Land
settlement
schemes,
sponsored by

national governments and businesses, such as the Ford Corporation and the Hudson's Bay Company, took place in locations as diverse as the Canadian Prairies, the Dutch polders, and the Amazonian rainforests. This novel contribution evaluates a diverse range of these initiatives. By 1900, any land that remained available for agricultural settlement was often far

from the settlers' homes and located in challenging physical environments. Over the course of the twentieth century, governments, corporations and frequently desperate individuals sought out new places to settle across the globe from Alberta to Papua New Guinea. This book offers vivid reports of the difficulties faced by many of these settlers, including the experiences of

East European Jewish refugees, New Zealand soldier settlers and urban families from Yorkshire. This book considers how and why these settlement schemes succeeded, found other pathways to sustainability or succumbed to failure and even oblivion. In doing so, the book indicates pathways for the achievement of more economically, socially and environmentally sustainable forms of

human settlement in marginal areas. This engaging collection will be of interest to individuals in the fields of historical geography, environmental history and development studies.

Labour Immigration in Southern Europe AYA Editora

Originally published in 1994, this book analysed land developments, deforestation and pasture substitution, colonisation schemes and spontaneous

settlement during the latter part of the 20th Century. In so doing, *The Forest Frontier* presents an overview of the intrinsic environmental and socio-economic resources of the Roraima, the most northerly of the Brazilian Amazon states.

Roraima is of special environmental interest because of its extensive savannas and varied forests - the home of some of the largest and most diverse

groups of indigenous Indians. This critical assessment of the nature and pace of agricultural advance into Roraima examines the range of strategies which have been proposed to cope with the inevitable development. With the conflict between preserving the natural environment and development still major issues for Brazil, this book remains as relevant

now as when it was first published. *Novos Territórios para a Gestão Educacional* Routledge Dialogues in Urban and Regional Planning 5 is a selection of some of the best scholarship in urban and regional planning from around the world. The internationally recognized authors of these award-winning papers take up a range of salient issues from the theory and practice of planning. The topics they address include the effects of globalization on world cities, metropolitan planning in France and Australia, and new research in pedestrian and traffic design. The breadth of the topics covered in this book will appeal to all those with an interest in urban and regional planning, providing a springboard for further debate and research. The papers focus particularly on themes of inclusion, urban transformation, metropolitan planning, and urban design. The Dialogues in Urban and Regional Planning (DURP) book series is published in association with the Global Planning Education Association Network (GPEAN) and its member national and transnational planning schools associations. *Geografia, Turismo e Território* Editora

Oriente próximo, passando pelos persas, das cidades-estado gregas ao vasto mundo helenístico, e a contribuição de Roma - com elementos 'internacionais' desde as origens, até sua expansão como império mundial - com breves notas sobre a Índia e a China antigas. O direito internacional é um aporte civilizacional, para modelar a convivência pacífica entre coletividades humanas. A	celebração de tratados, vínculos de comércio e intercâmbio cultural, enviar e receber representante s diplomáticos, o asilo e mesmo normas sobre a guerra estão presentes desde essas civilizações - e são elementos vitais do direito internacional até hoje. Essa perspectiva ampla é fundamental para evitar distorção frequente da verdade e da história - reducionista	do tempo histórico e da diversidade cultural, por enxergar um sistema internacional somente a partir de 1648. but also historians and social scientists new insights gained from the intensive research carried out over the last decades on the linguistic reality of this vast territory. In the 20 overview chapters, internationally renowned experts give detailed yet concise information on a wide range of language-internal as well as external synchronic and diachronic topics. Most of this

information is the fruit of large-scale language documentation and description projects, such as the project on the linguistic norm of educated speakers (NURC), the project “Grammar of spoken Portuguese”, and the project “Towards a History of Brazilian Portuguese” (PHPB), among others. Further chapters of high contemporary interest and relevance

include the study of linguistic policies and psycholinguistics. The manual offers theoretical insights of general interest, not least since many chapters present the linguistic data in the light of a combination of formal, functional, generative and sociolinguistic approaches. This rather unique feature of the volume is achieved by the double authorship of some of the relevant

chapters, thus bringing together and synthesizing different perspectives. *25 anos de indicação geográfica no Brasil, vol. 2: tipologia dos territórios georreferencia dos e produção tradicional* Editora Dialética Esta coletânea apresenta a síntese da vida profissional e acadêmica de Ana Clara Torres Ribeiro, por ela mesma organizada e apresentada para o concurso de Professor Titular da Universidade Federal do Rio de Janeiro, em novembro de 2011. Composta de 5 volumes, a coletânea inicia-se com a íntegra do Memorial e da Conferência os quais contextualiza m e guiam magistralment e o leitor por um passeio por sua profícua trajetória acadêmica. São 68 artigos, produzidos e publicados em revistas e livros ao longo de cinco décadas, organizados na sequência lógica e coerente de citação de seu memorial. *Manual of Brazilian Portuguese Linguistics* Almedina Brasil Neste segundo volume da obra, cataloga-se todas as experiências brasileiras, entre os anos de 1996 até 2015, e por meio de estudo comparativo, das diversas experiências realizadas nos territórios reconhecidos com uma IG,

<p>constrói-se uma tipologia que identifique a relação entre IG e renda de monopólio. A complexidade deve-se aos diferentes tipos de produtos agroalimentares ou não e, no Brasil, até serviço, mas, sobretudo, por também tratar sobre renda de monopólio, um tema áspero e que requer um pouco de conhecimento econômico, para entender como se formam os preços e outros conceitos de</p>	<p>renda de monopólio. Demonstra-se como a aprovação depende de fatores diversos, como apoio de parceiros institucionais, organização socioproductiva, que legitima a técnica — o saber-fazer, com sua riqueza histórica e simbólica; depende também da capacidade de articulação político-territorial dos produtores, de explorar as potencialidades locais, consolidar sistemas de</p>	<p>produção/atividade e sistemas agrários, além de valorizar produtos territoriais georreferenciados. O estudo comparativo e a tipologia apoiam-se em dados secundários, principalmente do INPI, e informações primárias, coletadas com os representantes de instituições que lideram pedidos de registro. <u>Uso do território e comércio transfronteiriço</u> Imprensa da Universidade</p>

such an important sector of the economy that it is no longer possible to let it develop freely: it is the source of new forms of social deprivation; it generates residential economies that are particularly sensitive to the economic cycle; it often impairs beautiful landscapes and increases human pressure on natural environments. As a result, it is one of the major physical planning stakes of

This title was first published in 2003. Research on migration into southern Europe has paid little consideration to the ways of incorporating immigrants into labour markets and the impact these foreign-born workers

have on local labour markets. Neither has much attention been given to the character of labour markets that enables these workers to find a job. This book fills that gap by exploring case studies of African employment in Spain and Portugal. Using cross-border perspectives, this book provides in-depth analysis of common trends across borders, such as immigrant employment

in manual, low-skilled jobs, uneven immigrant involvement in labour markets, and the impact of national characteristics, economies and political environments. The result is a study which should be useful for migration specialists, economic geographers and labour market analysts alike. *Beyond Molotovs - A Visual Handbook of Anti-Authoritarian Strategies* Brazil

Publishing Dialogues in Urban and Regional Planning offers a new selection of the best urban planning scholarship from each of the world's planning school associations. The award winning papers presented illustrate the concerns and the discourse of planning scholarship communities and provide a glimpse into planning theory and practice by planning academics

around the world. All those with an interest in urban and regional planning will find this collection valuable in opening new avenues for research and debate. This book is published in association with the Global Planning Education Association Network (GPEAN), and the nine planning school associations it represents, who have selected these papers based

on regional competitions. *Geografia do Crime: Estudo de Caso em Boa Vista (RR)* Elsevier Health Sciences
 This text explores the processes which have led to an increase in local economic initiatives and policies supporting local-level development over the last decade. Through a critical analysis of past conceptualizations of local government, a theoretical

approach is elaborated which interrelates local agency, locality and restructuring issues. The approach is developed in a Southern European context, with specific reference to Portugal. Analysis of the growth of local economic activity in Portugal and in-depth examination of two distinctive localities, permits the identification of both potentialities and constraints for

local economic policy. The book concludes by arguing for a wider conception of local development; one which is not narrowly focused on economic factors. Despite foreign policy efforts and attempts to combat supply

This volume argues that the war on drugs has been ineffective at best and, at worst, has been highly detrimental to many countries. Leading experts in the fields of public health, political science, and national security analyze how

U.S. policies have affected the internal dynamics of Mexico, Colombia, Bolivia, Peru, Brazil, Argentina, Central America, and the Caribbean islands. Routledge Esta publicação é fruto da pesquisa de doutorado que analisa a possibilidade de construção de uma política pública educacional na Área Metropolitana de Brasília, uma região ainda em construção. No Brasil e no mundo, são realizadas pesquisas sobre a regionalização da educação. O Conselho Nacional de Educação brasileiro emitiu a

Resolução N° 01/2012 com o objetivo de implementar Arranjos de Desenvolvimento da Educação ADE, que são novos territórios colaborativos e horizontais de implementação de sistemas educacionais. Esses territórios devem ser coordenados pelos entes da federação e podem garantir a governança desse serviço. A Região Integrada de Desenvolvimento do Distrito Federal e

Entorno RIDE DF/Entorno indica quais municípios de Goiás e Minas Gerais podem compor essa nova territorialidade e de gestão educacional. O desenho e arranjo de estruturas organizacionais e políticas que garantam a existência dessa nova territorialidade e levam em conta a presença de novos e múltiplos atores governamentais e não governamentais, com seus interesses específicos. A

RIDE DF/Entorno definiu a educação como uma Função Pública de Interesse Comum FPIC. Assim, deve ser gestada coletivamente entre a Capital Federal e os municípios específicos dos dois estados. Porém, pouco se fez para desenvolver políticas públicas educacionais metropolitanas nessa região. Esta obra busca o porquê e as possibilidades de reversão deste cenário	de desigualdades provocadas pela dificuldade de acesso à educação. <u>Piracy and Intellectual Property in Latin America</u> Letra Capital Editora LTDA This book presents the history and theoretical contributions of Brazilian geography since the late twentieth century and shows how this sphere of knowledge has been organically integrated with social and territorial issues and	with social movements. The relationship between the subjects and objects of research in Brazilian geography has been centred on the understanding and transformation of realities marked by injustice and inequality. Against this backdrop, the geography of the country has developed by integrating, relating to, and forming part of those realities as it headed out into the streets.

Brazilian geography continues to hold theoretical debate in high regard as a result of the

influence of critical theory. This book thus covers the theoretical approaches in Brazilian

geography, its different lines of research, and above all its character as manifested in culture and society.
