The most enjoyable way to learn about an unfamiliar culture is through its stories--especially when they're told in two languages! Thai Stories for Language Learners introduces 28 entertaining Thai stories with bilingual Thai and English versions presented on facing pages. The stories are adapted from traditional folktales with roots in the Thai oral tradition, classic Thai literature, and Thai versions of the Indian Jataka Tales--which describe the past lives of the Buddha. The stories in this book include: "The Frightened Rabbit" is a well-known story about rabbit who hears a loud thundering sound and concludes it is a landslide, without investigating further. He runs about telling others of the landslide, thus causing unnecessary panic. It tells the story of a legendary hero--Phra Ruang--who frees the people of Lavo (Lopburi) from the ancient Khmer rulers. When the Khmer king tries to kill him, Phra Ruang escapes and is ordained as a monk. And many more! Alongside each story, readers will find: A list of key vocabulary in the Thai script, Romanized form, and the English meanings A set of questions and writing activities A Thai pronunciation guide Online audio recording in order to improve pronunciation and comprehension. While similar in method to the "activity-based learning" introduced in the first set of books, Urdu for Children: Book II is designed to meet the needs of children seven to eight years of age and older. The students' level is determined by their facility in reading, writing, and speaking Urdu rather than their chronological age. The scope of the topics in Book II is wider than in Book I and the forty stories and poems, most of them original, are more complex and longer. The original artwork is richer and more varied and the English-Urdu and Urdu-English vocabulary lists are more comprehensive. Two volumes of Let's Read Urdu have been added to help children enhance their reading skills while a two-part Workbook provides practice exercises in writing and reinforces the new vocabulary introduced in the texts. The activity-based Teacher's Manual provides detailed lesson plans for each Urdu text. Two CDs accompanying the two volumes of the textbook to help ensure standard pronunciation of words and intonations in sentences, and infuse life into the stories. Original music was composed for the poems, allowing children to sing them to help with memorization. Developed by a team of trained public school teachers with extensive backgrounds in teaching Urdu as a heritage language, the Urdu Language Textbook Series helps meet the needs of a rapidly growing Urdu-speaking community in North America. It is the first step towards helping children develop Urdu linguistic skills so that they can keep their heritage and culture alive.

Metacognition, Cognition, and Human Performance, Volume 2: Instructional Practices is a collection of papers that deals with applied settings that develop and test instructional programs in the field of education. The book discusses some insights in understanding the processes involved in writing and reading. The text defines metacognition — as a mental function and the directing of this function — and reading, as well as the structure of narratives. One paper proposes a model for cognitive monitoring and early reading by developing for children three knowledge domains: function of print, form of print, and conventions of print or metacognitive constructs. Other papers analyze metacognition, instruction, the role of questioning activities, as well as the connection between metacognition and learning disabilities. One author evaluates a different perspective whether attention-related difficulties are a normal development in a young child or a disability in the older child. This author also explains meta-attention pertaining to task solving, selective attention to other stimuli, and visual search of the surrounding or for a target object. One research shows that methodologies designed to induce underachieving children to regulate their own academic behavior can improve their performance. The text can prove useful to child psychologists, behavioral scientists, and students and professors in child education.

The most enjoyable way to learn about a new culture is through its stories—especially when they're told in two languages! This book introduces 40 stories from the Philippines through bilingual Tagalog and English texts presented on facing pages. Paired with cultural notes, vocabulary lists, exercises, comprehension questions and free online audio recordings, Tagalog Stories for Language Learners is an excellent resource for intermediate language learners, or those who wish to pick up a bit of Philippine cultural knowledge. This compilation includes a mix of traditional folktales retold for a modern audience, as well as several well-known works of contemporary Philippine literature. Along the way, you will meet fabulous mythological characters like the Bagobo goddess Mebuyan and the shape-shifting Aswang. Other characters cope with day-to-day issues, such as the domestic worker who cannot find her keys and a beauty queen who leaves behind her comfortable city life in order to help peasants in the countryside. Four of the stories are by well-known Filipino writers and are presented in complete or partially condensed form. These include: Estrangheritis by Inigo Ed. Regalado (1907) — The writer is critical of Filipinos who exalt all things foreign while, in fact, benefiting from their own land but unappreciative of their national culture. Desire by Paz Latorena (1928) — The story of a Filipino woman who has to deal with the narrow-mindedness of a foreigner who is far more interested in her body than in her personality. Greta Garbo by Deogracia Rosaro (1930) — Monina, who looks like Greta Garbo, plans a weekend getaway with her beau, only to be left at the station waiting, and later discovers he has gone on a honeymoon! Maria Elena Paterno's Sampaguita (1991) —Two popular legends about the Sampaguita (Philippine jasmine flower) which touch on the themes of courage and forbidden love.
