Are you a triathlete, runner, cyclist, swimmer, cross-country skier, or other athlete seeking greater endurance? The Endurance Handbook teaches athletes how to stay healthy, achieve optimal athletic potential, and be injury-free for many productive years.

Dr. Philip Maffetone's approach to endurance offers a truly "individualized" outlook and unique system that he has refined over three decades of training and treating athletes, ranging from world champions to weekend warriors. Maffetone's training and racing philosophy emphasizes building a strong aerobic base for increased fat burning, weight loss, sustained energy, and a healthy immune system. Good nutrition and stress reduction are also key to this common-sense, big-picture approach. Dr. Maffetone also dispels many of the commonly held myths that linger in participatory sports—and which adversely impact performance—and explains the "truths" about endurance, such as: The need to train slower to race faster will enable your aerobic system to improve endurance Why expensive running shoes can actually cause foot and leg injuries The fact that refined carbohydrates actually reduce endurance energy and disrupt hormone balance How overtraining can be avoided in its earliest stages And much more! If you are looking to increase your endurance and maximize your athletic potential, The Endurance Handbook is your one-stop guide to training and racing effectively. Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes and sports enthusiasts, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

*Not Your Average Runner* Rowman & Littlefield

Travis Macy summited glacial peaks in the French Alps, rappelled into vast limestone caves in China, and ran through parched deserts in Utah. Most famously, he won one of the country's marquee ultra-distance events: Leadman, a high-altitude series of super-long-distance races, culminating with a 100-mile mountain biking race and a 100-mile trail run. Macy accomplished it without exceptional strength, speed, or flexibility, and without high-tech performance labs or performance-enhancing drugs. His secret? A precise and particular outlook he calls the "Ultra Mindset," principles for daily life that are neither mysterious nor the sole province of ascetics or elite athletes: embrace fear, rewrite stories we tell ourselves, and master the art of seeking help, among others. By applying the principles such as "It's All Good Mental Training," "When you have no choice, anything is possible," and "Never quit...except when you should quit" to other areas of life, anyone can find success that otherwise would have seemed impossible. Coauthored with award-winning running writer and journalist John Hanc, *The Ultra Mindset* blends exciting personal memoir with actionable, research-based advice. Dramatic stories of Macy's far-flung experiences in the professional endurance-racing world lead into relevant mindset principles, reflective self-assessments, mind- and body-enhancing workouts and activities, and compelling case studies. Macy's stories keep the pages turning as you forge your own winning outlook for success in business, sports, and life.

**Never Wipe Your Ass with a Squirrel** Aurum

Nearly 10 years after its first publication, Aurum are re-issuing this classic running book which has defined a genre. It includes an introduction from bestselling author Robert Macfarlane and an epilogue from Richard Askwith. The concept of fell-running is simple: it's a sport that involves running over mountains - sometimes one, sometimes many. It's also immensely demanding. While running uphill is a stamina-sapping slog, running pell-mell down the other side requires the agility - and

even recklessness - of a mountain goat. And there's the weather to contend with. It may make the sports pages only rarely, but in areas like the Lake District and Snowdonia fell-running is the basis of a whole culture - indeed, race organisers sometimes have to turn competitors away so that fragile mountain uplands are not irrevocably damaged by too many thundering feet. Fixtures like the annual Ben Nevis and Snowdon races attract runners from all over Britain, and beyond. Others, such as the Wasdale and Ennerdale fell runs in the Lakeland valleys - gruelling marathons of more than 20 miles - remain truly local events for which the whole community turns out, with many of the runners back on the same fells the next day tending sheep. Now, Richard Askwith explores the world of fell-running in the only legitimate way: by donning his Ron Hill vest and studded shoes to spend a season running as many of the great fell races as he can, from Borrowdale to Ben Nevis: an arduous schedule that tests the very limits of one's stamina and courage. Over the months he also meets the greats of fell-running - like the remarkable Joss Naylor, who to celebrate his fiftieth birthday ran all 214 major Lakeland fells in a single week; Billy Bland, the combative Borrowdale man whose astounding records still stand for many of the top races; and Bill Teasdale, a hero of the sport's earlier, professional days, whom he tracks down to his tiny cottage in the northern Lakes. And ultimately Askwith's obsession drives him to attempt the ultimate challenge: the Bob Graham Round - a non-stop circuit of 42 of the Lake District's highest peaks to be completed within 24 hours. This is a portrait of one of the few sports to have remained utterly true to its roots - in which the point is not fame or fortune but to run the ancient, wild landscape, and to be a hero, if at all, within one's own valley. Feet in the Clouds is a chronicle of a masochistic but admirable sporting obsession, an insight into one of the oldest extreme sports, and a lyrical tribute to Britain's mountains and the men and women who live among them.
