 The City & Guilds Textbook: Bricklaying for the Level 1 Diploma (6705) Hodder Education

Factory and Industrial Management Hodder Education

Brickwork is a form of masonry that utilises bricks and mortar. Rows of bricks—or, 'courses'—are placed on top of each other in order to create a structure such as a wall. This is volume I of William Frost's "The Modern Bricklayer", a detailed guide to all aspects of bricklaying, including slating, tiling, planning, materials, tools, and more. Contents include: "House Drains", "Egg-Shaped and Circular Sewers", "Sand Courses", "Retaining Walls", "Reinforced Brickwork", "Arches", "Cornices", "Gauged Brickwork: Introduction", "Gauged Work—Various Forms of Arches", "Gauges Work—Arches", "Gauged Work: Nitches, Panels, and Mouldings", "Terra-cotta and Glazed Ware", etc. Many vintage books such as this are becoming increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in a modern, high-quality edition complete with a specially-commissioned new introduction on DIY.

This book introduces students of education to the elements of educational psychology. It also relates as closely as possible the findings of research to classroom practice. In order to make clear the fundamental processes involved in psychological development, the book starts with a study of the way in which the young child adapts its behaviour to its environment. This study considers some of the key aspects of physical development, mainly the central nervous system. At the same time the way physical growth and psychological development are influenced by the experience of the individual is also discussed. This discussion of development is followed by an examination of the processes of learning, with particular attention paid to the works of Piaget. The salient points of each chapter are brought together in a summary which may be used by the reader to obtain a preliminary overview of the content of the chapter, and as an aid to revision.
