For more than 150 years, thousands of Indigenous children were taken from their families and sent to residential schools across Canada. Artist Carey Newman created the Witness Blanket to make sure that history is never forgotten. The Blanket is a living work of art—a collection of hundreds of objects from those schools. It includes everything from photos, bricks, hockey skates, graduation certificates, dolls and piano keys to braids of hair. Behind every piece is a story. And behind every story is a residential school Survivor, including Carey's father. This book is a collection of truths about what happened at those schools, but it's also a beacon of hope and a step on the journey toward reconciliation.

As one of America's most prominent nineteenth-century painters, Albert Bierstadt (1830-1902) is justly renowned for his majestic paintings of the western landscape. Yet Bierstadt was also a painter of history, and his figural works, replete with images of Plains Indians and the American bison, are an important part of his legacy as well. This splendid full-color volume highlights his achievements in chronicling a rapidly changing American West. Born in Germany, Bierstadt rose to prominence as an American artist in the late 1850s and enjoyed nearly two decades of critical success. His paintings propelled him to the forefront of the American art scene, but they also met with reproach from his peers and critics in the press who viewed his painting style as outmoded. Bierstadt's star has both risen and fallen as modern art historians have reconsidered his complex oeuvre. This volume takes a major step in reappraising Bierstadt's contributions by reexamining the artist through a new lens. It shows how Bierstadt conveyed moral messages through his paintings, often to preserve the dignity of Native peoples and call attention to the tragic slaughter of the American bison. More broadly, the book reconsiders the artist's engagement with contemporary political and social debates surrounding wildlife conservation in America, the creation and perpetuation of national parks, and the prospects for the West's indigenous peoples. Bierstadt's final history paintings, including his dual masterworks titled *The Last of the Buffalo*—a special focus of this volume—stand out as elegiac odes to an earlier era, giving voice to concerns about the intertwined fates of Native peoples and endangered wildlife, especially bison. Along with its rich sampling of Bierstadt's diverse artwork, *Albert Bierstadt: Witness to a Changing West* features informative essays by noted curators, scholars of art history, and historians of the American West.

The act of bearing witness can reveal much, but what about the figure of the witness itself? As contemporary culture is increasingly dominated by surveillance, the witness—whether artist, historian, scientist, government official, or ordinary citizen—has become empowered in realms from art to politics. In *Seeing Witness*, Jane Blocker challenges the implicit authority of witnessing through the examination of a series of contemporary artworks, all of which make the act of witnessing visible, open to inspection and critique.

Jewish themes in American art were not very visible until the last two decades, although many famous twentieth-century artists and critics were and are Jewish. Few artists responded openly to the Holocaust until the 1960s, when it finally began to act as a galvanizing force, allowing Jewish-

American artists to express their Jewish identity in their work. Baigell describes how artists initially deflected their responses into abstract forms or by invoking biblical and traditional figures and then in more recent decades confronted directly Holocaust imagery and memory. He traces the development of artistic work from the late 1930s to the present in a moving study of a long overlooked topic in the history of American art.

Art Wolfe's definitive opus, *Earth Is My Witness* represents forty years of expeditionary photography. For the first time, Wolfe presents the three subjects at the heart of his work—landscapes, wildlife, and cultures on the edge of extinction—in a single masterpiece that takes us through the world's ecosystems and geographical regions in a vivid display of the fragility and interconnectivity of life on Earth, while simultaneously exploring his evolution as an artist and the techniques he uses to capture the nuances and rhythms of nature. *Earth Is My Witness* is the most extensive collection of Art Wolfe photography ever compiled. This lavishly produced work spans the globe, bringing the beauty of the planet's fast-disappearing landscapes, wildlife, and cultures into stunning focus. Containing unpublished work from throughout Wolfe's widely celebrated career, *Earth Is My Witness* offers a riveting and comprehensive look at the world's ecosystems and geographical regions. Here Wolfe presents an encyclopedic selection of his photography along with intimate stories that exemplify his boundless curiosity. From the rich sights and smells of the Pushkar Camel Fair to the exact moment when a polar bear and her cubs leave their Arctic den, these images represent what Wolfe has lived for: moments when circumstance, light, and subject miraculously collide to form an iconic image. These photographs and the stories behind them explore the delicate interconnectivity of life across our planet. Setting the stage for this fascinating journey is award-winning author Wade Davis. Together, photographer and author present a world that borders on the fantastic but is all the more precious for its fragility. At the heart of Wolfe's work is the appeal for environmental, cultural, and wildlife preservation, which he makes with beautiful, far-reaching precision in this definitive opus.

Part autobiography, part thought piece, part references, the book takes an insightful look at the experience and cases of renowned paediatrician and forensic expert witness Dr. Charles Ferguson. The book presents the interaction of science and law as it applies, specifically, the Canadian courts, but the justice process as a whole. Dr. Ferguson's experience—from a scientist and medical professional's perspective—in dealing with lawyers, judges, and the process of testifying in numerous court—offers a unique glimpse into how the two worlds of science and law don't always mesh. In some cases the evidence is compelling and definitive. In others, far from it. Ultimately, the book presents the important role of the forensic expert and expert witness as a vital and deciding factor as the courtroom proceedings play out. The cases presented in the book—cases Dr. Ferguson was personally involved with—are interesting, the conclusions and results arrived at by Dr. Ferguson are well thought out and backed by his scientific expertise. The results and conclusions arrived at by the courts is often expected, sometimes surprising—in specific cases even controversial. Throughout all, Dr. Ferguson casts an independent, and sometimes critical, eye on the process presenting a compelling argument and heartfelt recommendation for science, objectivity, and justice to be served based on truth—truth insofar as the "facts" of the cases presented through evidence and the testimony provided within the judicial process. A fascinating read for university students, experts and witnesses, lawyers and judges, and anyone involved in the forensic process in the trying of criminal and civil cases.

The Moral Witness is the first cultural history of the "witness to genocide" in the West. Carolyn J. Dean shows how the witness became a protagonist of twentieth-century moral culture by tracing the emergence of this figure in courtroom battles from the 1920s to the 1960s—covering the Armenian genocide, the Ukrainian pogroms, the Soviet Gulag, and the trial of Adolf Eichmann. In these trials, witness testimonies differentiated the crime of genocide from war crimes and began to form our understanding of modern political and cultural murder. By the turn of the twentieth century, the "witness to genocide" became a pervasive icon of suffering humanity and a symbol of western moral conscience. Dean sheds new light on the recent global focus on survivors' trauma. Only by placing the moral witness in a longer historical trajectory, she demonstrates, can we understand how the stories we tell about survivor testimony have shaped both our past and contemporary moral culture.

"À la Tara Westover's *Educated*, Scorah's pensive, ultimately liberating memoir chronicles her formative years as a Jehovah's Witness...and captures the bewilderment of belief and the bliss of self-discovery."—O, The Oprah Magazine, Named one of "The Best Books by Women of Summer 2019" "Scorah's book, the bravery of which cannot be overstated, is an earnest one, fueled by a plucky humor and a can-do spirit that endears. Her tale, though an exploration of extremity, is highly readable and warm."—The New York Times Book Review A riveting memoir of losing faith and finding freedom while a covert missionary in one of the world's most restrictive countries. A third-generation Jehovah's Witness, Amber Scorah had devoted her life to sounding God's warning of impending Armageddon. She volunteered to take the message to China, where the preaching she did was illegal and could result in her expulsion or worse. Here, she had some distance from her community for the first time. Immersion in a foreign language and culture—and a whole new way of thinking—turned her world upside down, and eventually led her to lose all that she had been sure was true. As a proselytizer in Shanghai, using fake names and secret codes to evade the authorities' notice, Scorah discreetly looked for targets in public parks and stores. To support herself, she found work at a Chinese language learning podcast, hiding her real purpose from her coworkers. Now with a creative outlet, getting to know worldly people for the first time, she began to understand that there were other ways of seeing the world and living a fulfilling life. When one of these relationships became an "escape hatch," Scorah's loss of faith culminated in her own personal apocalypse, the only kind of ending possible for a Jehovah's Witness. Shunned by family and friends as an apostate, Scorah was alone in Shanghai and thrown into a world she had only known from the periphery—with no education or support system. A coming of age story of a woman already in her thirties, this unforgettable memoir examines what it's like to start one's life over again with an entirely new identity. It follows Scorah to New York City, where a personal tragedy forces her to look for new ways to find meaning in the absence of religion. With compelling, spare prose, *Leaving the Witness* traces the bittersweet process of starting over, when everything one's life was built around is gone.

By the time of his death in 1988, Romare Bearden was most widely celebrated for his large-scale public murals and collages, which were reproduced in such places as *Time* and *Esquire* to symbolize and evoke the black experience in America. As Mary Schmidt Campbell shows us in this definitive, defining, and immersive biography, the relationship between art and race was central to his life and work -- a constant, driving creative tension. Bearden started as a cartoonist during his college years, but in the later 1930s turned to painting and became part of a community of artists supported by the WPA. As his reputation grew he perfected his skills, studying the European masters and analyzing and breaking down their techniques, finding new ways of applying them to the America he knew, one in which the struggle for civil rights became all-absorbing. By the time of the March on Washington in 1963, he had begun to experiment with the Projections, as he called his major

collages, in which he tried to capture the full spectrum of the black experience, from the grind of daily life to broader visions and aspirations. Campbell's book offers a full and vibrant account of Bearden's life -- his years in Harlem (his studio was above the Apollo theater), to his travels and commissions, along with illuminating analysis of his work and artistic career. Campbell, who met Bearden in the 1970s, was among the first to compile a catalogue of his works. An *American Odyssey* goes far beyond that, offering a living portrait of an artist and the impact he made upon the world he sought both to recreate and celebrate.

From the author of the acclaimed James Brown biography *The One* comes the first in-depth biography of renowned photographer and filmmaker Robert Frank, best known for his landmark book *The Americans*. As well-known as Robert Frank the photographer is, few can say they really know Robert Frank the man. Born and raised in wartime Switzerland, Frank discovered the power and allure of photography at an early age and quickly learned that the art meant significantly more to him than the money, success, or fame. The art was all, and he intended to spend a lifetime pursuing it. *American Witness* is the first comprehensive look at the life of a man who's as mysterious and evasive as he is prolific and gifted. Leaving his rigid Switzerland for the more fluid United States in 1947, Frank found himself at the red-hot social center of bohemian New York in the '50s and '60s, becoming friends with everyone from Jack Kerouac, Allen Ginsberg, and Peter Orlovsky to photographer Walker Evans, actor Zero Mostel, painter Willem de Kooning, filmmaker Jonas Mekas, Bob Dylan, writer Rudy Wurlitzer, jazz musicians Ornette Coleman and Charles Mingus, and more. Frank roamed the country with his young family, taking roughly 27,000 photographs and collecting 83 of them into what is still his most famous work: *The Americans*. His was an America nobody had seen before, and if it was harshly criticized upon publication for its portrait of a divided country, the collection gradually grew to be recognized as a transformative American vision. And then he turned his back on certain success, giving up photography to reinvent himself as a film and video maker. Frank helped found the American independent cinema of the 1960s and made a legendary film with the Rolling Stones. Today, the nonagenarian is an embodiment of restless creativity and a symbol of what it costs to remain original in America, his life defined by never repeating himself, never being satisfied. *American Witness* is a portrait of a singular artist and the country that he saw.

Robert Frank's and Todd Webb's parallel 1955 projects to photograph America are considered in the context of mid-twentieth-century American culture. In 1955 two photographers were awarded grants from the John Simon Guggenheim Foundation to embark on trips across the United States. Robert Frank (1924-2019) drove coast to coast, photographing the highways, bars, and people that formed the basis for his widely admired publication *The Americans* (1958). Todd Webb (1905-2000) walked across the country, searching for "vanishing Americana and what is taking its place." Unaware of each other's work, the photographers produced strikingly similar images of the highway, parades, and dim, smoky barrooms. Yet while Frank's grainy, off-kilter style revealed many inequities of American life, Webb's carefully composed images embraced clear detail and celebrated the individual oddities of Americans and their locales. This revelatory book is the first to publish Webb's 1955 photographs and connects these parallel projects for the first time. More than one hundred images accompany text illuminating Frank's and Webb's different perspectives and approaches to similar subjects and places; the difference in reception of Frank's iconic work and Webb's relatively unknown series; and the place of the road trip in shaping American identity at midcentury.
