Signs of Identity presents an interdisciplinary introduction to collective identity, using insights from social psychology, anthropology, sociology and the humanities. It takes the basic concept of semiotics - the sign - as its central notion, and specifies in detail in what ways identity can be seen as a sign, how it functions as a sign, and how signs of identity are related to those who have that identity. Recognizing that the sense of belonging is both the source of solidarity and discrimination, the book argues for the importance of emotional attachment to collective identity. The argument is supported by a large number of real-life examples of how collective emotions affect group formation, collective action and inter-group relations. By addressing the current issues of authenticity and the Self, multiculturalism, intersectionality and social justice, the book helps to stimulate discussion of the contested topics of identity in contemporary society.

One of the true classics in Marketing is now thoroughly revised and updated. "Marketing Theory" is both evolutionary and revolutionary. As in earlier editions, Shelby Hunt focuses on the marketing discipline's multiple stakeholders. He articulates a philosophy of science-based 'tool kit' for

developing and analyzing theories, law-like generalizations, and explanations in marketing science. Hunt adds a new dimension to the book, however, by developing arguments for the position that Resource-Advantage Theory provides the foundation for a general theory of marketing and a theoretical foundation for business and marketing strategy. Also new to this edition are four chapters adapted and updated from Hunt's "Controversy in Marketing Theory" that analyze the 'philosophy debates' within the field, including controversies with respect to scientific realism, qualitative methods, truth, and objectivity.

'Nathaniel Rich's account starts in Washington in the 1990s and tells the story of how climate change could have been stopped back then, if only the powerful had acted. But they didn't want to.' - Observer By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich tells the essential story of why and how, thanks to the actions of politicians and businessmen, that failure came about. It is crucial

to an understanding of where we are today. 'The excellent and appalling Losing Earth by Nathaniel Rich describes how close we came in the 70s to dealing with the causes of global warming and how US big business and Reaganite politicians in the 80s ensured it didn't happen. Read it.' - John Simpson 'An eloquent science history, and an urgent eleventh-hour call to save what can be saved.' - Nature 'To change the future, we must first understand our past, and Losing Earth is a crucial part of that when it comes to the environmental battles we're facing.'- Stylist

Since the publication of the first edition in 1982, the goal of Simulation Modeling and Analysis has always been to provide a comprehensive, state-of-the-art, and technically correct treatment of all important aspects of a simulation study. The book strives to make this material understandable by the use of intuition and numerous figures, examples, and problems. It is equally well suited for use in university courses, simulation practice, and self study. The book is widely regarded as the "bible" of simulation and now has more than 100,000 copies in print. The book can serve as the primary text for a variety of courses; for example: • A first course in simulation at the junior, senior, or beginning-graduate-student level in engineering, manufacturing, business, or computer science (Chaps. 1 through 4, and parts of Chaps. 5 through 9). At the end of such a course, the students will be prepared to carry out complete and effective simulation studies, and to take advanced simulation courses. • A second course in simulation for graduate students in any of the above disciplines (most of Chaps. 5 through 12). After completing this course, the student should be familiar with the more advanced methodological issues involved in a simulation study, and should be prepared to understand and conduct simulation research. • An introduction to simulation as part of a general course in operations research or management science (part of Chaps. 1, 3, 5, 6, and 9).

Respected conservative talk show host, blogger and TV commentator Dana Loesch gives her views on the history and intent of the Second Amendment and discusses what she believes gun confiscation would mean to Americans' basic rights as citizens. How many people in America today are truly well-versed in the history of the Second Amendment, and why it was included in the Bill of Rights? In HANDS OFF MY GUN, Dana Loesch explains why the Founding Fathers included the right to bear arms in the Bill of Rights, and argues that "gun control" regulations throughout history have been used to keep minority populations under control. She also contends that current arguments in favor of gun control are primarily based on emotions and fear. This narrative is a must-read for every Second Amendment supporter. Dana Loesch is a determined and fierce advocate for those rights and shouts out: hands off my gun!

Musik aufnehmen, arrangieren, mischen, produzieren und ihr den letzten Schliff geben: Das lernen Sie in dieser von Apple zertifizierten Anleitung für Logic Pro X. Der erfahrene Musikproduzent und Komponist David Nahmani zeigt Ihnen anhand von schrittweisen Anleitungen, praxisgerechten Projekten und unkomplizierten Erklärungen alles, was Sie wissen müssen - von den Grundlagen bis zu anspruchsvollen Produktionstechniken. Schon in der ersten Lektion machen Sie mit Logic Pro X und den als Download erhältlichen Lektionsdateien Musik. Ausgehend davon lernen Sie, Audio- und MIDI-Daten aufzunehmen, Sequenzen zu erstellen, zu bearbeiten sowie Misch- und Automatisierungstechniken zu meistern. Sie erstellen sowohl akustische als auch virtuelle Schlagzeugeinspielungen mit Funktionen wie Drummer-Spuren und dem Drum Kit Designer. Lektions- und Mediendateien zur Bearbeitung der praktischen Übungen stehen als Download bereit (in englischer Sprache). Die einzelnen Lektionen sind jeweils sorgfältig auf praktische Aufgaben zugeschnitten. Wiederholungsfragen fassen den Lernstoff zusammen und helfen Ihnen, sich für die Zertifizierungsprüfung zu Logic Pro X vorzubereiten. Die Reihe Apple Pro Training Series dient zum Selbststudium und enthält offizielle Lehrinhalte des Trainings- und Zertifizierungsprogramms von Apple. Wenn Sie das Lehrgangsmaterial in diesem Buch durchgearbeitet haben, können Sie Apple Certified werden, indem Sie eine Prüfung bei einem autorisierten Apple Training Provider ablegen. This handbook introduces a methodical approach and pragmatic concept for the planning and design of changeable factories that act in strategic alliances to supply the ever-changing needs of the global market. In the first part, the change drivers of manufacturing enterprises and the resulting new challenges are considered in detail with focus on an appropriate change potential. The second part concerns the design of the production facilities and systems on the factory levels work place, section, building and site under functional, organisational, architectural and strategic aspects keeping in mind the environmental, health and safety aspects including corporate social responsibility. The third part is dedicated to the planning and design method that is based on a synergetic interaction of process and space. The accompanying project management of the planning and construction phase and the facility management for the effective utilization of the built premises close the book. The Authors Prof. em. A central pillar of contemporary communication research is the analysis of filmed interactions between people. The techniques employed in such analysis first took on a recognizably modern form in the 1970s, but their roots go back to the earliest days of motion picture technology in the late nineteenth century. This book presents original essays accompanied by written responses which together create a dialogue exploring early efforts at audio-visual sequence analysis and their common goal to capture the "whole" of the communicative situation. The first three chapters of this volume look at the film-based research of Gestalt psychologists in Berlin as well as psychologists in the orbit of Karl and Charlotte Bühler in Vienna in the first decades of the twentieth century. Most of these figures - along with many other Central European scholars of this era - were driven into exile in the United States after the rise of National Socialism in the 1930s. This scientific migration led to the cross-pollination of communication studies in America, an outcome visible in the leading project in interaction research of the mid-twentieth century, the Natural History of an Interview. The following two chapters examine this project in its historical context. The volume closes with a critical edition of a treasure from the archives: the transcript of a speech delivered by Ray Birdwhistell, a key participant in the Natural History of an Interview project and founder of kinesics.

[Founding Psychoanalysis Phenomenologically](#) Harper Collins

The present anthology seeks to give an overview of the different approaches to establish a relation between phenomenology and psychoanalysis, primarily from the viewpoint of current phenomenological research. Already during the lifetimes of the two disciplines' founders, Edmund Husserl (1859 - 1938) and Sigmund Freud (1856 - 1939), phenomenological and phenomenologically inspired authors were advancing psychoanalytic theses. For both traditions, the Second World War presented a painful and devastating disruption of their development and mutual exchange. During the postwar period, phenomenologists, especially in France, revisited psychoanalytic topics. Thus, in the so-called second generation of phenomenology there developed an intensive reception of the psychoanalytic tradition, one that finds its expression even today in current hermeneutic, postmodern and poststructuralist conceptions. But also in more recent phenomenological research we find projects concentrated systematically on psychoanalysis and its theses. In this context, the status of psychoanalysis as a science of human experience is discussed anew, now approached on the 'first person' basis of a phenomenological understanding of subjective experience. In such approaches, phenomena like incorporation, phantasy, emotion and the unconscious are discussed afresh. These topics, important for modern phenomenology as well as for psychoanalysis, are examined in the context of the constitution of the human person as well as of our intersubjective world. The analyses are also interdisciplinary, making use of connections with modern medicine, psychiatry and psychotherapy. The systematic investigations are enriched by historical analysis and research in the internal development of the disciplines involved. The volume presents recent work of internationally recognized researchers - phenomenologically oriented philosophers, psychoanalysts and psychotherapists - who work in the common field of the two disciplines. The editors hope that this selection will encourage further systematic collaboration between phenomenology and psychoanalysis

Mixing and mastering are the final challenges in creating great recordings. Great mixes require both creativity and a practical understanding of process, while final masters require both a clear sense for purpose and specialized ears for achieving artistic goals. Mixing and Mastering in the Box gives readers the practical tools for accomplishing both of these tasks while highlighting the artistry of the creative process. While much of the information presented in Mixing and Mastering in the Box is applicable to those using analog mixing gear, or a hybrid of digital and analog tools, the book focuses directly on working completely within the Digital Audio Workstation (DAW). Author Steve Savage lets readers in on such topics as the secrets of collaboration and using EQ, compression, delay, reverb, and brickwall limiting to improve the sound of records, each topic illustrated with a myriad of concrete examples. Mixing and Mastering in the Box is the ultimate reference manual for the home recordist and the perfect basic to intermediate text for any DAW

(Digital Audio Workstation) training class in mixing or mastering. The book is also ideal for readers who handle their own mixing and mastering or who wish - or are professionally required - to be better informed when collaborating on mixes and masters.

"This book is about the use of modern statistical methods for quality control and improvement. It provides comprehensive coverage of the subject from basic principles to state-of-the-art concepts and applications. The objective is to give the reader a sound understanding of the principles and the basis for applying them in a variety of situations. Although statistical techniques are

emphasized, throughout, the book has a strong engineering and management orientation. Extensive knowledge of statistics is not a prerequisite for using this book. Readers whose background includes a basic course in statistical methods will find much of the material in this book easily accessible"--

This book provides a comprehensive analysis of the emergence, consolidation and development of

the Irish women's movement, as a social movement, in the course of the twentieth century. It seeks to address several lacunae in Irish studies by illuminating the processes through which the movement and, in particular, networks of constituent organisations, came to fruition as agencies of social change. The central argument advanced is that when viewed historically, the Irish women's movement is characterised by its interconnectedness and continuity: the central tensions, themes and organising strategies of the movement connects diverse organisations and constituencies, over time and space. This book will be essential reading for those interested in Irish studies, sociology, history, women's studies, and politics.
