In this "biography of a single day," the burning of the White House by the British during the War of 1812 is told from the viewpoint of the people who were there, including First Lady Dolley Madison, a British officer, and a nine-year-old slave. Jane Sutcliffe draws upon first-person accounts to recreate a compelling chronology of the events of August 24, 1814.

It is estimated that only a small fraction, less than 1 per cent, of ancient literature has survived to the present day. The role of Christian authorities in the active suppression and destruction of books in Late Antiquity has received surprisingly little sustained consideration by academics. In an approach that presents evidence for the role played by Christian institutions, writers and saints, this book analyses a broad range of literary and legal sources, some of which have hitherto been little studied. Paying special attention to the problem of which genres and book types were likely to be targeted, the author argues that in addition to heretical, magical, astrological and anti-Christian books, other less obviously subversive categories of literature were also vulnerable to destruction, censorship or suppression through prohibition of the copying of manuscripts. These include texts from materialistic philosophical traditions, texts which were to become the basis for modern philosophy and science. This book examines how Christian authorities, theologians and ideologues suppressed ancient texts and associated ideas at a time of fundamental transformation in the late classical world.

Challenging assumptions about the separation of high politics and everyday life, Belinda Davis uncovers the important influence of the broad civilian populace--particularly poorer women--on German domestic and even military policy during World War I. As Britain's wartime blockade of goods to Central Europe increasingly squeezed the German food supply, public protests led by "women of little means" broke out in the streets of Berlin and other German cities. These "street

scenes" riveted public attention and drew urban populations together across class lines to make formidable, apparently unified demands on the German state. Imperial authorities responded in unprecedented fashion in the interests of beleaguered consumers, interceding actively in food distribution and production. But officials' actions were far more effective in legitimating popular demands than in defending the state's right to rule. In the end, says Davis, this dynamic fundamentally reformulated relations between state and society and contributed to the state's downfall in 1918. Shedding new light on the Wilhelmine government, German subjects' role as political actors, and the influence of the war on the home front on the Weimar state and society, *Home Fires Burning* helps rewrite the political history of World War I Germany.

A compelling dual-narrated tale from Jennifer Latham that questions how far we've come with race relations. Some bodies won't stay buried. Some stories need to be told. When seventeen-year-old Rowan Chase finds a skeleton on her family's property, she has no idea that investigating the brutal century-old murder will lead to a summer of painful discoveries about the present and the past. Nearly one hundred years earlier, a misguided violent encounter propels seventeen-year-old Will Tillman into a racial firestorm. In a country rife with violence against blacks and a hometown segregated by Jim Crow, Will must make hard choices on a painful journey towards self discovery and face his inner demons in order to do what's right the night Tulsa burns. Through intricately interwoven alternating perspectives, Jennifer Latham's lightning-paced page-turner brings the Tulsa race riot of 1921 to blazing life and raises important questions about the complex state of US race relations--both yesterday and today.

The now-classic, utterly unique voice of Ann Beattie is so dry it throws off sparks, her eye endowed with the emotional equivalent of X-ray vision. Her characters are young men and women discovering what it means to be a grown-up in a country that promised them they'd stay young forever. And here, in shapely, penetrating stories, Beattie confirms why she is one of the most widely imitated -- yet surely inimitable -- literary stylists of her generation. In *The Burning House*, Beattie's characters go from dealing drugs to taking care of a bereaved friend. They watch their marriages fail not with a bang but with a wisecrack. And afterward, they may find themselves trading confidences with their spouses' new lovers. *The Burning House* proves that Beattie has no peer when it comes to revealing the hidden shapes of our relationships, or the depths of tenderness, grief, and anger that lie beneath the surfaces of our daily lives.

A New York Times Notable Book! A New York Times Book Review Editors' Choice The story of how Newt Gingrich and his allies tainted American politics, launching an enduring era of brutal partisan warfare When Donald Trump was elected president in 2016, President Obama observed that Trump "is not an outlier; he is a culmination, a logical conclusion of the rhetoric and tactics of the Republican Party." In *Burning Down the House*, historian Julian Zelizer pinpoints the moment when

our country was set on a path toward an era of bitterly partisan and ruthless politics, an era that was ignited by Newt Gingrich and his allies. In 1989, Gingrich brought down Democratic Speaker of the House Jim Wright and catapulted himself into the national spotlight. Perhaps more than any other politician, Gingrich introduced the rhetoric and tactics that have shaped Congress and the Republican Party for the last three decades. Elected to Congress in 1978, Gingrich quickly became one of the most powerful figures in America not through innovative ideas or charisma, but through a calculated campaign of attacks against political opponents, casting himself as a savior in a fight of good versus evil. Taking office in the post-Watergate era, he weaponized the good government reforms newly introduced to fight corruption, wielding the rules in ways that shocked the legislators who had created them. His crusade against Democrats culminated in the plot to destroy the political career of Speaker Wright. While some of Gingrich's fellow Republicans were disturbed by the viciousness of his attacks, party leaders enjoyed his successes so much that they did little collectively to stand in his way. Democrats, for their part, were alarmed, but did not want to sink to his level and took no effective actions to stop him. It didn't seem to matter that Gingrich's moral conservatism was hypocritical or that his methods were brazen, his accusations of corruption permanently tarnished his opponents. This brand of warfare worked, not as a strategy for governance but as a path to power, and what Gingrich planted, his fellow Republicans reaped. He led them to their first majority in Congress in decades, and his legacy extends far beyond his tenure in office. From the Contract with America to the rise of the Tea Party and the Trump presidential campaign, his fingerprints can be seen throughout some of the most divisive episodes in contemporary American politics. *Burning Down the House* presents the alarming narrative of how Gingrich and his allies created a new normal in Washington.

Even if we don't believe that Jesus was the son of God, we tend to think he was a great moral teacher. But was he? And how closely do idealised values such as our love of the family, helping the needy, and the importance of kindness, match Jesus's original tenets? Julian Baggini challenges our assumptions about Christian values - and about Jesus - by focusing on Jesus's teachings in the Gospels, stripping away the religious elements such as the accounts of miracles or the resurrection of Christ. Reading closely this new 'godless' Gospel, included as an appendix, Baggini asks how we should understand Jesus's attitude to the renunciation of the self, to politics, or to sexuality, as expressed in Jesus's often elusive words. An atheist from a Catholic background, Baggini introduces us to a more radical Jesus than popular culture depicts. And as he journeys deeper into Jesus's worldview, and grapples with Jesus's sometimes contradictory messages, against his scepticism he finds that Jesus's words amount to a purposeful and powerful philosophy, which has much to teach us today.

A startling and gripping reexamination of the Jim Crow era, as seen through the eyes of some of the most important American writers "Walker has opened up a fresh way of thinking about the intellectual history of the South during the civil-rights movement."—Robert Greene, *The Nation* In this dramatic reexamination of the Jim Crow South, Anders Walker demonstrates that racial segregation fostered not simply terror and violence, but also diversity, one of our most celebrated ideals. He investigates how prominent intellectuals like Robert Penn Warren, James Baldwin, Eudora Welty, Ralph Ellison, Flannery O'Connor, and Zora Neale Hurston found pluralism in Jim Crow, a legal system that created two worlds, each with its own institutions, traditions, even cultures. The intellectuals discussed in this book all agreed that black culture was resilient, creative, and profound, brutally honest in its assessment of American history. By contrast, James Baldwin likened white culture to a "burning house," a frightening place that endorsed racism and violence to maintain dominance. Why should black Americans exchange their experience for that? Southern whites, meanwhile, saw themselves preserving a rich cultural landscape against the onslaught of mass culture and federal power, a project carried to the highest levels of American law by Supreme Court justice and Virginia native Lewis F. Powell, Jr. Anders Walker shows how a generation of scholars and judges has misinterpreted Powell's definition of diversity in the landmark case *Regents v. Bakke*, forgetting its Southern origins and weakening it in the process. By resituating the decision in the context of Southern intellectual history, Walker places diversity on a new footing, independent of affirmative action but also free from the constraints currently placed on it by the Supreme Court. With great clarity and insight, he offers a new lens through which to understand the history of civil rights in the United States.

When teenagers scuffle during a basketball game, they are typically benched. But when Will got into it on the court, he and his rival were sprayed in the face at close range by a chemical similar to Mace, denied a shower for twenty-four hours, and then locked in solitary confinement for a month. One in three American children will be arrested by the time they are twenty-three, and many will spend time locked inside horrific detention centers that defy everything we know about how to rehabilitate young offenders. In a clear-eyed indictment of the juvenile justice system run amok, award-winning journalist Nell Bernstein shows that there is no right way to lock up a child. The very act of isolation denies delinquent children the thing that is most essential to their growth and rehabilitation: positive relationships with caring adults. Bernstein introduces us to youth across the nation who have suffered violence and psychological torture at the hands of the state. She presents these youths all as fully realized people, not victims. As they describe in their own voices their fight to maintain their humanity and protect their individuality in environments that would deny both, these young people offer a hopeful alternative to the doomed effort to reform a system that should only be dismantled. *Burning Down the House* is a clarion call to shut down our nation's brutal and counterproductive juvenile prisons and bring our children home.
