This book offers a variety of approaches to the topic of London in English literature from the Middle Ages to the present.

True Deceit False Love Oxford University Press

A Word Fitly Spoken explores significant poetic devices within the four alphabetic acrostic psalms found in Book I of the Psalter. The majority of scholarly opinion has been that these acrostics are poetically and artistically deficient due to the writers' and editors' preoccupation with the alphabetic pattern. In contrast to this view, A Word Fitly Spoken proposes that the acrostic pattern contributes to, rather than detracts from, the poetic artistry of these psalms. In an effort to promote a holistic, canonical reading of the four acrostic poems within Book I of the Psalter, this study also examines the linguistic and grammatical connections within the text. Such a close reading repeatedly demonstrates the emotive power and the imagination of this literature in contradiction to its supposedly stiff, wooden nature. A Word Fitly Spoken is attuned to the frequent plays on word and sound that occur throughout these four poems and as such would be useful in graduate courses on biblical interpretation, Hebrew poetry, or the Psalms.

He is distinctive among writers in having a tremendous popular following as well as a considerable and increasing academic reputation as a writer of substance and significance. This encyclopedia is an exhaustive guide to many aspects of Lovecraft's life and work, codifying the detailed research on Lovecraft conducted by many scholars over the past three decades. It includes hundreds of alphabetically arranged entries on Lovecraft and presents extensive bibliographical information. The volume draws upon rare documents, including thousands of unpublished letters, in presenting plot synopses of Lovecraft's major works, descriptions of characters in his tales, capsule biographies of his major colleagues and family members, and entries on little known features in his stories, such as his imaginary book of occult lore, the Necronomicon. The volume refers to current scholarship on the issues in question and also supplies the literary, topographical, and biographical sources for key elements in Lovecraft's work. As Lovecraft's renown continues to ascend in the 21st century, this encyclopedia will be essential to an understanding of his life and writings.

Charles Lutwidge Dodgson is best known for his 'Alice' books, *Alice's Adventures in Wonderland* and *Through the Looking-Glass*, written under his pen name of Lewis Carroll. Yet, whilst lauded for his work in children's fiction and his pioneering work in the world of Victorian photography, his everyday job was a lecturer in Mathematics at Christ Church, Oxford University. *The Mathematical World of Charles L. Dodgson (Lewis Carroll)* explores the academic background behind this complex individual, outlining his mathematical life, describing his writings in geometry, algebra, logic, the theory of voting, and recreational mathematics, before going on to discuss his mathematical legacy. This is the first academic work that collects the research on Dodgson's wide-ranging mathematical achievements into a single practical volume. Much material appears here for the first time, such as Dodgson's personal letters and drawings, as well as the results of recent investigations into the life and work of Dodgson. Complementing this are many illustrations, both historical and explanatory, as well as a full mathematical bibliography of Dodgson's mathematical publications.

Architectures of Poetry is the first comprehensive accounting of the currently intense dialogue between the sister arts of poetry and architecture. Refusing to take either term in a metaphoric sense, the eleven essays collected in this volume exemplify an exciting methodological direction for work in the humanities: a literal wager that is willing to take the unintended suggestions of language as reality. At the same time, they also provide close readings of the work of a number of important writers. In addition to a suite of essays devoted to the team of Arakawa and Madeline Gins, chapters

focus on figures as diverse as Francesco Borromini, Rainer Maria Rilke, Stéphane Mallarmé, Friedrich Achleitner, John Cage and Lyn Hejinian.
