A series of reviews of mental health and work policies in selected OECD countries revealed the challenge of mental health for social and labour market outcomes and policies and the high costs of the continued stigmatisation of mental health for individuals, employers and societies. To better respond to this challenge, in early 2016 health and employment ministers from the 38 OECD countries endorsed a Recommendation of the Council on Integrated Mental Health, Skills, and Work Policy.

This engaging and practical book addresses the multitude of ways in which school-employed psychological service providers such as school counselors, school psychologists, and school social workers, can support the learning, behavioral, and mental health needs of students in school settings. Psychology in the Schools offers vignette examples to apply content to real-world context and provides a variety of resources including worksheets and templates for practitioners to use in practice. Chapter content covers foundations in psychological services in schools (e.g., the hidden curriculum of school systems, professional standards of practice, consultation and collaboration, and assessment), an overview of social, emotional, behavioral, and academic supports

across tiers of service delivery, and skills for practitioners to thrive (e.g., burnout prevention). This text is ideal for an upper-level undergraduate course or an introductory graduate-level course. Early career practitioners and supervisors alike can also benefit from the tools and resources that this book provides.

This planner provides detailed guidance on what a Designated Mental Health Lead needs to do, when they need to do it, and how they can achieve the best results. It gives a clear focus and checklist for each week, including spaces to add your own to-do list, and encourages reflection on the outcomes and impact of your actions on pupils' attainment and wellbeing. It also encourages a focus on your own development and self-care, with space to record what you are currently reading or listening to and one thing you are grateful for that week. In addition to the termly and weekly plans, the book provides short briefs on key aspects of the role, including how to work effectively with teachers, the HR team, the DSL, governors, the pastoral team, Mental Health Support Teams and parents. It is an invaluable resource for all DMHLs tackling the 39 academic weeks.

Journal of the House of Representatives of the United States  
Stigma can have a huge impact on the lives of people living with mental illness. That needs to change, but how can we make it happen? A Brief History of Stigma explores the past and present of stigma to give a solid basis to examine strategies to reduce stigma and critically evaluate their effectiveness. It also incorporates the author's experiences as a former mental health nurse living with a chronic mental illness. The book is divided into

three parts. Part I explores what exactly stigma is, including relevant sociological theory and common stereotypes. Part II looks at some of the contexts in which stigma can occur, including the media and health care. Part III explores different stigma reduction strategies and what the research has to say about their effectiveness. You'll likely be surprised to learn how ineffective certain commonly used strategies are when it comes to changing public attitudes. This book is for anyone who's interested in understanding stigma and making the world a better place for people with mental illness. Together, we can create positive change!

#### *A Brief History of Stigma*

This special issue addresses the complex reality of English community football organisations, including Football in the Community (FitC) schemes, which have been attending to social agendas, such as social inclusion and health promotion. The positioning of football as a key agent of change for this diverse range of social issues has resulted in an increase in funding support. Despite the increased availability of funding and the (apparent) willingness of football clubs to adopt such an altruistic position within society, there remains limited empirical evidence to substantiate football's ability to deliver results. This book explores the current role of a football and football clubs in supporting and delivering social inclusion and health promotion to its community and seeks to examine the philosophical, political, environmental and practical challenges of this work. The power and subsequent lure of a football club and its brand is an ideal vehicle to entice and capture populations that (normally) ignore or turn away from positive social and/or health behaviours.

The foundations of such a belief are examined, outlining key recommendations and considerations for both researchers and practitioners attending to these social and health issues through the vehicle of football. This book was originally published as a special issue of *Soccer & Society*.
