits, genre, and illustration.
