Inspects the allure of books, their curative and restorative properties, and the passion for them that leads to bibliomania. This title comments on why we read, where we read - on journeys, at mealtimes, on the toilet (this has 'a long but mostly unrecorded history'), in bed, and in prison - and what happens to us when we read.

If someone gave you a book of names and their ancient meaning, would you be curious to look up your own name and find its significance? *Namely ME* is the first in a series of thought-provoking monologue books for middle and high school students, based on the ancient or traditional meaning of a character's name. The monologues are funny, poignant glimpses into a teen's life that use a creative new format to teach the skills of drama. Use them as individual classroom pieces, a unit of

study or to create a performance in which every child has a chance to shine. Includes bonus teacher's guide for classroom integration. *Namely ME* has an easy-to-read chapter filled with exciting ideas to help teachers. Teaching such skills as memorization, getting into character and taking a moment, *Namely ME* gives teachers a wide range of inventive monologues to use in the classroom. Take your students into a deeper study of naming traditions throughout the ages and across cultures. The possibilities of creating an exhilarating final production from the monologues are also explained clearly in this bonus chapter. Easy-to-produce performance instructions. The performances I have created from the name monologues are easy to produce, full of energy and delightful to show a wide variety of audiences. They also showcase what a teacher does in her classroom and solve the problem of finding a production with a part for every student. By award-winning playwright, theater educator, and columnist. During the past years, I have heard from hundreds of teachers from all over the world about my books *Middle Mania!* Volumes One and Two and how easy they are to use. Take what you have done with monologues in the past and explore the possibilities of doing MORE with *Namely ME*. MAUREEN BRADY JOHNSON has been a theater

teacher and director for over thirty-five years. She is the author of three books on teaching theater, a popular contributor to *EDTA's Teaching Theater* magazine and has written for Gary Garrison's newsletter, *The Loop*. She is also an award-winning playwright whose plays have been performed worldwide.

Building on the foundation set in Volume I—a landmark synthesis of research in the field—Volume II is a comprehensive, state-of-the-art new volume highlighting new and emerging research perspectives. The contributors, all experts in their research areas, represent the international and gender diversity in the science education research community. The volume is organized around six themes: theory and methods of science education research; science learning; culture, gender, and society and science learning; science teaching; curriculum and assessment in science; science teacher education. Each chapter presents an integrative review of the research on the topic it addresses—pulling together the existing research, working to understand the historical trends and patterns in that body of scholarship, describing how the issue is conceptualized within the

literature, how methods and theories have shaped the outcomes of the research, and where the strengths, weaknesses, and gaps are in the literature. Providing guidance to science education faculty and graduate students and leading to new insights and directions for future research, the Handbook of Research on Science Education, Volume II is an essential resource for the entire science education community.

The first comprehensive study of the most important ceramic innovation of the 19th century Colorful, wildly imaginative, and technically innovative, majolica was functional and aesthetic ceramic ware. Its subject matter reflects a range of 19th-century preoccupations, from botany and zoology to popular humor and the macabre. Majolica Mania examines the medium's considerable impact, from wares used in domestic settings to monumental pieces at the World's Fairs. Essays by international experts address the extensive output of the originators and manufacturers in England—including Minton, Wedgwood, and George Jones—and the migration of English craftsmen to the U.S. New research including information on important American makers in New York, Baltimore, and Philadelphia is also featured. Fully illustrated, the book is enlivened by new photography of pieces from major museums and private collections in the U.S. and Great Britain.

This book provides a comprehensive but practical understanding of the clinical approach to evaluating and caring for older people with bipolar disorder. Aspects of aging that impact the diagnosis, clinical course, and management of bipolar disorder are explained; in particular, attention is drawn to the implications of comorbidities and medical complexity for the psychiatric care of older individuals with the disorder. On the other hand, similarities to treatment in younger patients are also identified. The coverage includes thorough review of current research in the field. Clinical case vignettes are used throughout to highlight practical points, and each chapter includes "clinical pearls" that summarize key points for the clinician. The book closes by examining anticipated research directions and the future needs of this patient population. Bipolar Disorder in Older Age Patients will be an ideal update for the practicing community or geriatric psychiatrist working with older patients with bipolar disorder.

Boswell's Life of Johnson, Including Boswell's Journal of a Tour to the Hebrides, and Johnson's Diary of A Journey Into North Wales Penguin

This is history from the inside out. What did Americans say about the great events in their own lifetimes? This book is a grassroots look at the country, as real people tell the story of America in their own voices. Quotations from more than 350 individuals are taken from speeches, interviews,

editorials, letters, jokes, songs, and eyewitness accounts represent American thought from the ground up. This compendium includes the words of everyone from politicians and generals, to Native Americans, ethnic minorities, women, labor representatives, and slaves. The book is divided into 18 traditional historical periods from the pre-Columbus explorers to the terrorist attacks of September 11, 2001. We hear the voices of Jefferson, Lincoln, Teddy and FDR, but also of Joe McCarthy, Huey Long, and Susan B. Anthony. We hear American law in action through watersheds like *Brown v. the Board of Education*, the Scopes case, the prosecution of Sacco and Vanzetti, and the Salem witch trials. Then there are the grace notes, the forgotten but significant stories—a black woman beaten and humiliated for encouraging others to vote; the G.I. who overthrew a German bunker at Normandy; the last letter of a Union soldier soon to die in battle. Their words are woven into American history, remembered and illuminated in this kaleidoscopic collection.

Learning about entrepreneurship has major implications for the way we understand economic change and progress. At a time when governments all over the world look to entrepreneurship as a way to increase the wealth and well-being of their countries, *The Dynamics of Entrepreneurship* examines the causes of differences in entrepreneurial propensity between individuals, the factors that explain variations in the type and quantity of entrepreneurship at the aggregate level, and the macroeconomic implications of entrepreneurship. Using *Global Entrepreneurship Monitor (GEM)* data, the book brings together contributions from leading scholars to provide a comprehensive overview of current scholarship on entrepreneurial activity. Discussed topics include entrepreneurial motivation, gender and migration, entrepreneurial financing, urban entrepreneurship, growth-oriented entrepreneurship, economic growth, and regional entrepreneurship policies. The book concludes by summarizing its contribution to existing literature, with particular attention paid to the policy implications and the ongoing debate on

entrepreneurship.

The tragic story of Robert Johnson, great Blues musician of the American 30's, the mysterious solution to his tragic end, the background and his complete discography. An emotional thriller with a historical research of the short life of Robert Johnson, considered by most as the grandfather of rock, but adored by blues fans. A compelling narration that perhaps offers a solution to a mysterious intrigue, full of esotery and religious fanaticism, that lead to the violent and early death of the one that was labelled the Devil's Son. What of Robert Johnson's art can be defined as evil? Did he really sign a pact with Satan in order to obtain fame and honour in the music world? And what was really the cause of his death? Let's discover it together in this engaging and fluid book that will touch your hearts. PUBLISHER: TEKTIME

The exhilarating story of how London came to be one of the most exciting and influential places on earth—from the city's colorful, witty, and well-known mayor. Once a swampland that the Romans could hardly be bothered to conquer, over the centuries London became an incomparably vibrant metropolis that has produced a steady stream of ingenious, original, and outsized figures who have shaped the world we know. Boris Johnson, the internationally beloved mayor of London, is the best possible guide to these colorful characters and the history in which they played such lively roles. Erudite and entertaining, he narrates the story of London as a kind of relay race. Beginning with the days when "a bunch of pushy Italian immigrants" created Londinium, he passes the torch on down through the famous and the infamous, the brilliant and the bizarre—from Hadrian to Samuel Johnson to Winston Churchill to the Rolling Stones—illuminating with unforgettable clarity the era each inhabited. He also pauses to shine a light on innovations that have contributed to the city's incomparable vibrancy, from the King James Bible to the flush toilet. As wildly entertaining as it is informative, this is an irresistible account of the city and people that in large part shaped the world we know.

A groundbreaking medical and social history of a devastating hereditary neurological disorder once demonized as "the witchcraft disease" When Phebe Hedges, a woman in East Hampton, New York, walked into the sea in 1806, she made visible the historical experience of a family affected by the dreaded disorder of movement, mind, and mood her neighbors called St.Vitus's dance. Doctors later spoke of Huntington's chorea, and today it is known as Huntington's disease. This book is the first history of Huntington's in America. Starting with the life of Phebe Hedges, Alice Wexler uses Huntington's as a lens to explore the changing meanings of heredity, disability, stigma, and medical knowledge among ordinary people as well as scientists and physicians. She addresses these themes through three overlapping stories: the lives of a nineteenth-century family once said to "belong to the disease"; the emergence of Huntington's chorea as a clinical entity; and the early-twentieth-century transformation of this disorder into a cautionary eugenics tale. In our own era of expanding genetic technologies, this history offers insights into the social contexts of medical and scientific knowledge, as well as the legacy of eugenics in shaping both the knowledge and the lived experience of this disease.

More than 150 years after its end, we still struggle to understand the full extent of the human toll of the Civil War and the psychological crisis it created. In *Aberration of Mind*, Diane Miller Sommerville offers the first book-length treatment of suicide in the South during the Civil War era, giving us insight into both white and black communities, Confederate soldiers and their families, as well as the enslaved and newly freed. With a thorough examination of the dynamics of both racial and gendered dimensions of psychological distress, Sommerville reveals how the suffering experienced by Southerners living in a war zone generated trauma that, in extreme cases, led some Southerners to contemplate or act on suicidal thoughts. Sommerville recovers previously hidden stories of individuals exhibiting suicidal activity or aberrant psychological behavior she links to the war and its aftermath. This work adds crucial nuance to our understanding of how personal suffering shaped the way southerners viewed themselves in the Civil War era and underscores the full human costs of war.
