## JAEDEN ERICK

**IAWM Journal** Routledge  
 American democracy has fascinated generations of historians. They have probed its philosophical foundations and the structure of its institutions, but their studies reveal little about those who really wielded power in the formative years of the republic. Employing a sophisticated research design, Whitman Ridgway examines the changing leadership patterns in four diverse communities in Maryland from 1790 to 1840. The results indicate clearly the need to study the American democratic process at the local level. Ridgway selected Baltimore City, Frederick, St. Marys, and Talbot counties -- representing the underlying economic and cultural diversity of one political culture, Maryland -- to evaluate who governed, how these patterns differed from one community to another, and how such patterns changed over time. The research design defines the scope of the study. Ridgway uses the decisional method of analysis, determining who actually made decisions, in order to identify the political leaders. His extensive research in manuscript and newspaper collections, tax and census data, and religious and geneological records gathered information on some 1,300 persons. This study of community power illuminates facets of a democratic society which perplexed Alexis de Tocqueville over a century ago. Ridgway demonstrates that, despite the expansion of popular participation in political affairs, the influence of the wealthy continued to be significant. He shows also how leaders without benefit of wealth or social ties to the oligarchies were able to enter community decision making. In a more modern context, this important book adds to the literature in several ways. Its greatest contribution is methodological -- no longer can historians talk about power relationships without studying them directly. The work also compares two important periods, the first and second party eras, normally treated in isolation; and through this comparison it reveals much about democracy, egalitarianism, and power.  This book explores the function of the "everyday" in the formation, consolidation and performance of national, sub-national and local identities in the former socialist region. Based on extensive original research including fieldwork, the book demonstrates how the study of everyday and mundane practices is a meaningful and useful way of understanding the socio-political processes of identity formation both at the top and bottom level of a state. The book covers a wide range of countries including the Baltic States, Ukraine, Russia, the Caucasus and Central Asia, and considers "everyday" banal practices, including those related to consumption, kinship, embodiment, mobility, music, and the use of objects and artifacts. Overall, the book draws on, and contributes to, theory; and shows how the process of nation-building is not just undertaken by formal actors, such as the state, its institutions and political elites.  
**Nominations to the Federal Election Commission**

 Service is increasingly recognized as a crucial part of academic life, and in this incredibly competitive industry, trustworthy best practice guides are notably missing. Even with supportive mentors, many emergent scholars are left to learn these lessons the hard way. In this straightforward and thorough book, Joy Egbert and Mary Roe address the most common challenges facing academics at all stages of their careers as they navigate the world of professional service. Illuminating the unspoken rules behind book reviewing, anticipating the difficulties of collaborating, offering support on chairing, mentoring, and graduate student committees chairmanship, and more, this book is a must-have for anyone starting an academic career in Education, and for veteran academics who want to polish their skills.

Editor Scott L. Hunsaker's new volume sheds much-needed light on the process of identifying students for gifted education services, a topic surrounded by controversy and confusion. With contributions from leading experts in the field, Identification takes an in-depth look at the research and practice of identification of gifted and talented students. Each of the four sections tackles an important aspect of the issue: Theoretical Foundations, Professional Foundations, Identification Practice, and Instrumentation. The text presents multiple points of view and does not shy away from thorny issues such as the theory-practice gap, underrepresentation of diverse populations, identification as status bestowal rather than assessment process, rigidity in use of processes and instruments, the search for the magic-bullet test, and the validity of nonverbal intelligence tests. Whether you are an administrator, teacher, gifted education specialist, professor, or parent, Identification will offer you insight presented nowhere else.
