Help your pupils practise key skills with the first of three motivation pupil textbooks for Year 6.

Abacus Year 2 Workbook 1 Ginn

Abacus Evolve Challenge is perfect for ensuring more able children are being stretched to reach their full potential in maths. Challenge contains a range of enrichment and extension activities with a fourth level of differentiation above that found in other programmes.

Textbook 1 Ginn

Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we're teaching this discipline. Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre-kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society.

Abacus Evolve Year 4 Ginn

Abacus Evolve Assessment Kits provide extensive support for APP, including help with summative and formative assessment and materials for reviewing prior learning. They also provide support with National Curriculum levelling.

Abacus Year 4 Textbook 1 Ginn/Pearson Education

Help your pupils practise key skills with the third of three motivation pupil textbooks for Year 3.
