Give your child a smart
start with the revised and
updated *What Your First
Grader Needs to Know*.
What will your child be
expected to learn in the
first grade? How can you
help him or her at home?

How can teachers foster
active, successful learning
in the classroom? This
book answers these all-
important questions and
more, offering the specific
shared knowledge that
hundreds of parents and
teachers across the nation
have agreed upon for
American first graders.
Featuring a new
Introduction, filled with
opportunities for reading
aloud and fostering

discussion, this first-grade
volume of the acclaimed
Core Knowledge Series
presents the sort of
knowledge and skills that
should be at the core of a
challenging first-grade
education. Inside you'll
discover • Favorite
poems—old and new,
such as “The Owl and the
Pussycat,” “Wynken,
Blynken, and Nod,” and
“Thirty Days Hath
September” • Beloved

stories—from many times and lands, including a selection of Aesop’s fables, “Hansel and Gretel,” “All Stories Are Anansi’s,” “The Tale of Peter Rabbit,” and more • Familiar sayings and phrases—such as “Do unto others as you would have them do unto you” and “Practice makes perfect” • World and American history and geography—take a trip down the Nile with King Tut and learn about the early days of our country, including the story of Jamestown, the Pilgrims,

and the American Revolution • Visual arts—fun activities plus reproductions of masterworks by Leonardo da Vinci, Vincent van Gogh, Paul Cézanne, Georgia O’Keeffe, and others • Music—engaging introductions to great composers and music, including classical music, opera, and jazz, as well as a selection of favorite children’s songs • Math—a variety of activities to help your child learn to count, add and subtract, solve problems, recognize

geometrical shapes and patterns, and learn about telling time • Science—interesting discussions of living things and their habitats, the human body, the states of matter, electricity, our solar system, and what’s inside the earth, plus stories of famous scientists such as Thomas Edison and Louis Pasteur

How to Teach Spelling is a comprehensive resource manual, and corresponding workbooks provide a structured and graded method to plan spelling lessons. The manual contains the material to be used at all grade levels. At the beginning of each lesson, the manual explains which words to cover for the grade level you are working with. The workbooks teach spelling rules and generalizations,

provide space for copying words, and indicate when students should write words, phrases, and/or sentences from dictation. The workbooks help students understand and practice the material. How to Teach Spelling is an excellent program for teachers who want their students to learn to recognize the sounds in the English language, to decode words, and to spell words correctly by relying on spelling rules and patterns rather than on memory. Please note this is only the manual.

Jolly Roger and the Fish Shell Education

Hands-on lessons can be fun and compelling, but when it comes to life science, they aren't always possible, practical, effective, or safe. Children can't follow a lion as it stalks a gazelle, visit the exotic kapok tree in a rain forest, or swim alongside the underwater life in a pond. But they can explore a whole world of animals, plants, and

ecosystems through the pages of beautifully illustrated, science-themed picture books. *Perfect Pairs*, which marries fiction and nonfiction picture books focused on life science, helps educators think about and teach life science in a whole new way. Each of the twenty-two lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry-based investigative process to

explore that idea;-from animal/environment interactions to the role of structure in plant and animal survival, from inheritance of traits to variation of species. Each lesson starts with a Wonder Statement- and comprises three stages. *Engaging Students-* features a hands-on activity that captures student interest, uncovers current thinking, and generates vocabulary. The heart of the investigative process, *Exploring with Students-* spotlights the paired

books as the teacher reads aloud and helps students find and organize information into data tables. Encouraging Students to Draw Conclusions- shows students how to review and analyze the information they have collected. Bringing high-quality science-themed picture books into the classroom engages a broad range of students, addresses the Performance Expectations outlined in the Next Generation Science Standards, and supports

the goals of the Common Core State Standards for English Language Arts. Even if you are science shy, Perfect Pairs can help you become a more confident teacher whose classroom buzzes with curious students eager to explore their natural world.

The Lion and the Rabbit Shell Education Unique in its coverage of contemporary American children's literature, this timely, single-volume reference covers the books our children are--or should be--reading now,

from board books to young adult novels. Enriched with dozens of color illustrations and the voices of authors and illustrators themselves, it is a cornucopia of delight. 23 color, 153 b&w illustrations. PREP Report Rigby PM With the 2013 edition of Ferri's Clinical Advisor, you can access current diagnostic and therapeutic information on more than 700 common medical conditions faster and more effectively than ever before. Teaching students to make connections across related texts promotes engagement and improves reading

comprehension and content learning. This practical guide explains how to select and teach a wide range of picture books as paired text--two books related by topic, theme, or genre--in grades K-8. The author provides mini-lessons across the content areas, along with hundreds of recommendations for paired text, each linked to specific Common Core standards for reading literature and informational texts. In a large-size format for easy photocopying, the book

includes 22 reproducible graphic organizers and other useful tools. Purchasers also get access to a Web page where they can download and print the reproducible materials.

The Teacher Farrar, Straus and Giroux (BYR)
Curiosity overcomes fear

A little blue bird is afraid to learn to fly, but is still very curious about the world beyond his nest. "Mama, mama, what is out there?" he asks. "Nothing," his mother replies. "Now go to sleep." But the little bird can't stop thinking about what his mother said. What is this nothing? Finally, curiosity draws the little bird from his nest into the wonders of the great outside world - and he learns to fly. When he returns, his family asks him, "What happened?" "Nothing!" replies the

little blue bird, happily. With his characteristically expressive and richly textured illustrations, Tomek Bogacki - whose fables for the very young have been likened to those of Leo Lionni - shows how a little bird, in his search for nothing, finds everything.
