Algarve is
your ticket to
the trip of a
lifetime. Make
the most of
your trip to
this sunny
coast with DK

Eyewitness
Top 10.
Planning is a
breeze with
our simple
lists of ten,
covering the
very best that
the Algarve
has to offer
and ensuring
that you don't
miss a thing.
Best of all, the
pocket-
friendly
format is light
and easily
portable; the
perfect
companion
while out and
about. Inside
DK Eyewitness
Top 10
Algarve you
will find: - Six
easy-to-follow
itineraries,

perfect for a day trip, a weekend, or a week. - Detailed Top 10 lists of the Algarve's must-sees , including comprehensive descriptions of the Faro , Tavira , Silves , Monchique , Loulé , Lagos , Parque Natural da Ria Formosa , Sagres , Albufeira and Portimão - The Algarve's most interesting areas, with the best places for sightseeing, food and drink, and shopping. - Streetsmart advice : for

getting ready, getting around, and staying safe. - Themed lists, including the best museums, beaches, golf courses, wineries and much more. - A laminated pull-out map of the Algarve, plus four full-color area maps. Looking for more on Portugal's culture, history and attractions? Try our DK Eyewitness Portugal . About DK Eyewitness: At DK Eyewitness, we believe in the power of

discovery. We make it easy for you to explore your dream destinations. DK Eyewitness travel guides have been helping travellers to make the most of their breaks since 1993. Filled with expert advice, striking photography and detailed illustrations, our highly visual DK Eyewitness guides will get you closer to your next adventure. We publish guides to more than 200 destinations,

from pocket-sized city guides to comprehensive country guides. Named Top Guidebook Series at the 2020 Wanderlust Reader Travel Awards, we know that wherever you go next, your DK Eyewitness travel guides are the perfect companion. *Zeitschrift für praktische geologie* Geological Society of London The Low Countries are famous for their radically changing

landscape over the last 1,000 years. Like the landscape, the linguistic situation has also undergone major changes. In Holland, an early form of Frisian was spoken until, very roughly, 1100, and in parts of North Holland it disappeared even later. The hunt for traces of Frisian or Ingvaemonic in the dialects of the western Low Countries has been going on for around 150 years, but a

synthesis of the available evidence has never appeared. The main aim of this book is to fill that gap. It follows the lead of many recent studies on the nature and effects of language contact situations in the past. The topic is approached from two different angles: Dutch dialectology, in all its geographic and diachronic variation, and comparative Germanic linguistics. In the end, the minute details

and the bigger picture merge into one possible account of the early and high medieval processes that determined the make-up of western Dutch.

Amsterdam : Theatrum Orbis Terrarum

From the sophisticated capital of Torshavn to the uninhabited isle of Gasholmur, the Faroe Islands offer natural splendour in abundance. Go hiking on Nolsoy for stupendous views of the fjords, brave the wind at the southernmost tip of Suouroy or wander through hamlets of turf-roofed cottages

encircled by layer-cake mountains. Whether you explore this North Atlantic archipelago by ferry, road or helicopter, you'll find it the perfect place to check out the latest Nordic design or party through the night at a summer music festival.

Bibliographic Guide to Maps and Atlases John Benjamins Publishing Company

This volume provides the first comprehensive account of the geology of

Sumatra since the masterly synthesis of van Bemmelen (1949). Following the establishment of the Geological Survey of Indonesia, after WW II, the whole island has been mapped geologically at the reconnaissance level, with the collaboration of the geological surveys of the United States and the United Kingdom. The mapping programme, completed in the mid-1990s, together with supplementary data obtained by academic institutions and petroleum and mineral exploration companies, has resulted in a vast increase in geological information, which is summarized in this volume. The synthesis of structural controls on sedimentation and magmatism during the tectonic evolution of Sumatra since the late Palaeozoic has provided a background for the formation of economic deposits of metallic minerals, coal, oil and gas. The volume provides a sound basis for future geological research and for the exploration of the energy and mineral resources of the island.

Becoming Arab explores

how a long history of inter-Asian interaction fared in the face of nineteenth-century racial categorisation and control. *A Catalogue of Maps of Hispanic America* Brookside Publishing Includes the Proceedings of the Royal geographical society, formerly pub. separately.

Becoming Arab

Cambridge University Press
Petermann's Maps focuses on the maps published in

the famous German journal Petermanns Geographische Mitteilungen. This journal, which still exists today, greatly influenced the development of scientific geography and cartography in Germany in the nineteenth century. Numerous articles have been published by recognized experts in this field, along with a multitude of illustrations, showing maps, prints

and photographs. The journal developed into an important publication, setting the standard in the history of the great expeditions and discoveries, and European colonial matters. Petermann's Maps contains a bibliography of over 3400 maps, the complete series of maps published in Petermanns Geographische Mitteilungen between the year of its foundation, 1855, to the

end of the Second World War. Besides the bibliography 160 of the most attractive geographical and thematic coloured maps are included in Petermann's Maps. These maps can also be viewed on the CD-ROM accompanying the book. An extensive introduction precedes the cartobibliography proper, placing Petermann's *Geographische Mitteilungen* in its historical context. The introduction describes the

history of geography from the eighteenth century onwards, outlining the development of the study of cartography in Germany. The major role the founder of the journal, Augustus Petermann (1822-1878), and the publishing house Justus Perthes in Gotha played in these developments is discussed at length. **Catalogue of the Printed Maps, Plans, and Charts** BRILL
