### *Euratom Information* ScholarlyEditions

Issues in National and Regional Governments and Politics: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about National and Regional Governments and Politics. The editors have built Issues in National and Regional Governments and Politics: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about National and Regional Governments and Politics in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in National and Regional Governments and Politics: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

### **African Small Ruminant Research and Development** John Wiley & Sons

Jurgen Schulte and Christian Endler met in 1990 at an international conference on the Structure of Water held in the Lecture Halls of the University of Graz (Austria). Disappointed by the lack of a systematic strategy of research into the physics of homoeopathy Jurgen Schulte started to work on the establishment of scientifically acceptable research standards in physics of homoeopathy and encouraged academic researchers to establish a coordinated and focused research strategy. In 1994, with the help of major representatives of the international research community, they edited one of the first academic interdisciplinary books on Ultra High Dilution and homoeopathy that underwent a rigorous scientific international referee process before publishing. Due to the dedicated help of the prominent referees (BD Josephson, Nobel Laureate, Cavendish Lab. , Cambridge; M Bastide, Fac de Pharmacy, University Montpellier; RG Jahn, Aerospace Science, Princeton University), the book 1994 was quickly considered a mile stone and turning point for the scientific approach of research into Ultra High Dilution and homoeopathy. Since then the academic research community has grown considerably and many international conferences have been held. Today, research into homoeopathy is to be accepted by the European Union as part of the academic sciences, worthy to be funded at European Union level; an effort that took many years of research coordination and research strategy development. Excerpts of the Research Strategy of the European Committee for Homoeopathy (ECH) have been included in this book.

Les collaborateurs identifient certains critères importants pour l'évaluation de la situation actuelle et future dans le domaine du logement, précisent les questions et priorités de la recherche en matière de logement et signalent certaines questions de politique qui se dessinent. Les articles sont répartis en six sections: facteurs économiques, démographiques et institutionnels sous-jacents à la demande

de logements au cours de la période de l'après-guerre; principaux aspects de l'offre de logements, et notamment financement, technologie et réglementation; croissance du parc immobilier et modifications de la qualité des logements; équilibre entre l'offre et la demande compte tenu de ce qui est suffisant, convenable et abordable; évolution de l'environnement des lieux habités; leçons, défis et questions pour l'avenir. L'ouvrage contient également certains résumés utiles des mesures prises entre 1945 et 1986 en matière de politiques de logement. Document de référence essentiel sur le logement urbain et le développement des villes au cours de la période d'après-guerre au Canada, Habitations et milieu de vie sera apprécié des universitaires, des planificateurs, des professionnels et des étudiants qui s'intéressent aux questions de logement.

### Rapports Du Colloque Méthodés D'essai Et D'étude Des Bétons Aux Agrégats Légers Springer Science & Business Media

In the middle and late 1960s, when it was clear that neuroendocrinology was established as a discipline in its own right, it occurred to us that auto biographical accounts of the pioneer work in this field by the major participants would provide a highly interesting and informative account of history in the making. With the death of G. W. Harris in late 1971, and the loss thereby of an outstanding pioneer and personality in neuroendocrinology, it appeared to us to be even more urgent to undertake such a venture and collect as many stories as possible. The three of us agreed that initially we would limit our invitations to the senior investigators whose research careers lay mostly behind them, with the hope that if this venture proved successful, we could ask younger and still very active researchers in neuroendocrinology to contribute to a subsequent volume. Most of those invited to write for this book agreed to do so, but regrettably there remain some notable absentees. The authors were requested to write a personal, and even idiosyncratic, account of the steps taken, and the motivation and drive that led them to develop their interest in the relationship between the brain and the endocrine system.

### The Sustainability of the European Social Model McGill-Queen's Press - MQUP

De Detroit à Lahore, la plupart des villes du monde sont confrontées à des difficultés financières, alors même qu'elles doivent assumer des responsabilités de plus en plus complexes. Le présent ouvrage, Finances municipales : manuel à l'usage des collectivités locales, prend parti — le parti des maires et des gestionnaires municipaux. Rares sont les publications consacrées à cette question qui ciblent de façon aussi directe et pragmatique les responsables de l'action publique et le personnel financier à l'échelon local. Le contenu et les principaux messages de ce manuel ont été conçus de manière à répondre aux questions et préoccupations auxquelles les villes et les municipalités sont quotidiennement confrontées dans le cadre de la gestion de leurs finances. Le manuel Finances municipales prend position. Les auteurs de ses huit chapitres examinent les enseignements observés dans divers domaines : relations entre administrations, finances des métropoles, gestion financière, gestion des recettes, des dépenses et du patrimoine public, financements extérieurs et évaluation de la performance des finances municipales. L'ouvrage traite de sujets allant de la décentralisation à la transparence et à l'obligation de rendre compte. Il explore aussi des domaines moins balisés tels que la gestion du patrimoine, la solvabilité, la réponse aux crises financières. Le

manuel Finances municipales appelle à l'action. En plus de partager avec le lecteur un savoir très pointu sur de nombreux sujets techniques, il guide les autorités locales dans le labyrinthe des instruments existants. L'outil d'auto-évaluation des finances municipales (MFSA), décrit au chapitre 8, devrait tout particulièrement aider les municipalités à évaluer leur situation et à progresser sur la voie des réformes.

*Acta Obstetricia Et Gynecologica Scandinavica* Odile Jacob

L'utilisation et la gestion de l'énergie nucléaire sont des sujets sensibles. Chaque accident nucléaire majeur qui se produit soulève de nombreuses et nouvelles interrogations sur les risques radioactifs pour l'environnement et la biodiversité, et l'impact des radionucléides sur les êtres vivants et la santé. S'inscrivant au cœur du débat public, *Le risque radioactif* propose une synthèse complète des connaissances actuelles sur les principaux polluants radioactifs de l'environnement (uranium, transuraniens, isotopes radioactifs du césium, du strontium, de l'iode, du tritium, du carbone et de divers métaux de transition...), leur comportement et leur devenir dans les divers compartiments physiques des milieux et au sein des organismes vivants, dont l'homme. Il présente de façon claire et raisonnée : - les fondements de la physique et de la chimie nucléaires ainsi que leurs applications dans différents domaines (militaire, énergie, médecine, industrie...). Il aborde également les notions à connaître d'écologie et de génétique, et rappelle les origines anthropiques des radionucléides dans l'environnement ; - les grands principes de la radioécologie, discipline consacrée à l'étude des radionucléides, le comportement de ces derniers dans l'environnement (atmosphère, hydrosphère et lithosphère), leur mode de contamination et leur effet néfaste sur les organismes non humains ; - les principaux risques radioactifs pour l'homme (exposition, imprégnation), les mécanismes de contamination et leurs conséquences sur la santé (effets des irradiations) ; - les principaux inconvénients de l'utilisation de l'énergie nucléaire que sont les déchets radioactifs et leur gestion, et les accidents nucléaires et leur impact. Véritable ouvrage de référence multidisciplinaire, *Le risque radioactif* s'adresse aux ingénieurs, techniciens et industriels concernés par l'évaluation, la prévention et la gestion des risques radioactifs, aux responsables « environnement » des entreprises et collectivités ainsi qu'aux autorités de sûreté nucléaire. Il sera également utile aux enseignants et étudiants de troisième cycle ainsi qu'à toute personne souhaitant mieux comprendre le risque radioactif.

*Adapting and Writing Language Lessons* Lavoisier

In the quest for accurate and efficient analysis of the diverse area encompassed by functional foods and nutraceuticals, analysts encounter unique challenges. Uncertainty over which compound is responsible for a particular health benefit forces analysts to look for marker compounds, sometimes at extremely low levels, and sometimes as part of a matrix.

*Collection Studies* CRC Press

A selection of papers, reports and posters presented at the third European conference on echinoderms - a thorny-skinned group of marine animals considered of great zoological interest. The contributions look at morphology, development biology, ecology and symbiosis.

*Le risque radioactif : Devenir des radionucléides dans l'environnement et impacts sur la santé* ILRI (aka ILCA and ILRAD)

This volume contains 44 papers and 2 abstracts from an international conference on African small

ruminants research and development. eleven papers and 1 abstract deal with the importance of small ruminant production systems and economics. Another 11 describe and analyse feed resources and feeding systems and there are 6 papers on reproductive problems and their solutions. Seven papers and 1 abstract review the prevalent health problems under various management systems and present the solutions to these production constraints. The last 9 papers deal with breeds, breeding systems and breed improvement.

**Methods of Analysis for Functional Foods and Nutraceuticals** REVISTA GEOPOLITICA Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

**Issues in National and Regional Governments and Politics: 2011 Edition** Sapienza Università Editrice

As an applied science, enology is a collection of knowledge from the fundamental sciences including chemistry, biochemistry, microbiology, bioengineering, psychophysics, cognitive psychology, etc., and nourished by empirical observations. The approach used in the Handbook of Enology is thus the same. It aims to provide practitioners, winemakers, technicians and enology students with foundational knowledge and the most recent research results. This knowledge can be used to contribute to a better definition of the quality of grapes and wine, a greater understanding of chemical and microbiological parameters, with the aim of ensuring satisfactory fermentations and predicting the evolution of wines, and a better mastery of wine stabilization processes. As a result, the purpose of this publication is to guide readers in their thought processes with a view to preserving and optimizing the identity and taste of wine and its aging potential. This third English edition of *The Handbook of Enology*, is an enhanced translation from the 7th French 2017 edition, and is published in print as individual themed volumes and as a two-volume set, describing aspects of winemaking using a detailed, scientific approach. The authors, who are highly-respected enologists, examine winemaking processes, theorizing what constitutes a perfect technique and the proper combination of components necessary to produce a quality vintage. They also illustrate methodologies of common problems, revealing the mechanism behind the disorder, thus enabling a diagnosis and solution. Volume 1: *The Microbiology of Wine and Vinifications* addresses the first phase of winemaking to produce an "unfinished" wine: grading grape quality and maturation, yeast biology then adding it to the grape crush and monitoring its growth during vinification; and identifying and correcting undesired conditions, such as unbalanced lactic and acetic acid production, use of sulfur dioxide and alternatives, etc. Coverage includes: Wine microbiology; Yeasts; Yeast metabolism; The conditions for the development of yeasts; Lactic acid bacteria, their metabolism and their development in wine; Acetic bacteria; The use of sulfur dioxide in the treatment of musts and wines; Products and processes acting in addition to sulfur dioxide; Winemaking; The grape and its maturation; Harvesting and processing of grapes after harvest; Vinification in red and white wine making. The target audience includes advanced viticulture and enology students, professors and researchers, and practicing grape growers and vintners. *Public Health Service Publication* CRC Press

This book argues that the European Social Model can only be sustained in the current economic crisis if social and employment policies are adequately recognised as integral parts of European

economic policy-making. The contributing authors investigate

*Pioneers in Neuroendocrinology* CRC Press

Second in the series, High-Tech and Micropropagation, this work covers the micropropagation of trees and fruit-bearing plants, such as poplar, birches, larch, American sweetgum, black locust, Sorbus, sandalwood, Quercus, cedar, Persian walnut, date palm, cocoa, Citrus, olive, apple, pear, peach, plum, cherry, papaya, pineapple, kiwi, Japanese persimmon, grapevine, strawberry, and raspberry. The importance and distribution of conventional propagation and in vitro studies on individual species are discussed. In particular detail, the transfer of in vitro plants to the greenhouse or the field, and the prospects of commercial exploitation are examined. The book will be of use to advanced students, research workers and teachers in horticulture, forestry and plant biotechnology in general, and also to individuals interested in industrial micropropagation.

*Exercise, Exercise Training and the Immune System* Edward Elgar Publishing

Fuels and New Propellants is a compendium of papers presented at a conference on Fuel and New Propellants by the Federazione Associazioni Scientifiche e Tecniche, sponsored by the Consiglio Nazionale Delle Ricerche, held at Milan, Italy in June 1963. The book presents the researches made on the scientific, technical, and industrial applications of new and improved fuels and propellants.

The collection contains papers that deal with residual fuels and the marine diesel engine; the characteristics of processes for the production of high octane fuels; liquid and solid propellants for space rockets; and technical problems in the production of solid and liquid propellants.

Petrochemists, chemists, and researchers in the field of fuels and propellants will find this text interesting and insightful.
