 Track main safety checkpoints every day
 on each truck before employees operate
 fork lifts. This book prompts employees to
 check safety features such as fluid levels,
 gauges, tires, battery, lift system, plates,
 stickers, exhaust, belts, and hydraulic
 controls, and prompts employees to
 include their initials. There is also a
 signature log to record employees' printed
 names and examples of their initials for
 tracking purposes. Further, several pages
 at the back of the book prompt mechanics
 to record the dates, billing numbers, parts
 numbers, and a narrative of services
 performed for preventative maintenance
 on each truck. This book is meant to stay
 with a single truck, and there is room at
 the front of the book to record
 identification information about each
 individual truck.
