SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial

Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's view of the module's key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.

Much more than a book on compiling grant proposals, **Grant Management: Funding for Public and Nonprofit Programs** presents grant writing in its broader organizational management framework. This text takes a comprehensive approach to external funding for public and nonprofit agencies. The book begins with an introduction to grants, their types, their history and their key characteristics to inform the next stage the search for funding. A key part of any management process, an entire chapter considers the purpose and approaches to evaluation that should be considered in conjunction with grant-funded programs. The book concludes with a chapter that considers the process in reverse how to go about distributing funds as a grant maker rather than a grant seeker. This text leads the reader through the technical steps of preparing an application, explaining the process used to make decisions, key aspects of grant management, and includes a summary of important factors directly pertaining to grant funds. Written from the perspective of community development, With information drawn from core theories and tools of public administration, **Grant Management: Funding for Public and Nonprofit Programs** addresses overarching theoretical issues for public management as well as offers an applied perspective of grant funding and management. This is an ideal

text for students and public and nonprofit managers alike.

Developing a Security Training Program focuses on how to establish a comprehensive training program for a security department from the ground up. This book highlights formal curriculum development, consistent and continual training, and the organizational benefits including how such security training will be a value-add. It's long overdue for the industry to revisit old security training models from the past — to both general staff as well as to the dedicated security staff and professionals within organizations — and examine and revamp such with a fresh perspective. Given the current, dynamic environment for businesses — and the threats businesses face — it is important that any such training consider all procedures and policies, and be fully integrated into the company culture. This includes maintaining an eye on budgetary and financial costs while recognizing the need to budget for more training resources to maintain resilience and adaptability to current challenges and future changes to the environment. There is only one way to prepare your staff and that is through comprehensive and consistent training. Developing a Security Training Program provides the blueprint and tools for professionals to provide ongoing, targeted, and comprehensive security training at a low, budget-friendly cost.
