A sequel to Bauer and Dawuni's pioneering study on gender and the judiciary in Africa (Routledge, 2016), *International Courts and the African Woman Judge* examines questions on gender diversity, representative benches, and international courts by focusing on women judges from the continent of Africa. Drawing from postcolonial feminism, feminist institutionalism, feminist legal theory, and legal narratives, this book provides fresh and detailed narratives of seven women judges that challenge existing discourse on gender diversity in international courts. It answers important questions about how the politics of judicial appointments, gender, geographic location, class, and professional capital combine to shape the lives of women judges who sit on international courts and argues the need to disaggregate gender diversity with a view to understanding intra-group differences. *International Courts and the African Woman Judge* will be of interest to a variety of audiences including

governments, policy makers, civil society organizations, students of gender studies, and feminist activists interested in all questions of gender and judging. [University-Community Partnerships for Promoting Social Responsibility in Higher Education](#) Allied Publishers  
Business practices are constantly evolving in order to meet growing customer demands. Evaluating the role of logistics and supply chain management skills or applications is necessary for the success of any organization or business. As market competition becomes more aggressive, it is crucial to evaluate ways in which a business can maintain a strategic edge over competitors. *Supply Chain and Logistics Management: Concepts, Methodologies, Tools, and Applications* is a vital reference source that centers on the effective management of risk factors and the implementation of the latest supply management strategies. It also explores the field of digital supply chain optimization and business transformation. Highlighting a range of topics such as inventory management, competitive advantage, and transport management, this multi-volume book is ideally designed for business managers, supply chain managers, business professionals, academicians, researchers, and upper-level students in the field of supply chain management, operations management, logistics, and

operations research.

Leadership and Personnel Management: Concepts, Methodologies, Tools, and Applications Springer Nature

This book fills an important gap in the literature, and presents contributions from scientists and researchers working in the field of sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education. It is widely known that universities are key players in terms of the implementation and further development of sustainability, with some having the potential of acting as “living labs” in this rapidly growing field. Yet there are virtually no publications that explore the living labs concept as it relates to sustainability, and in an integrated manner. The aims of this book, which is an outcome of the “4th World Symposium on Sustainable Development at Universities” (WSSD-U-2018), held in Malaysia in 2018, are as follows: i. to document the experiences of universities from all around the world in curriculum innovation, research, activities and practical projects as they relate to sustainable development at the university level; ii. to disseminate information, ideas and experiences acquired in the execution of projects, including successful initiatives and good practice; iii. to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities; and iv. to promote the scalability of existing and future models from universities as living labs for sustainable development. The papers are innovative, cross-cutting and many reflect practice-based experiences, some of which may be replicable elsewhere. Also, this book, prepared by the Inter-

University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSD-RTC), reinforces the role played by universities as living labs for sustainable development.

Educational Access and Excellence Springer Nature

These proceedings represent the work of researchers participating in the 10th International Conference on e-Learning (ICEL 2015) which is being hosted this year by the College of the Bahamas, Nassau on the 25-26 June 2015. ICEL is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in the area of e-Learning. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of e-Learning available to them. With an initial submission of 91 abstracts, after the double blind, peer review process there are 41 academic Research papers and 2 PhD papers Research papers published in these Conference Proceedings. These papers come from some many different countries including: Australia, Belgium, Brazil, Canada, China, Germany, Greece, Hong Kong, Malaysia, Portugal, Republic of Macedonia, Romania, Slovakia, South Africa, Sweden, United Arab Emirates, UK and the USA. A selection of the best papers – those agreed by a panel of reviewers and the editor will be published in a conference edition of EJEL (the Electronic Journal of e-Learning [www.ejel.com](http://www.ejel.com)). These will be chosen for their quality of writing and relevance to

the Journal's objective of publishing papers that offer new insights or practical help into the application e-Learning.

*ICEL2015-10th International Conference on e-Learning* Emerald Group Publishing

The need for decolonizing mismanagement practices in galleries, libraries, archives, and museums, of First Nations peoples' materials and knowledge has been widely recognised. Authors from Indigenous and non-Indigenous backgrounds powerfully challenge entrenched assumptions of knowledge capture and dissemination of the western academy.

Academic Conferences and publishing limited

These proceedings represent the work of contributors to the 10th European Conference on Innovation and Entrepreneurship (ECIE 2015), hosted this year by The University of Genoa, Italy on the 17-18 September 2015. The Conference Chair is Prof Luca Beltrametti and the Programme Co-chairs are Prof Renata Paola Dameri, Prof. Roberto Garelli and Prof. Marina Resta, all from the University of Genoa. ECIE continues to develop and evolve. Now in its 10th year the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and growing area of research. The opening keynote presentation is given by Marco Doria - Mayor of Genoa on the topic of Innovation and entrepreneurship in Genoa: past, present and future. A second keynote will be given by Flavia Marzano from the National board for

innovation and Italian digital agenda on the topic of Innovation: New visions not just new technologies. The second day Keynote will be given by Roberto Santoro, President of the European Society of Concurrent Engineering Network (ESoCE Net) on the topic of People Olympics for healthy and active living: A people driven social innovation platform. In addition to the main themes of the conference there are a number of specialist mini tracks on topics including Innovation and strategy,

Entrepreneurship education in action, The theory and practice of collaboration in entrepreneurship and Challenges for entrepreneurship and innovation in the 21st Century. With an initial submission of 275 abstracts, after the double blind, peer review process there are 88 Academic research papers, 6 PhD research papers, 1 Masters Research paper, 4 work-in-progress papers and 1 Non-academic paper published in these Conference Proceedings. These papers represent research from Australia, Brazil, Bulgaria, Colombia, Croatia, Cyprus, Czech Republic, Denmark, Egypt, Finland, , France, Germany, Ghana, Greece, Hungary, India, Iran, Ireland, Israel, Italy, Japan, Kazakhstan, , Kuwait, Lithuania, Malaysia, Mexico, Netherlands, New Zealand, Nigeria, Norway, Poland, Portugal, Romania, Romania, Russia, Russian Federation, Saudi Arabia, South Africa, Spain, Sweden, Thailand, Thailand, UK and USA

**Theories of Change** IGI Global

These proceedings represent the work of contributors to the 22nd European Conference on e-Learning (ECEL 2023), hosted by University of South Africa, Pretoria, South Africa on 26-27 October 2023. The Conference Co-Chairs Associate Professor Sarah Jane Johnston and Associate Professor Shawren Singh

both from University of South Africa, Pretoria, South Africa. ECEL is now a well-established event on the academic research calendar and now in its 22nd year the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research. It is especially relevant that the conference is being hosted by UNISA this year as the university celebrates its 150th anniversary. UNISA has been a pioneer in first distance and now e-Learning. The conference will also host the final round of the 9th e-Learning Excellence Awards where innovate case histories will be presented. The opening keynote presentation is given by Professor Thenjiwe Meyiwa, Vice Principal for the Research, Postgraduate Studies, Innovation and Commercialisation at University of South Africa who will speak on, "The Role of African Feminisms in Shaping a Sustainable Future of Being and Learning". An afternoon keynote on Thursday will be made by Dr Zolile Martin Mguda, University of South Africa on the topic of "ChatGPT: The first year". The second day of the conference will open with an address by Dr Isabel Tarling, MD, Limina, South Africa with the title "Developing Digital Standards for Learning and Teaching in South Africa's Schools". With an initial submission of 100 abstracts, after the double blind, peer review process there are 45 Academic research papers, 3 PhD research papers and 1 Masters Research paper published in these Conference Proceedings. These papers represent research from Belgium, Canada, Chile, Czech Republic, France, Germany,

Ghana, Greece, Hong Kong, Ireland, Japan, Malaysia, Mozambique, Norway, Oman, Perú, Poland, Portugal, Romania, Singapore, South Africa, Sri Lanka, Sweden, Switzerland, Turkey and the United Kingdom.

The Internet and the Emerging Importance of New Forms of Intellectual Property Academic Conferences and publishing limited

As technology advances, so must our education system. Cloud computing serves as an ideal method for e-learning thanks to its flexibility, affordability, and availability. Cloud-based learning is especially dynamic in STEM education, as it can significantly lower the cost of building cumbersome computer labs while fostering engaged learning and collaboration among students. The Handbook of Research on Cloud-Based STEM Education for Improved Learning Outcomes prepares current and future instructors for exciting breakthroughs in STEM education driven by the advancement of cloud technologies. From virtual lab and app construction, to information sharing and course material distribution, this volume touches on a variety of topics related to the benefits and challenges of adopting cloud technologies in the classroom. This book is an invaluable reference for educators, technology professionals, administrators, and education students who wish to become leaders in their fields.

ECMLG 2019 15th European Conference on Management, Leadership and Governance Emerald Group Publishing

This book is a printed edition of the Special Issue "Sustainable Business Models" that was published in Sustainability

**ECEL2015-14th European Conference on e-Learning**, MDPI

This book provides a comprehensive

overview of the latest developments and materials used in electrochemical energy storage and conversion devices, including lithium-ion batteries, sodium-ion batteries, zinc-ion batteries, supercapacitors and conversion materials for solar and fuel cells. Chapters introduce the technologies behind each material, in addition to the fundamental principles of the devices, and their wider impact and contribution to the field. This book will be an ideal reference for researchers and individuals working in industries based on energy storage and conversion technologies across physics, chemistry and engineering. FEATURES Edited by established authorities, with chapter contributions from subject-area specialists Provides a comprehensive review of the field Up to date with the latest developments and research

Editors Dr. Mesfin A. Kebede obtained his PhD in Metallurgical Engineering from Inha University, South Korea. He is now a principal research scientist at Energy Centre of Council for Scientific and Industrial Research (CSIR), South Africa. He was previously an assistant professor in the Department of Applied Physics and Materials Science at Hawassa University, Ethiopia. His extensive research experience covers the use of electrode materials for energy storage and energy conversion. Prof. Fabian I. Ezema is a professor at the University of Nigeria, Nsukka. He obtained his PhD in Physics and Astronomy from University of Nigeria, Nsukka. His research focuses on several areas of materials science with an emphasis on energy applications, specifically electrode materials for energy conversion and storage.

*Supply Chain and Logistics Management: Concepts, Methodologies, Tools, and*

*Applications* Bloomsbury Publishing This volume of essays is a reflection on social memory as a force for social and economic transformation. Written by scholars and organic intellectuals, it focuses on the uses of social memory, in particular the conflict between the legacies of colonialism and the movement for fundamental change. The content addresses both experts and ordinary citizens alike, with a view to advancing discourse on where we are right now, and how we move on from here to achieve meaningful transformation. As scholars and public representatives with a deep understanding of the social, economic and political dynamics of modern history of South Africa, the contributors offer their unique perspectives and reflections on history, politics, economics, culture, education, ethics and the arts, as well as the links that bind these aspects into an ecology of ideas and attitudes.

Finweek Taylor & Francis

The term 'intellectual property' has come to include numerous intangible rights beyond the traditional 'Big Three' (patent, trademark and copyright) - rights that force us to reconsider and maybe also change the object and purpose of intellectual property (IP). Not only do these rights generally have less solid normative footing and few if any well understood inherent limits, but the borders of their misappropriation are hard to draw. This groundbreaking book scrutinizes the existence of commonalities in this realm, and poses the question of what risks and advantages accrue to such IP or 'IP-like' rights. Sixteen distinguished contributors offer in-depth analyses of such rights as the following: - trade secrets; - image and publicity rights; - geographical indications; - traditional knowledge; -

protection of databases; and - sports rights and ambush marketing. Recommendations and solutions investigated include the use of specialized courts or judges and of private standards. There are also thoughtful considerations of practices such as forum-shifting and an analysis of the special value of evolving Chinese law as a 'norm laboratory'. Two chapters discuss the complexities of enforcement. Enforcement impacts substantive intellectual property and can be said to be its own 'form' of IP. Practitioners, judges, academics, and policymakers will all welcome this work and value it highly. Its contributors collectively take a giant step toward clarifying and synthesizing one of the most baffling areas of current law both internationally and at national level around the globe.

#### 22nd European Conference on e-Learning Routledge

Open access publishing can be used as a strategic tool to avail access to information and achieve universal literacy. Open access has gained importance over the past 15 years by making knowledge available to all, without any barrier of affordability or restrictions on using this knowledge to inform and develop. Open access contributes to scientific research excellence, disseminates research results to a wider community, and promotes multi-disciplinary and collaborative research. Issues of sustainable development and open access are major concerns in librarianship and information management, particularly as the international library and information management community is focusing on how to contribute to the Sustainable Development Goals. Open Access Implications for Sustainable Social,

Political, and Economic Development is a pivotal reference source that provides an understanding of the concept of open access within the context of social, political, and economic development and deliberates the critical issues and challenges that face the implementation of open access and its impact on the global economy and sustainable development. While highlighting a broad range of topics including digital scholarship, open data, and ethics, this book is ideally designed for librarians, information science professionals, government officials, policymakers, academicians, researchers, and students.

#### Sustainable Business Models Springer

Innovation is the key to maintain competitive advantage. Innovation in products, processes, and business models help companies to provide economic value to their customers. Identifying the innovative ideas, implementing those ideas, and absorbing them in the market requires investing many resources that could incur large costs. Technology encourages companies to foster innovation to remain competitive in the marketplace. Emerging Technologies for Innovation Management in the Software Industry serves as a resource for technology absorption in companies supporting innovation. It highlights the role of technology to assist software companies—especially small start-ups—to innovate their products, processes, and business models. This book provides the necessary guidelines of which tools to use and under what situations. Covering topics such as risk management, prioritization approaches, and digitally-enabled innovation processes, this premier reference source is an ideal resource for entrepreneurs,

software developers, software managers, business leaders, engineers, students and faculty of higher education, researchers, and academicians.

International Courts and the African Woman Judge Springer Nature

This book gathers interdisciplinary reflections from researchers, educators, and other experts on the subject of biodiversity closer to education and learning. The book also highlights its role as an added value to strategic principles for healthy ecosystems and sustainable human development. It promotes critical thinking and foster practices and attitudes for Education for Sustainable Development reconciling education with principles of human behaviour and nature. Readers especially find this book a timely resource in light of the Strategic Plan for Biodiversity 2011–2020, the Aichi Targets, and the new EU biodiversity strategy “Our life insurance, our natural capital: an EU biodiversity strategy to 2020”. Along with the challenge of ecosystems and public health, biodiversity conservation is essential for humanity’s continued security and sustainability, as it touches on all aspects of people’s lives.

**Social Memory as a Force for Social and Economic Transformation**

Academic Conferences and publishing limited

The world of education has undergone major changes within the last year that have pushed online instruction to the forefront of learning. Thanks to the COVID-19 pandemic, online learning has become paramount to the continued and uninterrupted teaching of students and has forced students and teachers alike to adjust to an online learning environment. Though some have already returned to the traditional classroom, or plan to very soon, others have begun to

appreciate the value of online education – initiatives that had previously been discussed but never acted upon as they have been in the past year. With plenty of positive and negative aspects, online learning is a complex issue with numerous factors to consider. It is an issue that must be studied and examined in order to improve in the future. Curriculum Development and Online Instruction for the 21st Century examines the issues and difficulties of online teaching and learning, as well as potential solutions and best practices. This book includes an examination on the value of teaching fully via the internet as well as the challenges inherent in the training of teachers to teach in online environments. While addressing key elements of remote learning, such as keeping student data safe, as well as methods in which to engage students, this book covers topics that include assessment tools, teaching deaf students, web technology, and standardized curricula. Ideal for K-12 teachers, college faculty, curriculum developers, instructional designers, educational software developers, administrators, academicians, researchers, and students, this book provides a thorough overview of online education and the benefits and issues that accompany it.

ECSM 2017 4th European Conference on Social Media Academic Conferences and publishing limited

The sudden implementation of emergency health procedures at the start of the COVID-19 pandemic forced many educators and educational institutions to explore new territory in terms of policy, teaching strategy, and more. Now that many institutions are familiar with online education, innovations have been developed and

implemented. It is essential to study these best practices and innovations that have been developed in remote teaching and learning to better understand the future of online education. The Research Anthology on Remote Teaching and Learning and the Future of Online Education explores the recent developments, strategies, and innovations in remote teaching and learning that have been implemented globally. Covering topics such as emergency remote teaching, psychosocial well-being, and cross-cultural communication, this major reference work is an indispensable resource for educators and administrators of both K-12 and higher education, pre-service teachers, teacher educators, librarians, government officials, IT managers, researchers, and academicians.

**Global Development of the Community College Model** Academic Conferences and publishing limited This volume provides educators with a global understanding of the successes and challenges associated with facilitating inclusive campuses in higher education amidst the growing diversity of students by providing evidence-based strategies and ideas for implementing equity and inclusion at higher education institutions around the world.

*Strategies for Facilitating Inclusive Campuses in Higher Education* Springer This book provides original insight into the way we now engage and remember national history. Drawing on fieldwork and analysis of international case studies on state commemoration, memorialization, recreational and tourism and times of disaster and crisis, the author demonstrates that not only does the nation frequently retain a strong cultural relevance in our global

world but that the emergence of new forms of ritual and remembrance means that in many instances we are seeing the re-enchantment of nationalism. Drawing upon and developing an empirically informed cultural sociology, the author charts the distinctive qualities of these new national rites and how they feed into and advance particular cosmopolitan and orthodox national politics. Because social science has so often wrongly assumed the end of nationalism, the insights of this of the book about the possibilities and limitations of contemporary nationalism demand serious consideration by academics and also by policy makers and the general public.

**Biodiversity and Education for Sustainable Development** Academic Conferences and publishing limited The Association of Southeast Asian Institutions of Higher Learning (ASAIHL) has been playing an important role in educational development to promote innovative teaching, research and cooperation among institutions of higher learning. Build Bright University (BBU), Cambodia had organized the 2015 ASAIHL International Conference during 2-4 December at Siem Reap. The main theme of the conference was "Educational Access and Excellence". The conference covered three sub-themes, namely, (i) cross-border higher education in global context, (ii) excellence in education through provision of technology, effective teaching and research, and (iii) student learning outcomes. Delegates from France, UK, Japan, Singapore, Hong Kong, India, Thailand, Malaysia, Philippines, Vietnam, Taiwan, East Timor, Cambodia and others had participated in the conference.
