First Published in 1999. The best scholarship on the development of contemporary Japan This collection presents well over 100 scholarly articles on modern Japanese society, written by leading scholars in the field. These selections have been drawn from the most distinguished scholarly journals as well as from journals that are less well known among specialists; and the articles represent the best and most important scholarship on their particular topic. An understanding of the present through the lens of the past The field of modern Japan studies has grown steadily as Westerners have recognized the importance of Japan as a leading world economic force and an emerging regional power. The post-1945 economic success of the Japanese has, however, been achieved in the context of that nation's history, social structure, educational enterprise and political environment. It is impossible to understand the postwar economic miracle without an appreciation of these elements. Japan's economic emergence has brought about and in some cases, exacerbated already existing tensions, and these tensions have, in turn, had a significant impact on Japanese economic life. The series is designed to give readers a basic understanding of modern Japan-its institutions and its people-as we stand on the threshold of a new century, often referred to as "the Pacific Century".

During World War II. Japanese fighters, such as the famed Zero, were among the most respected and feared combat aircraft in the world. But for decades following the defeat of Japan in 1945, a variety of political and economic factors prevented Japan from developing its own modern national fighter. This changed in the 1980s. Japan began independently developing its first world-class fighter since World War II. After several years of contentious negotiations, the Japanese agreed to work with the United States to cooperatively develop a minimally modified F-16, the FS-X. The new fighter,

however, has evolved into a world-class aircraft developed largely by Japanese industry primarily due to errors committed by the U.S. side. By the fall of 1995, fifty years after the end of World War II, the Zero for the 1990s will have made its first flight, catapulting Japan into the elite ranks of nations capable of developing the most advanced weapon systems. In *Troubled Partnership*, Mark Lorell traces the evolution of the FS-X, disclosing the conflicting economic and security objectives advanced by U.S. officials, the flawed U.S. policy of technology reciprocity, and the challenges of international collaboration. Its deep intimacy with the interplay of policy and economy will make this volume of intense interest to political scientists, military studies specialists, historians, and government officials.

**Brandweek** Tuttle Publishing

This definitive guide includes exclusive discount price lists and "low prices" to help shoppers negotiate with salespeople; specifications for all body styles, horsepower ratings, and EPA fuel economy ratings; rating charts that assess each car line in 16 categories covering performance, accommodations, workmanship, and value. Over 125 photographs.

**Ward's Auto World** American Bar Association

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

**Troubled Partnership**

Churchill's description of the fall of Singapore on 15 February 1942, after Lt-Gen Percival's surrender led to over 100,000 British, Australian and Indian troops falling into the hands of the Japanese, was no wartime exaggeration. The Japanese had promised that there would be no Dunkirk in Singapore,

and its fall led to imprisonment, torture and death for thousands of allied men and women. With much new material from British, Australian, Indian and Japanese sources, Colin Smith has woven together the full and terrifying story of the fall of Singapore and its aftermath. Here, alongside cowardice and incompetence, are forgotten acts of enormous heroism; treachery yet heart-rending loyalty; Japanese compassion as well as brutality from the bravest and most capricious enemy the British ever had to face.

A muckraking expose of corporate greenwashing and of the disturbing trend toward U.N.-corporate "partnerships" that give corporations good PR without requiring them to improve their behavior. In the decade between the Rio Earth Summit in 1992 and the Johannesburg World Summit on Sustainable Development in 2002, transnational corporations have increasingly used their resources to deter regulation, suppress opposing voices, and try to buy civil society's acquiescence with slick PR. But we don't have to acquiesce, and neither should the U.N. The United Nations may not be perfect, argue Kenny Bruno and Joshua Karliner, but in its principles and structure it has the potential to counter the WTO—a potential it is squandering, say the authors. earthsummit.biz exposes the current state of corporate rhetoric vs. corporate reality and debunks the paradigm of transnational "responsibility" and self-regulation. It contains 18 corporate case studies, as well as the complete texts of the U.N.'s toothless Global Compact with corporations, and the Global Compact's civil society counterpart, the Citizens Compact on the United Nations and Corporations. *International Business*

Japan's Cultural Code Words is a study of Japanese society through the understanding of the key terms and concepts that define their attitudes and behaviors. Japan's traditional culture is still so powerful that it continues to be the prevailing force in molding and tuning the national character of the Japanese, with the result that they still have two faces—one modern and rational, the other traditional and emotional. The best and fastest way to an understanding of the traditional and emotional side of Japanese attitudes and behavior is through their "business and cultural code words"—key terms that reveal, in depth, their psychology and philosophy. In 234 essays, arranged alphabetically from "Ageashi / Tripping on Your Own Tongue" to "Zenrei / Breaking the Molds of the Past". Long term expatriate and internationally renowned expert on Japan, Boye Lafayette De Mente offers personal insights into the extremes of Japanese behavior and into the dynamics of one of the world's most fascinating societies.
