Going for gold

Pearson Education
This book is about
supramolecular gold
chemistry. This book

provides a unique international forum aimed at covering a broad description of results involving the supramolecular chemistry of gold with a special focus on the gold-sulfur interface leading to hybrid materials ranging from gold-thiolate complexes to thiolate-protected gold nanoclusters and gold-thiolate supramolecular assemblies or nanoparticles. The role of thiolates on the structure and optical features of gold nanohybrid systems (ranging from plasmonic gold nanoparticles and fluorescent gold nanoclusters to self-assembled Au-containing thiolated coordination polymers) is highlighted in the 12

papers presented in this book.

The theory of information integration provides a unified, general approach to the three disciplines of cognitive, social, and

developmental psychology. Each of these volumes illustrates how the concepts and methods of this experimentally-grounded theory may be productively applied to core problems in one of these three disciplines.
