easy to use and can be used for self-study or as a reference in the classroom. It is suitable for learners at all levels, from beginner to advanced. *The Manyōshū* VIZ Media LLC
Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history,

techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. *The Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically “animetic” effects—the multiplanar

image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation—through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of

drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi, and CLAMP’s manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of

thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the “animetic machine” encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us.

“We tried to live with 120 percent intensity, rather than waiting for death. We read and read, trying to understand why we had

to die in our early twenties. We felt the clock ticking away towards our death, every sound of the clock shortening our lives.” So wrote Irokawa Daikichi, one of the many kamikaze pilots, or tokkotai, who faced almost certain death in the futile military operations conducted by Japan at the end of World War II. This moving history presents diaries and correspondence left by members of the tokkotai and other Japanese student soldiers who perished during the

war. Outside of Japan, these kamikaze pilots were considered unbridled fanatics and chauvinists who willingly sacrificed their lives for the emperor. But the writings explored here by Emiko Ohnuki-Tierney clearly and eloquently speak otherwise. A significant number of the kamikaze were university students who were drafted and forced to volunteer for this desperate military operation. Such young men were the intellectual elite of modern Japan: steeped in the classics

and major works of philosophy, they took Descartes' "I think, therefore I am" as their motto. And in their diaries and correspondence, as Ohnuki-Tierney shows, these student soldiers wrote long and often heartbreaking soliloquies in which they poured out their anguish and fear, expressed profound ambivalence toward the war, and articulated thoughtful opposition to their nation's imperialism. A salutary correction to the many caricatures of the kamikaze, this

poignant work will be essential to anyone interested in the history of Japan and World War II. *The Ancient Magus' Bride Vol. 9* Kodansha Comics

Grand in its scope, *Asian Comics* dispels the myth that, outside of Japan, the continent is nearly devoid of comic strips and comic books. Relying on his fifty years of Asian mass communication and comic art research, during which he traveled to Asia at least seventy-eight times and visited many studios and workplaces, John A.

Lent shows that nearly every country had a golden age of cartooning and has experienced a recent rejuvenation of the art form. As only Japanese comics output has received close and by now voluminous scrutiny, *Asian Comics* tells the story of the major comics creators outside of Japan. Lent covers the nations and regions of Bangladesh, Cambodia, China, Hong Kong, India, Indonesia, Korea, Malaysia, Myanmar, Nepal, the Philippines, Singapore, Sri Lanka,

Taiwan, Thailand, and Vietnam. Organized by regions of East, Southeast, and South Asia, *Asian Comics* provides 178 black-and-white illustrations and detailed information on comics of sixteen countries and regions—their histories, key creators, characters, contemporary status, problems, trends, and issues. One chapter harkens back to predecessors of comics in Asia, describing scrolls, paintings, books, and puppetry with humorous

tings, primarily in China, India, Indonesia, and Japan. The first overview of Asian comic books and magazines (both mainstream and alternative), graphic novels, newspaper comic strips and gag panels, plus cartoon/humor magazines, *Asian Comics* brims with facts, fascinating anecdotes, and interview quotes from many pioneering masters, as well as younger artists. *Drawing and Painting Anime and Manga Faces*
