'Undoubtedly the most powerful and immediate book to emerge from the Balkan horror of ethnic civil war' Antony Beevor, Daily Telegraph In 1993, Anthony Loyd hitchhiked to the Balkans hoping to become a journalist. Leaving behind him the legends of a distinguished military family, he wanted to see 'a real war' for himself. In Bosnia he found one. The cruelty and chaos of the conflict both appalled and embraced him; the adrenalin lure of the action perhaps the loudest siren call of all. In the midst of the daily life-and-death struggle among Bosnia's Serbs, Croats and Muslims, Loyd was inspired by the extraordinary human fortitude he discovered. But returning home he found the void of peacetime too painful to bear, and so began a longstanding personal battle with drug abuse. This harrowing account shows humanity at its worst and best. It is a breathtaking feat of reportage; an uncompromising look at the terrifyingly seductive power of war. 'As good as reporting gets. I have nowhere read a more vivid account of frontline fear and survival. Forget the strategic overview. All war is local' Martin Bell, The Times

Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

Historia Litteraria

Hepatitis B and C cause most cases of hepatitis in the United States and the world. The two diseases account for about a million deaths a year and 78 percent of world's hepatocellular carcinoma and more than half of all fatal cirrhosis. In 2013 viral hepatitis, of which hepatitis B virus (HBV) and hepatitis C virus (HCV) are the most common types, surpassed HIV and AIDS to become the seventh leading cause of death worldwide. The world now has the tools to prevent hepatitis B and cure hepatitis C. Perfect vaccination could eradicate HBV, but it would take two generations at least. In the meantime, there is no cure for the millions of people already infected. Conversely, there is no vaccine for HCV, but new direct-acting antivirals can cure 95 percent of chronic infections, though these drugs are unlikely to reach all chronically-infected people anytime soon. This report, the first of two, examines the feasibility of hepatitis B and C elimination in the United States and identifies critical success factors. The phase two report will outline a strategy for meeting the elimination goals discussed in this report.

Webster's Condensed Dictionary

US Agencies at the Mexican Border were overwhelmed in 2014 as tens of thousands of unaccompanied children arrived from Central America. Unprepared to receive migrants of this particular kind, the US government deployed troops to carry out a new border mission: the feeding, care, and housing-of this wave of children. This event highlights the complex social, economic, and political issues that arise along international borders. In *American Crossings*, nine scholars consider the complicated modern history of borders in the Western Hemisphere, examining them as geopolitical boundaries, key locations for internal security, spaces for international-trade, and areas where national and community identities are defined.
