The world's greatest pickup artist is back! After the bestselling exposé *The Game* pulled back the curtain on Mystery and his culture of professional pickup artists, he became an international phenomenon. Unfortunately, while it's no secret that Mystery's ideas are wildly effective, women have started to catch on. They've seen the show and heard the routines—so now it's time for the next level of game! With techniques honed over fifteen years of trial, error, and ultimate triumph, and following his hit VH1 reality series, the

celebrated sensei is back with his latest living-large exploits and a new and improved playbook for the twenty-first-century playboy. As the book begins, Mystery and his crew have withdrawn to their swank Miami mansion to plot their next move. When a new student comes to stay at the house, Mystery draws him deep into the pickup-artist lifestyle and shows him an intimate portrait of the master of seduction. Mystery lays out a complete system of game, and unveils his latest (and fully field-tested) strategies and techniques. *The Pickup Artist* includes

• a list of all the triggers that create—and destroy—attraction • a new way to approach strangers and start a conversation: microcalibrated openers • Mystery’s most powerful humor technique, the Absurd—so you’ll never run out of things to say again • a full chapter on physical escalation (touching, kissing, “making a move”) • the solution to inner-game issues, for when you’re not confident enough • and much, much more

Whether he’s holding court with eager disciples in South Beach, hanging out with his crew of fellow super-seducers in Las Vegas, or partying it up in the Hollywood Hills, Mystery is never far from where the action is—and never fails to get a piece of it. Now it’s your turn. Read *The Pickup Artist* and get into the game.

When an all-consuming void from the Fourth Dimension opens up, unleashing monsters throughout the Realities, Mister George has one last weapon at his disposal--the mysterious and powerful Karma button, which might be even more dangerous than anyone imagined.

George R.R. Martin's acclaimed seven-book fantasy series *A Song of Ice and Fire* is unique for its strong and multi-faceted female protagonists, from teen queen Daenerys, scheming Queen Cersei, child avenger Arya, knight Brienne, Red Witch Melisandre, and many more. The Game of Thrones universe challenges, exploits, yet also changes how we think of women and gender, not only in fantasy, but in Western culture in general. Divided into three sections addressing questions of

adaptation from novel to television, female characters, and politics and female audience engagement within the GoT universe, the interdisciplinary and international lineup of contributors analyze gender in relation to female characters and topics such as genre, sex, violence, adaptation, as well as fan reviews. The genre of fantasy was once considered a primarily male territory with male heroes. *Women of Ice and Fire* shows how the GoT universe challenges, exploits, and reimagines gender and why it holds strong appeal to female readers, audiences, and online participants.

*The Void of Mist and Thunder* Legare Street Press

*Graffiti*. It can be a diverse form of expression and thoughtprovoking art; whether painted on the side of a train or on a canvas hanging in a gallery. Or, as you will see immortalised in the glorious pages of *Crap Graffiti*, it can be crude drunken daubing, nonsensical statements or hilarious outpourings of uncontained rage. *Crap Graffiti* documents these bizarre and puerile creations, celebrates the inept and enthusiastically applauds creative dyslexia. This is definitely not art,

but really awful, lame graffiti: the incompetent attempts of beginners or the 'profound' musings of lunatics scrawled on the back of toilet cubicle doors. Welcome to the Cream of the Crap.

Many patients undergoing surgery have a chronic medical disorder unrelated to the surgical problem. These can present major difficulties for inexperienced surgical house staff and junior anaesthetists working unsupervised, most of whom will have had little or no experience in dealing with such problems. Perioperative medicine provides practical guidelines on the management of all the common medical conditions likely to be encountered in routine surgical and anaesthetic practice. The first section addresses a range of general issues that can arise on surgical wards when patients with complex medical problems are being prepared for operation, such as obtaining informed consent. The book then provides simple protocols for the safe care of patients with underlying medical problems on surgical wards, with special focus on the risks that various conditions pose for surgery and anaesthesia. The third part of the book looks at the diagnosis and management of

medical complications in the post-operative period. References for further reading are provided throughout. This will prove an essential book for junior surgeons and anaesthetists to keep by their sides at all times.

Art therapy with infants, toddlers and their families is an exciting and developing area of practice. With contributions from Australia, the United Kingdom and Spain, *Art Therapy in the Early Years* has an international flavour. The authors describe clinical art psychotherapy practice with children under five and their families in settings that include children in care, mental health clinics, paediatric wards, pre-schools, and early intervention programs. Divided into three sections, *Art Therapy in the Early Years* presents different clinical environments in which art psychotherapy with this client group is found: • individual art therapy; • group art

therapy; • parent-child dyad and family art therapy. The book proposes that within these different contexts, the adaptive possibilities inherent in art psychotherapy provide opportunities for therapeutic growth for young children and their families. Art Therapy in the Early Years will be of interest to art therapists working with children; students and practitioners from creative arts therapies; psychologists and psychotherapists; social workers; pre-school teachers; child psychiatrists, clinical

supervisors, and other professionals working in the early years settings.
