The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color.

This Handbook provides a state-of-the-art survey of research in business history. Business historians study the historical evolution of business systems, entrepreneurs and firms, as well as their interaction with their political, economic, and social environment. They address issues of central concern to researchers in management studies and business administration, as well as economics, sociology and political science, and to historians. They employ a range of qualitative and quantitative methodologies, but all share a belief in the importance of understanding change over time. The Oxford Handbook of Business History has brought together leading scholars to provide a comprehensive, critical, and interdisciplinary examination of business history, organized into four parts: Approaches and Debates; Forms of Business Organization; Functions of Enterprise; and Enterprise and Society. The Handbook shows that business history is a wide-ranging and dynamic area of study, generating compelling empirical data, which has sometimes confirmed and sometimes contested widely-held views in management and the social sciences. The Oxford Handbook of Business History is a key reference work for scholars and advanced students of Business History, and a fascinating resource for social scientists in general.

In *The World's Newest Profession* Christopher McKenna offers a history of management consulting in the twentieth century. Although management consulting may not yet be a recognized profession, the leading consulting firms have been advising and reshaping the largest organizations in the world since the 1920s. This groundbreaking study details how the elite consulting firms, including McKinsey & Company and Booz Allen & Hamilton, expanded after US regulatory changes during the 1930s, how they changed giant corporations, nonprofits, and the state during the 1950s, and why consultants became so influential in the global economy after 1960. As they grew in number, consultants would introduce organizations to 'corporate culture' and 'decentralization' but they faced vilification for their role in the Enron crisis and for legitimating corporate blunders. Through detailed case studies based on unprecedented access to internal files and personal interviews, *The World's Newest Profession* explores how management consultants came to be so influential within our culture and explains exactly what consultants really do in the global economy.

"Unravel[s] the national psyche that brought our politics to this moment." — Evan Osnos, *The New Yorker* A landmark book, from "one of the world's

most prominent psychiatrists" (*The Atlantic*): Allen Frances analyzes the nation, viewing the rise of Donald J. Trump as darkly symptomatic of a deeper societal distress that must be understood if we are to move forward. Equally challenging and profound, *Twilight of American Sanity* "joins a small shelf of essential titles—Arlie Hochschild's *Strangers in Their Own Land* is another—that help explain why and how the Trump presidency happened" (*Kirkus*). It is comforting to see President Donald Trump as a crazy man, a one-off, an exception—not a reflection on us or our democracy. But in ways I never anticipated, his rise was absolutely predictable and a mirror on our soul. . . . What does it say about us, that we elected someone so manifestly unfit and unprepared to determine mankind's future? Trump is a symptom of a world in distress, not its sole cause. Blaming him for all our troubles misses the deeper, underlying societal sickness that made possible his unlikely ascent. Calling Trump crazy allows us to avoid confronting the craziness in our society—if we want to get sane, we must first gain insight about ourselves. Simply put: Trump isn't crazy, but our society is. —from *TWILIGHT OF AMERICAN SANITY* More than three years in the making: the world's leading expert on psychiatric diagnosis, past leader of the American Psychiatric Association's DSM ("the bible of psychology"), and author of the influential international bestseller on the medicalization of ordinary life, *Saving Normal*, draws upon his vast experience to deliver a powerful critique of modern American society's collective slide away from sanity and offers an urgently needed prescription for reclaiming our bearings. Widely cited in recent months as the man who quite literally wrote the diagnostic criteria for narcissism, Allen Frances, M.D., has been at the center of the debate surrounding President Trump's mental state—quoted in Evan Osnos's May 2017 *New Yorker* article ("How Trump Could Get Fired") and publishing a much-shared opinion letter in the *New York Times* ("An Eminent Psychiatrist Demurs on Trump's Mental State"). Frances argues that Trump is "bad, not mad"—and that the real question to wrestle with is how we as a country could have chosen him as our leader. *Twilight of American Sanity* is an essential work for understanding our national crisis.
