CASTANEDA REILLY

The Right Choice UCL Press

On the first day, a mist descended from the heavens blanketing Earth. On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began... There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

The number of Android devices running on Intel processors has increased since Intel and Google announced, in late 2011, that they would be working together to optimize future versions of Android for Intel Atom processors. Today, Intel processors can be found in Android smartphones and tablets made by some of the top manufacturers of Android devices, such as Samsung, Lenovo, and Asus. The increase in Android devices featuring Intel processors has created a demand for Android applications optimized for Intel Architecture: Android Application Development for the Intel® Platform is the perfect introduction for software engineers and mobile app developers. Through well-designed app samples, code samples and case studies, the book teaches Android application development based on the Intel platform—including for smartphones, tablets, and embedded devices—covering performance tuning, debugging and optimization. This book is jointly developed for individual learning by Intel Software College and China Shanghai JiaoTong University.

Digital Minimalism John Wiley & Sons

Zimbabwean social media has been awash with images of a woman character, spirit, or concept called Chihera. Traditionally, a woman descending from the Mhofu (Eland) lineage/totem is known as Chihera. In the cumulative tradition of the Shona (a Zimbabwean ethnic group), Chihera is a fiercely independent, assertive, free spirited, and no nonsense woman. This volume seeks to deepen reflections on the Chihera phenomenon in the context of the search for gender justice in Zimbabwe and Africa. The authors reflect on how this radical indigenous feminist ethic circulating on social media can animate the quest for Zimbabwean and African women's full liberation from patriarchy and all oppressive forces. They grapple with the issue of generating culturally sensitive theories and approaches to galvanize the struggle for African women's liberation in post-colonial settings. Second, they locate the Chihera mystique in the context of the practical struggle for women's empowerment. Third, the volume illustrates how the Chihera phenomenon could be utilized for gender justice in Zimbabwe and beyond.

Handbook of Children and Youth Studies Grand Central Publishing

Arron Crascall is one of the UK's leading social media stars. Millions watch his videos online and he's guaranteed to bring a little bit of hilarity into your day. This book is his take on the world. The things that are important to Arron. The good, the bad and the stupid (there's a lot of this third one). You'll find stories about his past, a lot of views on the present and some opinions on how to make the future a more enjoyable place. It's part biography, part self-help book, part text book, part travel book (well, Dover at least), you'll find comedy, crime, drama, romance, and you'll even learn a thing or two about astro-physics (he's not even joking). In fact, he's putting so much into this book, you won't just see it in every bookshop in the country, you'll see it on every shelf in every bookshop in the country. Welcome to the world according to Arron Crascall. SEE YA LATER!

Complex Adaptive Leadership Hachette UK

From the upheavals of recent national elections to the success of the #MyDressMyChoice feminist movement, digital platforms have already had a dramatic impact on political life in Kenya – one of the most electronically advanced countries in Africa. While the impact of the Digital Age on Western politics has been extensively debated, there is still little appreciation of how it has been felt in developing countries such as Kenya, where Twitter, Facebook, WhatsApp and other online platforms are increasingly a part of everyday life. Written by a respected Kenyan activist and researcher at the forefront of political online struggles, this book presents a unique contribution to the debate on digital democracy. For traditionally marginalised groups, particularly women and people with disabilities, digital spaces have allowed

Kenians to build new communities which transcend old ethnic and gender divisions. But the picture is far from wholly positive. Digital Democracy, Analogue Politics explores the drastic efforts being made by elites to contain online activism, as well as how 'fake news', a failed digital vote-counting system and the incumbent president's recruitment of Cambridge Analytica contributed to tensions around the 2017 elections. Reframing digital democracy from the African perspective, Nyabola's groundbreaking work opens up new ways of understanding our current global online era.

Out of My Comfort Zone John Wiley & Sons

This book presents an ethnographic study of social media in Mardin, a medium-sized town located in the Kurdish region of Turkey. The town is inhabited mainly by Sunni Muslim Arabs and Kurds, and has been transformed in recent years by urbanisation, Elisabetta Costa uses her 15 months of ethnographic research to explain why public-facing social media is more conservative than offline life. Yet, at the same time, social media has opened up unprecedented possibilities for private communications between genders and in relationships among young people – Costa reveals new worlds of intimacy, love and romance. She also discovers that, when viewed from the perspective of people's everyday lives, political participation on social media looks very different to how it is portrayed in studies of political postings separated from their original context, and highly socialised, context, neoliberalism and political events.

Backstage Leadership W. W. Norton & Company

This book constitutes the refereed proceedings of the 5th International Symposium on Security in Computing and Communications, SSCC 2017, held in Manipal, India, in September 2017. The 21 revised full papers presented together with 13 short papers were carefully reviewed and selected from 84 submissions. The papers focus on topics such as cryptosystems, algorithms, primitives; security and privacy in networked systems; system and network security; steganography, visual cryptography, image forensics; applications security.

'Breath-takingly beautiful' i 'Tender and wholehearted' Helen Jukes
 LONGLISTED FOR THE WAINWRIGHT PRIZE A BEST BOOK OF THE YEAR IN FINANCIAL TIMES AND I When she suddenly finds herself uprooted, heartbroken, grieving and living out of a suitcase in her late twenties, Alice Vincent begins planting seeds. She nurtures pot plants and vines on windowsills and draining boards, filling her many temporary London homes with green. As the months pass, and with each unfurling petal and budding leaf, she begins to come back to life. Mixing memoir, botanical history and biography, Rootbound examines how bringing a little bit of the outside in can help us find our feet in a world spinning far too fast.

In recent years, smartphones and digital platforms have become essential to our lives and are now inextricably interwoven into the everyday practices of millions, especially young people. Focusing on smartphone practices and experiences of youth today, this volume is the result of empirical research based on focus groups and in-depth interviews with young people aged 18-30. Grounded in media theory and analyzed through a blended lens of media and science and technology studies, the book offers detailed and fascinating insights into the everyday use of smartphones. Topics covered include the role of the smartphone as material technology, its use in interpersonal relationships, photographic practices, music and consumer practices, along with the deconstruction of the notion of smartphone 'addiction'.

Piece Of Cake

UCL Press
Addressing the security solutions for LTE, a cellular technology from Third Generation Partnership Project (3GPP), this book shows how LTE security substantially extends GSM and 3G security. It also encompasses the architectural aspects, known as SAE, to give a comprehensive resource on the topic. Although the security for SAE/LTE evolved from the security for GSM and 3G, due to different architectural and business requirements of fourth generation systems the SAE/LTE security architecture is substantially different from its predecessors. This book presents in detail the security mechanisms employed to meet these requirements. Whilst the industry standards inform how to implement systems, they do not provide readers with the underlying principles behind security specifications. LTE Security fills this gap by providing first hand information from 3GPP insiders who explain the rationale for design decisions. Key features: Provides a concise guide to the 3GPP/LTE Security Standardization specifications Authors are leading experts who participated in decisively shaping SAE/LTE security in the relevant standardization body, 3GPP Shows how GSM and 3G security was enhanced and extended to meet the requirements of fourth generation systems Gives the rationale behind the standards specifications enabling readers to have a broader understanding of the context of these specifications Explains why LTE security solutions are designed as they are and how theoretical security mechanisms can be put to practical use

The Art of Strategy: A Game Theorist's Guide to Success in Business and Life

John Wiley & Sons
" How globalized information networks can be used for strategic advantage Until recently, globalization was viewed, on balance, as an inherently good thing that would benefit people and societies nearly everywhere. Now there is growing concern that some countries will use their position in globalized networks to gain undue influence over other societies through their dominance of information and financial networks, a concept known as "weaponized interdependence." In exploring the conditions under which China, Russia, and the United States might be expected to weaponize control of information and manipulate the global economy, the contributors to this volume challenge scholars and practitioners to think differently about foreign economic policy, national security, and statecraft for the twenty-first century. The book addresses such questions as: What areas of the global economy are most vulnerable to unilateral control of information and financial networks? How sustainable is the use of weaponized interdependence? What are the possible responses from targeted actors? And how sustainable is the open global economy if weaponized interdependence becomes a default tool for managing international relations? "

Security in Computing and Communications Hachette UK
Should money be the primary factor in picking a job? When do I pursue an MBA or a second MBA? Should I switch industries to move ahead? The Right Choice delves deep into the ten frequently faced dilemmas in a person's career, such as the ones listed above. The author shares his wisdom and experiences from his illustrious career as one of India Inc's longest-serving CEOs. In his trademark straightforward and lucid style, he shares lessons and learnings on each of the ten dilemmas. The book also contains insights and perspectives from twenty-four highly experienced professionals. A successful career is not a straight line; it has many twists and turns where you are faced with difficult choices. Practical and inspiring, The Right Choice will help you navigate these difficult situations and win in your career.

"You have to bear in mind that [Questlove] is one of the smartest motherf*****s on the planet. His musical knowledge, for all practical purposes, is limitless." --Robert Christgau
A punch-drunk memoir in which Everyone's Favorite Questlove tells his own story while tackling some of the lates, the greats, the fakes, the philosophers, the heavyweights, and the true originals of the music world. He digs deep into the album cuts of his life and unearths some pivotal moments in black art, hip hop, and pop culture. Ahmir "Questlove" Thompson is many things: virtuoso drummer, producer, arranger, Late Night with Jimmy Fallon bandleader, DJ, composer, and tireless Tweeter. He is one of our most ubiquitous cultural tastemakers, and in this, his first book, he reveals his own formative experiences--from growing up in 1970s West Philly as the son of a 1950s doo-wop singer, to finding his own way through the music world and ultimately co-founding and rising up with the Roots, a.k.a., the last hip hop band on Earth. Mo' Meta Blues also has some (many) random (or not) musings about the state of hip hop, the state of music criticism, the state of statements, as well as a plethora of run-ins with celebrities, idols, and fellow artists, from Stevie Wonder to KISS to D'Angelo to Jay-Z to Dave Chappelle to...you ever seen Prince roller-skate?!? But Mo' Meta Blues isn't just a memoir. It's a dialogue about the nature of memory and the idea of a post-modern black man saddled with some post-modern blues. It's a book that questions what a book like Mo' Meta Blues really is. It's the side wind of a one-of-a-kind mind. It's a rare gift that gives as well as takes. It's a record that keeps going around and around.

Thinking Strategically: The Competitive Edge in Business, Politics, and Everyday Life

Penguin UK
A comprehensive collection of influential articles from one of IEEE Computer magazine's most popular columns This book is a compendium of extended and revised publications that have appeared in the "Software Technologies" column of IEEE Computer magazine, which covers key topics in software engineering such as software development, software correctness and related techniques, cloud computing, self-managing software and self-aware systems. Emerging properties of software technology are also discussed in this book, which will help refine the developing framework for creating the next generation of software technologies and help readers predict future developments and challenges in the field. Software Technology provides guidance on the challenges of developing software today and points readers to where the best advances are being made. Filled with one insightful article after another, the book serves to inform the conversation about the next wave of software technology advances and applications. In addition, the book: Introduces the software landscape and challenges associated with emerging technologies Covers the life cycle of software products, including concepts, requirements, development, testing, verification, evolution, and security Contains rewritten and updated articles by leaders in the software industry Covers both theoretical and practical topics Informative and thought-provoking throughout, Software Technology is a valuable book for everyone in the software engineering community that will inspire as much as it will teach all who flip through its pages.

Dead Astronauts

UCL Press
Since its publication, Complex Adaptive Leadership has become a Gower bestseller that has been taught in corporate leadership programmes, business schools and universities around the world to high acclaim. In this updated paperback edition, Nick Obolensky argues that leadership should not be something only exercised by nominated leaders. It is a complex dynamic process involving all those engaged in a particular enterprise. The theoretical background to this lies in complexity science and

chaos theory - spoken and written about in the context of leadership for the last 20 years, but still little understood. We all seem intuitively to know leadership 'isn't what it used to be' but we still cling to old assumptions which look anachronistic in changing and challenging times. Nick Obolensky has practised, researched and taught leadership in the public, private and voluntary sectors. In this exciting book he brings together his knowledge of theory, his own experience, and the results of 19 years of research involving 2,500 executives in 40 countries around the world. The main conclusion from that research is that the more complex things become, the less traditional directive leadership is needed. Those operating in the real world, nonetheless, need ways of coping. The book is focused on helping practitioners struggling to interpret and react to increasingly VUCA (Volatile, Uncertain, Complex, Ambiguous) times. The book will particularly appeal to practitioners wishing to improve their leadership effectiveness as well as for students and researchers in the field of leadership.

Digital Democracy, Analogue Politics

Routledge
The book contains several new concepts, techniques, applications and case studies for cyber securities in parallel and distributed computing The main objective of this book is to explore the concept of cybersecurity in parallel and distributed computing along with recent research developments in the field. Also included are various real-time/offline applications and case studies in the fields of engineering and computer science and the modern tools and technologies used. Information concerning various topics relating to cybersecurity technologies is organized within the sixteen chapters of this book. Some of the important topics covered include: Research and solutions for the problem of hidden image detection Security aspects of data mining and possible solution techniques A comparative analysis of various methods used in e-commerce security and how to perform secure payment transactions in an efficient manner Blockchain technology and how it is crucial to the security industry Security for the Internet of Things Security issues and challenges in distributed computing security such as heterogeneous computing, cloud computing, fog computing, etc. Demonstrates the administration task issue in unified cloud situations as a multi-target enhancement issue in light of security Explores the concepts of cybercrime and cybersecurity and presents the statistical impact it is having on organizations Security policies and mechanisms, various categories of attacks (e.g., denial-of-service), global security architecture, along with distribution of security mechanisms Security issues in the healthcare sector with existing solutions and emerging threats.

Working Effectively with Legacy Code

Springer
When it comes to delivering product design innovations to mobile device users, Nokia is the yardstick by which all others are judged. Now the process and working methods that have enabled Nokia to revolutionize usability are fully explained for the first time in this beautiful, four-color book. Written with insight by two veterans of Nokia's design triumphs (co-author Christian Lindholm was featured in the August 2002 issue of Business 2.0 magazine) this one-of-a-kind reference vividly delivers: * The complete design process, from concept creation to product testing * The future of small interfaces * Usability engineering in practice in the mobile environment * The elements of a Nokia User Interface * First person accounts of the product development cycle Learn the processes that helped Nokia develop the world's most desirable handheld

Chihera in Zimbabwe

Brookings Institution Press
Minal Sharma, MBA. Five foot ten twenty-nine-year-old with a hyperactive conscience and a ton of attitude. She wants it all-a successful career at International Foods, a lifestyle to match and a 'totally cool' guy who'll buy her diamonds, bring her flowers and laugh at her jokes. But given the unending record of her life's embarrassments it's not going to be that simple. Especially when her mother's decided to take charge of the matrimonial front and the choice Minal has to make is between a wild and sexy radio jockey and a brilliant but boring oncologist. And it doesn't help that her new colleague on a make-or-break 'Cake' assignment is nasty, grudge-bearing kid from her childhood who just might be out to sabotage her career. Set in the quirky corridors of corporate intrigue Piece of Cake is a delicious romantic comedy with a delightfully complex female protagonist and a plot sparkling with mischief.
