SYLVIA AVERY

Become Younger Cambridge University Press
 In *Reconsidering the Emergence of the Gay Novel in English and German*, James P. Wilper examines a key moment in the development of the modern gay novel by analyzing four novels by German, British, and American writers. Wilper studies how the texts are influenced by and respond and react to four schools of thought regarding male homosexuality in the late nineteenth and early twentieth centuries. The first is legal codes criminalizing sex acts between men and the religious doctrine that informs them. The second is the ancient Greek erotic philosophy, in which a revival of interest took place in the late nineteenth century. The third is sexual science (or "sexology"), which offered various medical and psychological explanations for same-sex desire and was employed variously to defend, as well as to attempt to cure, this "perversion." And fourth, in the wake of the scandal caused by his trials and conviction for "gross indecency," Oscar Wilde became associated with a homosexual stereotype based on

"unmanly" behavior. Wilper analyzes the four novels—Thomas Mann's *Death in Venice*, E. M. Forster's *Maurice*, Edward Prime-Stevenson's *Imre: A Memorandum*, and John Henry Mackay's *The Hustler*—in relation to these schools of thought, and focuses on the exchange and cross-cultural influence between linguistic and cultural contexts on the subject of love and desire between men.

Goethe's Faust and the Divan of Ḥāfīz neobooks

To meet and adapt to the current and future trends and issues in technology and society, the science committee of The German Academic Society for Production Engineering (WGP) continues to define future topics for production technology. These themes represent not only the key focus for the scientific work of the WGP, but also the central themes of the first annual conference in June 2011, whose paper is publically available in this volume. Such themes, including electric mobility, medical technology, lightweight construction, and resource efficiency, as well as mass production ability have all been identified as future, large-scale, and long-term drivers of change. Future trends influence changes sustainably and fundamentally; they permeate society, technology, economics, and value systems and have an effect in virtually all areas of life. The WGP has, as part of its research,

established for itself the goal of not only observing these emerging changes, but also of supervising and influencing their development in order to ensure steady progress, secure sustainability, and shape the future.

Kant and the Problem of Metaphysics Cambridge University Press

Nietzsche's infamous work *THUS SPAKE ZARATHUSTRA* is filled with a strange sense of religiosity that runs counter to the philosopher's usual anti-religion stance. Carl Jung interpreted *ZARATHUSTRA* as a clear demonstration of his theory of the unconscious at work. His lively seminar on the subject has been an important source for specialists in depth psychology. This is a new abridged paperback edition of Jung's two-volume original.

An Answer from the Silence Good Press

This volume of essays takes as its point of departure Martin Buber's principle of dialogue, which he applied as a comprehensive hermeneutic method for the study of various cultural phenomena. The volume critically evaluates the methodological purchase to be gained by the introduction of Buber's conception of dialogue in political theory, psychology and psychiatry, and religious studies.

Natural Images in Economic Thought Vandenhoeck & Ruprecht DigiCat Publishing presents to you this special edition of "An Introduction to the Philosophy of Law" by Roscoe Pound. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Die Soldaten Eine Komodie DigiCat

The study aims to analyse the impact of Luther's theology on his thoughts about music. It limits itself to an analysis of the topic by focusing on the three most important statements of Luther about music in his unfinished treatise *De Musica* [On Music]. The first statement is that music is "a gift of God and not of man" [Dei donum hominum est], second, music "creates joyful soul" [facit letos animos], and third, music "drives away the devil" [fugat diabolum]. The relation between these three statements to each other and to Luther's theology in general can be understood in connection with his personal experiences and commitments to music, which were undergirded by his theology. Luther, as a man of medieval times, took for granted the existence of the devil, and many of his writings contained frequent references to the personal attacks of the devil, where it influenced his thoughts about music.

Geodynamics BRILL

This 1994 book was the first collection devoted to impact of natural sciences on content and form of economics in history.

Main Currents in Nineteenth Century Literature - 6. Young Germany Springer Science & Business Media

Georg Brandes, a Danish critic, and scholar, in the book "Main Currents in Nineteenth-Century Literature - 6. Young Germany" discusses German history. In this volume, he reflects on some of the German works of literature in line with the existing climate of opinion. A book to foster deeper knowledge about the history of Germany and her culture.

Constructional Morphology and Evolution Walter de Gruyter GmbH & Co KG

The broad spectrum of topics covered in the nine symposia and four open-paper sessions of the Third International Wildlife Disease Conference comprise a remarkable collection of ideas

and current research information on diseases of wildlife. The term "wildlife" is broad in itself and is interpreted by the Conference sponsor, The Wildlife Disease Association, to mean all free-living vertebrate and invertebrate members of the animal kingdom. The Conference's invitational symposia brought to Munich an array of wildlife specialists from around the world who addressed major problems affecting the understanding and control of diseases of wildlife. The open paper sessions attracted many well-known scientists with detailed data from their specialized studies. Over 100 participants were present to hear 84 scientific papers. The Wildlife Disease Association and the Conference editors, through their publisher, are pleased to offer this compilation of presentations as a Conference Proceedings. This volume will be an important data source for the study of diseases of wildlife by students, specialists, and general biologists everywhere. WDA President W. G. Winkler expresses the Association's gratitude to the Conference Chairman, Prof. Dr. H.

Strategies of Humor in Post-Unification German Literature, Film, and Other Media VAK Verlag

Modern molecular technology in the so-called life sciences (biology as well as medicine) allows today to approach and manipulate living beings in ways and to an extent which not too long ago seemed Utopian. The empirical progress promises further and even more radical developments in the future, and it is at least often claimed that this kind of research will have tremendous effects on and for all of humanity, for example in the areas of food production, transplantation medicine (including stem cell research and xenotransplantation), (therapeutic) genetic manipulation and (cell-line) cloning (of cell lines or tissues), and of biodiversity conservation-strategies. At least in Western, industrialized countries the development of modern sciences led to a steady increase of human health, well-being and quality of life. However, with the move to make the human body itself an object of scientific research interests, the respective scientific descriptions resulted in changes in the image that human beings have of themselves. Scientific progress has led to a startling loss of traditional human self-understanding. This development is in contrast to an understanding according to which the question what it means to be "human" is treated in the realm of philosophy. And indeed, a closer look reveals that - without denying the value of scientific progress - science cannot replace the philosophical approach to anthropological questions. *Claimed Among the Stars: A Sci Fi Romance Charity Anthology* Cambridge University Press

The fourteen chapters in this anthology feature original analyses of contemporary German-language literary texts, films, political cartoons, cabaret, and other types of performance. The artworks display a wide spectrum of humor modes, such as irony, satire, the grotesque, Jewish humor, and slapstick, as responses to unification with the accompanying euphoria, but also alienation and dislocation. Kerstin Hensel's *Lärchenau*, Christoph Hein's *Landnahme*, and vignette collections by Jakob Hein (*Antrag auf ständige Ausreise und andere Mythen der DDR*) and Wladimir Kaminer (*Es gab keinen Sex im Sozialismus*) are interpreted as examples of the grotesque. The popular films *Lola rennt*, *Sonnenallee*, *Herr Lehmann*, *NVA*, *Alles auf Zucker!*, and *Mein Führer—Die wirklich wahrste Wahrheit über Adolf Hitler* are reexamined through the lens of traditional and more recent humor or comic book theories. The contributors focus on how each artwork enriches four prominent postwall German cultural

trends: post-unification identity reconstruction, Vergangenheitsbewältigung (including Hitler humor), New German Popular Literature (Christian Kracht's ironic subtexts), and immigrant perspectives (a "third voice" in the East-West binary reflected here pointedly in Eulenspiegel cartoons). To date, no other scholarly work provides as comprehensive an overview of the diverse strategies of humor used in the past two decades in German-speaking countries.

Wildlife Diseases Lion Children's

The Munich/Germany born artist Claudia Chaseling (maiden name: Pötzsch) studied at the Art Academies in Munich and Vienna as well as at the University of Arts in Berlin, where she graduated in 2000 in Prof. Marwan's master class. In 2003 she graduated as Master of Visual Arts at the School of Arts of the Australian National University in Canberra, made possible by a scholarship of DAAD. There she is earning a doctorate since 2013.

Dialogue as a Trans-disciplinary Concept Springer Science & Business Media

The present volume owes its origin to a Colloquium on "Alchemy and Chemistry in the Sixteenth and Seventeenth Centuries", held at the Warburg Institute on 26th and 27th July 1989. The Colloquium focused on a number of selected themes during a closely defined chronological interval: on the relation of alchemy and chemistry to medicine, philosophy, religion, and to the corpuscular philosophy, in the sixteenth and seventeenth centuries. The relations between Medicina and alchemy in the Lullian treatises were examined in the opening paper by Michela Pereira, based on researches on unpublished manuscript sources in the period between the 14th and 17th centuries. It is several decades since the researches of R.F. Multhaus gave a prominent role to Johannes de Rupescissa in linking medicine and alchemy through the concept of a quinta essentia. Michela Pereira explores the significance of the Lullian tradition in this development and draws attention to the fact that the early Paracelsians had themselves recognized a family resemblance between the works of Paracelsus and Roger Bacon's scientia experimentalis and, indeed, a continuity with the Lullian tradition.

Freud's Library Springer Science & Business Media

Alles, was Sie über Anti-Aging wissen sollten Wir werden zwar immer älter, doch bleiben wir nicht automatisch auch länger gesund, fit und leistungsfähig. Das stellt uns vor die Herausforderung, rechtzeitig die Weichen so zu stellen, dass wir möglichst lange auch in hohem Alter gesund bleiben. Das dazu erforderliche Wissen liefert Ihnen dieses Handbuch. Was genau passiert in unserem Körper beim Alterungsprozess und mit welchen Maßnahmen können wir dem Altern entgegenwirken, Alterskrankheiten verhindern und möglichst lange fit und gesund bleiben? - Das Buch beleuchtet sämtliche Facetten des hochaktuellen Themas. Die Autoren haben mit der Auswertung von mehr als 5000 wissenschaftlichen Studien Pionierarbeit geleistet. Das Ergebnis: ein für jeden interessantes, einzigartiges interdisziplinäres Handbuch über den neuesten Stand der Alternforschung - mit umfassenden konkreten Empfehlungen. Wir erfahren, was wir selbst tun können, und wie wir uns aus diesem reichhaltigen Informationsfundus unser individuell maßgeschneidertes Anti-Aging-Programm zusammenstellen können. Leicht verständlich wird erklärt, was jeder für sich selbst tun kann: - welche Nahrungsmittel am besten für körperliche und geistige Gesundheit sorgen; - welche Vitamine, Antioxidantien, Aminosäuren und Hormone die "Altersuhr" verlangsamen; - wie wir Lernfähigkeit, Gedächtnis und Konzentration verbessern; - was das Risiko von Herz-Kreislauf-Krankheiten und Krebs reduziert; - wie der Nachtschlaf sowie die Leistungsfähigkeit am Tag zu optimieren sind; - wie Fettzunahme und ungünstige

Figurveränderungen im Altersverlauf verhindert werden können; - was die schädlichen Folgen von Rauchen, Alkohol oder Süßigkeiten verringert; - was Depressionen vermeiden hilft; - wie Sport und Bewegung optimal einzusetzen sind. Diesem bereits in der Erstausgabe mit dem "Health Media Award" ausgezeichneten Buch gelingt es hervorragend, die wissenschaftlichen Erkenntnisse anschaulich und unterhaltsam zu vermitteln. Ein unentbehrliches Handbuch für jeden ab 35 - und profundes Grundwissen für Ärzte, Heilpraktiker und Gesundheitsberater.

"Neider Überall Zwingen Uns Zu Gerechter Verteidigung"

Walter de Gruyter GmbH & Co KG

Constructional morphology explains features of organisms from a constructional and functional point of view. By means of physical analysis it explains the operational aspects of organic structures - how they can perform the activities organisms are expected to fulfil in order to survive in their environment. Constructional morphology also explains options and constraints during the evolution determined by internal constructional needs, ontogenetic demands, inherited organizational preconditions and environmental clues.

I Spy Bible Swiss List

Dr. Walker lays out his program on how to become younger which he partly defines as having all or most of the attributes of youth, health, energy, vitality and perpetual laughter on the lips and in the eyes. The key to accessing both more energy and more vitality lies in changing our eating, drinking, and living habits. Dr. Walker encourages people to develop a very definite philosophy he calls Right Thinking, which is maintaining a positive outlook and positive thoughts about themselves and others. Together with the other principles outlined in his program, he offers readers knowledge that gives them the courage to make the changes necessary. Readers are given a brief yet concise introduction to different parts of our anatomy and how these systems work for and against us, depending upon the food we consume. Dr. Walker recommends changing old eating habits to include natural, nourishing foods. The use of juicing, fasting, and eating natural, organic foods in their unprocessed forms, including mostly raw fruits and vegetables, play an important role in maintaining good health. Through his personal observations, experience, and knowledge, Dr. Walker provides the information needed to stay younger.

Reconsidering the Emergence of the Gay Novel in English and German Springer Science & Business Media

First published in 1989. As a young man growing up near Basel, Jung was fascinated and disturbed by tales of Nietzsche's brilliance, eccentricity, and eventual decline into permanent psychosis. These volumes, the transcript of a previously unpublished private seminar, reveal the fruits of his initial curiosity: Nietzsche's works, which he read as a student at the University of Basel, had moved him profoundly and had a life-long

influence on his thought. During the sessions the mature Jung spoke informally to members of his inner circle about a thinker whose works had not only overwhelmed him with the depth of their understanding of human nature but also provided the philosophical sources of many of his own psychological and metapsychological ideas. Above all, he demonstrated how the remarkable book *Thus Spake Zarathustra* illustrates both Nietzsche's genius and his neurotic and prepsychotic tendencies. Since there was at that time no thought of the seminar notes being published, Jung felt free to joke, to lash out at people and events that irritated or angered him, and to comment unreservedly on political, economic, and other public concerns of the time. This seminar and others, including the one recorded in *Dream Analysis*, were given in English in Zurich during the 1920s and 1930s.
