### EMILIE KENDALL

---

**Environmental Awareness for Sustainable Development** Taylor & Francis  
 Booklet outlining the duties of company directors and their ethical and legal responsibilities. Produced by eight business organisations concerned about recent corporate practices, with a working group chaired by Henry Bosch, former head of the National Companies and Securities Commission.

*Diane Victor* Springer

Leaders are not just born to the role. They are born, then made - and sometimes unmade by their own actions. A leader who is not attuned to his or her followers soon becomes a leader in limbo and invariably then fails. Connectedness, compassion, empathy, integrity, humility, reasonableness and

a determination to be effective are the keys to attuned leadership. An attuned leader can step boldly into an uncertain future with the certainty that followers will lend their support. In this richly reflective discussion of leadership and transformation the author provides a guide to what constitutes ethical leadership in local and global contexts, for business, politics and government. In a world where tyrants abound in corporations and in states, Attuned Leadership provides a compass for the direction of ethical leadership. Central to this perspective is that the philosophical traditions of Africa offer an important contribution to the theory and practice of leadership in the world today. African humanism or Ubuntu, evokes both reason and empathy as the basis for ethical leadership. Ubuntu - articulated in the Zulu proverb Umuntu Ngumuntu Ngabantu - means that a person is a person because of other people. The author contends that the reciprocal relationship between the individual and the social collective stimulates caring and progressive thought and action. Nowhere is this more apt than in the relationship between leader and followers.

### **Food, Agriculture, & Natural Resources** AFRICAN SUN MeDIA

This monograph is based on an extensive dataset and a very well documented case study. Such a wealth of empirical material provides an ideal ground to test theories and enables the authors to elaborate interesting conceptualisations of some specific aspects of the broader network approach, particularly concerning the internationalisation of business networks. Anna Spadavecchia, Business History Combined with recent advances in network analysis [the book] can be instrumental in advancing our understanding, which will not only be useful for research scholars, but also provide practical guidance for managers. . . It is full of ideas which seem like deceptively simple black stones that in the hands of a skillful artisan can be turned into dazzling diamonds. Charles Dhanaraj, Journal of International Business Studies The work by Forsgren et al. offers a major contribution in terms of the analytical power of network relationships. By shifting to an exchange based perspective, they challenge the classical view of organizational power and control, but also the sources of organizational capabilities. They argue that the distinct capabilities and resources of the organization are developed through relationships and connections. Wilhelm Barner-Rasmussen, Rebecca Piekkari, Joanna Scott-Kennel and Catherine Welch, Academy of Management Perspectives An interesting and insightful book. It questions a lot of traditional thinking about international firms and the way they operate. Throughout the book, the reader is invited to develop a different perspective. This perspective might be called a relationships and networks theory of the firm. While this may sound familiar, the book goes well beyond anything I have seen in the existing literature, in terms of conceptualizing relationships and networks and in using this perspective to guide and interpret case study and survey research results. William G. Egelhoff, Fordham University, US It is now well accepted in the academic literature that the multinational corporation can be usefully modelled as a network of relationships. But it is less well-known that the origins of this perspective can be traced back to work done in Uppsala, Sweden, in the 1970s and 1980s. The term business network was first used there, and many important ideas around power and influence have also emerged from this research centre. In this new book, three of the key members of the Uppsala school develop a synthesis of the more recent ideas to come out of their research on networks. By focusing on the concept of the embedded multinational they show how the internal networks of the multinational interact with the web of external networks each subsidiary unit has in its local market. This book provides a definitive and compelling point of view of the importance of networking thinking to the study of the multinational corporation. It is an important book, and it will be widely cited in years to come. Julian Birkinshaw, London Business School, UK Forsgren, Holm, and Johanson have been among the leaders in developing the idea of the multinational firm as a network that spans different country environments. This perspective cautions the easy prescription that a multinational firm can do everything easily, if it just has the right organizational form. Relationships matter, as do the legitimacy of the firm in the context of its foreign investments. This book provides rich case insights into these dimensions. Bruce Kogut, INSEAD, France This book expands the business network view on managerial issues in multinational corporations. Specifically, it scrutinises the importance of a subsidiary's external and internal business network for its strategic and organizational role within the corporation. The internationalisation of firms in terms of management issues and headquarters control, the influence of subsidiaries on decisions and learning processes

within multinational corporations are examined in detail. It is argued that

Victims of Crime Survey Springer

The book presents the Invited Lectures given at 13th International Congress on Mathematical Education (ICME-13). ICME-13 took place from 24th- 31st July 2016 at the University of Hamburg in Hamburg (Germany). The congress was hosted by the Society of Didactics of Mathematics (Gesellschaft für Didaktik der Mathematik - GDM) and took place under the auspices of the International Commission on Mathematical Instruction (ICMI). ICME-13 - the biggest ICME so far - brought together about 3500 mathematics educators from 105 countries, additionally 250 teachers from German speaking countries met for specific activities. The scholars came together to share their work on the improvement of mathematics education at all educational levels.. The papers present the work of prominent mathematics educators from all over the globe and give insight into the current discussion in mathematics education. The Invited Lectures cover a wide spectrum of topics, themes and issues and aim to give direction to future research towards educational improvement in the teaching and learning of mathematics education. This book is of particular interest to researchers, teachers and curriculum developers in mathematics education.

**Juta's Education Law and Policy Handbook** Edward Elgar Publishing

This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa, where research has been conducted over more than three decades, and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological, economic and social effects. It covers a broad range of themes, including history, policy development and implementation, the status of invasions of animals and plants in terrestrial, marine and freshwater environments, the development of a robust ecological theory around biological invasions, the effectiveness of management interventions, and scenarios for the future. The South African situation stands out because of the remarkable diversity of the country, and the wide range of problems encountered in its varied ecosystems, which has resulted in a disproportionate investment into both research and management. The South African experience holds many lessons for other parts of the world, and this book should be of immense value to researchers, students, managers, and policy-makers who deal with biological invasions and ecosystem management and conservation in most other regions.

**Invited Lectures from the 13th International Congress on Mathematical Education**

Springer Nature

The volume describes the worldwide state of the HIV/AIDS epidemic and possible ways forward. Marking the 30 years of AIDS, the report takes stock of the changes occurred in the AIDS epidemic and responses since the condition was first diagnosed in 1981. It also features commentaries from 15 leaders in the global AIDS response, including South Africa's President Jacob Zuma, former United States President Bill Clinton, former President of Brazil Luiz Inacio Lula da Silva, singer Angelique Kidjo and former UN Secretary-General Kofi Annan. It covers a wide range of areas, including the results achieved by HIV prevention efforts, the record number of people starting lifesaving treatment and the decline in resources for HIV. It also draws attention to the significant challenges remaining such as the gender inequalities and the increasing HIV prevalence among key populations at higher risk of infection.

**AIDS at 30** David Krut Publishing

South Africa's high rate of unemployment (26.4%) makes it a complete outlier compared with other middle-income countries. Indeed, the unemployment rate rises to 36% if discouraged workers are taken into account. It underpins extreme poverty and inequality and is a major contributor to social dislocation. If it were not for increased social payments, poverty would have continued to increase since the advent of democracy in 1994. Unemployment also represents a huge cost to growth. This book focuses on the growth path of the economy. The starting point is that while more rapid economic expansion is an important objective, at any given level of growth, the economy as a whole needs to become more labour-absorbing. The central question posed is how to bring about changes in the economic structure and pattern of development, which would lead to the attainment of this objective. The authors argue that employment needs to be much more centrally positioned within the economic and social policy arena. They emphasise innovative approaches within a broader focus on the growth path, and employment-intensive growth. And they posit that the negative impact of previous 'distortions' requires much more than a levelling of the playing field via market-based reforms. Apart from presenting an alternative growth path which could start to shift the economy in new directions, the book tackles themes which have received only limited attention, such as wage subsidies, youth unemployment and employment growth in rural areas.

**Biological Invasions in South Africa** UN

This book provides the first comprehensive academic study of what China's trade with, and investment in, African countries mean for the socio-economic well-being of the continent. Based on the African Tree of Organic Growth Framework developed in the book, Jonker and Robinson outline the factors necessary in realizing Africa's Renaissance vision and the impact that the Chinese might have on this process. Using the metaphor of the Baobab tree, the authors analyze the historical, cultural and economic contexts within African countries, the channels available to produce development and growth, and the fruits or social and economic well-being created by this integrated process. The book takes readers on a journey of numerous African examples and case studies, describing and analyzing the challenges and complexities of countries in their desire to achieve organic, cultural, scientific and economic renewal, and the improvement of the well-being of their citizens. This book will be of great value to economists, people who wish to do business in Africa, China-watchers, those who are following the development and growth of Africa, and more.

**Chemical & Metallurgical Engineering** Penguin Random House South Africa

This text offers a key to understanding the Acts, regulations and policies affecting school governance as well as educators' conditions of employment throughout South Africa. It provides a full text of these laws with notes, and the loose-leaf format allows the contents to be easily updated.

**Attuned Leadership** Springer

In preparation for its 2019-2022 Country Partnership Framework with South Africa, the World Bank Group has drafted a Systematic Country Diagnostic (SCD) which forms the basis of this book. Its aim is to strengthen understanding of the constraints in achieving two goals in South Africa: to eliminate poverty by 2030, and to boost shared prosperity. These goals are enshrined in South Africa's Vision 2030 in the National Development Plan. This book is the result of consultations and conversations with key government departments, the National Planning Commission, the private sector, academics

and trade unions. It identifies five broad policy priorities: to build South Africa's skills base; to reduce the highly skewed distribution of land and productive assets; to increase competitiveness and the country's participation in global and regional value chains; to overcome apartheid spatial patterns; and to increase the country's strategic adaptation to climate change. The key obstacle to growth that has been identified is 'the legacy of exclusion'. Undoing this is a long-term process, but renewed commitment by the political leadership to strengthen institutions and rebuild the social contract present an enormous opportunity in achieving progress towards South Africa's Vision 2030. 2019 9th International Conference on Power and Energy Systems (ICPES) Juta and Company (Pty) Ltd

ÿ Inclusive business is hailed as a win-win scenario for the development of poor communities; yet there is little insight into how these inclusive businesses work and, more importantly, for whom. This book aims for a thorough understanding of the range of inclusive businesses in agriculture by examining: the structures they implement, the actors involved, and whether they are effectively inclusive of smallholders. It presents a range of case studies and is therefore empirically based and practically oriented. By offering a critical assessment of inclusive businesses overall, it allows for a better perception of what works where, and under which conditions. It provides useful insights that will benefit smallholders, agri-businesses, support groups, policy makers and investors who are willing to promote more inclusive businesses, that foster a better integration of smallholders into commercial value-chains and a more equitable and sustainable agricultural sector.

**China's Impact on the African Renaissance** Juta and Company Ltd

The conference theme is Towards Sustainable and Green Future covering various aspects of electrical engineering and renewable energies The conference will have several special sessions and tutorials, as well as Industry, Women in Power Engineering, Young Professionals and Education in Power Engineering forums in addition to the normal oral poster sessions

Towards Employment-Intensive Growth in South Africa

Cover -- Title -- Copyright -- Contents -- Preface -- Introduction and rationale -- 1 The view of South African youth before #FeesMustFall -- 2 Were the 2015 student protests a revolution? -- 3 What the 2015 protests actually were and how they were possible -- 4 Ikhohlisan'ihlomile: FMF students' engagement with power and their ideological differences -- 5 Can South Africa's declining economy inspire student-led new revolution? -- 6 Youth's declining news consumption levels and ideologically divided media -- 7 Youth's polysemic interpretation of the ANC regime and the limits of the new revolution -- 8 Youths' declining participation levels in the public sphere: the constraints of new revolution -- 9 Conclusion: FMF protests will not lead to a revolution per se (at least not yet), but to wide ranging reforms -- References -- Index

**Corporate Practices and Conduct**

Africa's diversity is its greatest resource and challenge. In this book, leaders from business, government, academia and the voluntary sector discuss the implications of this diversity for leadership. Throughout, contributors relate organisational issues to the social, political and cultural contexts and focus on the role of effective leadership.
