ORTIZ KALEIGH

Panorama francophone 1 Livre du
Professeur with CD-ROM BPS Blackwell
Although ostensibly presented as “light entertainment,” the work of writer-director-producer Joss Whedon takes much dark inspiration from the horror genre to create a unique aesthetic and perform a cultural critique. Featuring monsters, the undead, as well as drawing upon folklore

and fairy tales, his many productions both celebrate and masterfully repurpose the traditions of horror for their own means. Woofert and Jowett's collection looks at how Whedon revisits existing feminist tropes in the '70s and '80s “slasher” craze via Buffy the Vampire Slayer to create a feminist saga; the innovative use of silent cinema tropes to produce a new fear-laden, film-television intertext; postmodernist reflexivity in Cabin in the Woods; as well as exploring new concepts on “cosmic dread” and the sublime for a richer understanding of programmes

Dollhouse and Firefly. Chapters provide the historical context of horror as well as the particular production backgrounds that by turns support, constrain or transform this mode of filmmaking. Informed by a wide range of theory from within philosophy, film studies, queer studies, psychoanalysis, feminism and other fields, the expert contributions to this volume prove the enduring relevance of Whedon's genre-based universe to the study of film, television, popular culture and beyond. *Psychology and Environmental Change* Oxford University Press, USA

The Psychology of Arithmetic

Cambridge University Press

"Research over the past two decades has revealed a robust reciprocal relationship between depression and marital dissatisfaction, but only recently have

researchers been able to tease out the most clinically useful and coherent patterns in the data depicting this relationship." "In this volume, leading scholars synthesize these data, describe innovative data analysis strategies, and present original research that crosses traditional disciplinary boundaries to include perspectives from developmental psychopathology, social and personality psychology, and clinical research and practice. The recurrent nature of depression, the significant gender differences in interpersonal patterns, and the need to tailor marital therapy to account for differences among subgroups of depressed patients are among the themes explored by chapter authors. Their conclusions imply fundamental shifts in the way that we frame questions about families and pathology, conduct research, and attempt to intervene therapeutically in the lives of depressed patients."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Experts from across all industrial-organizational (IO) psychology describe how increasingly rapid technological change has affected the field. In each chapter, authors describe how this has altered the meaning of IO research within a particular subdomain and what steps must be taken to avoid IO research from becoming obsolete. This Handbook

presents a forward-looking review of IO psychology's understanding of both workplace technology and how technology is used in IO research methods. Using interdisciplinary perspectives to further this understanding and serving as a focal text from which this research will grow, it tackles three main questions facing the field. First, how has technology affected IO psychological theory and practice to date? Second, given the current trends in both research and practice, could IO psychological theories be rendered obsolete? Third, what are the highest priorities for both research and practice to ensure IO psychology remains appropriately engaged with technology moving forward?

This is a record of my time in the British Diplomatic Service, starting as a clerk in London in 1962 and working my way up until the high point of my career as Charge d'Affaires (Acting Ambassador) in the British Embassy in Sudan, from where I retired in 1997. During this time, I met,

albeit briefly, some famous people, including the Queen. I was also present during the 1966 Revolution in Uganda, the 1983 Independence of St Kitts and Nevis, Jerusalem during the First Gulf War in 1991, as well as a Sudan split by a civil war in the mid-1990s. I make no claim that this is a historical memoir, except in the very broadest sense. Rather, it is a chronological selection of personal experiences, which I hope you will find interesting and entertaining.

Franz Brentano (1838-1917) is a key figure in the development of Twentieth Century thought. It was his work that set Husserl on to the road of phenomenology and intentionality, that inspired Meinong's theory of the object which influenced Bertrand Russell, and the entire Polish school of philosophy. [^]Descriptive Psychology presents a series of lectures given by Brentano in 1887; they were the culmination of his work, and the clearest statement of his mature thought. It was this later period which proved to be so important in the work of his student, Husserl. This is the first English translation of his work. Benito Muller has added a concise introduction which places Brentano within the history of philosophy and psychology, and locates his influence in contemporary thought.
