Ethics of Writing Createspace Independent Publishing Platform First published in 1991. It was the lyric poetry of Petrarch that popularized the sonnet in European literature, that set the standard for love poetry for centuries to follow. Compared to the large volume of prose, poetry and notes in Latin, the corpus of Petrarch's Italian writings is small: the 366 poems that make up the Canzoniere, the 2000 or so verses of the Trionfi, and an undetermined number of poems, drafts and fragments that comprise what we call the Rime disperse. This collection includes indexes of first lines in both Italian and English.

Emanuele Palmieri's work opts, unlike the alluding of authors who cultivate the literary genre of "self-help", to direct his proposal to a scientific basis that desictions holistic, and sometimes gnostic, visions of the so-called New Age or alternative philosophy.

Emanuele Palmieri does not seek to offer more than he proposes in this book, nor magic recipes for happiness as well as an easy path to individual success and wealth. Instead, it deals with drawing patterns of behavior and levels of sociability based on three defined levels: Time, Space and Entropy Professor Fabio Salas Zuniga

Alfred de Musset (1810-1857) was a French dramatist and poet, regarded as one of the first Romantic writers. He was also a prolific novelist of the romantic period and wrote some of the most memorable literary masterpieces of all times. Much influenced by Shakespeare and Schiller, Alfred de Musset wrote the first modern dramas in the French language. His early poems and plays were much appreciated in the French society earning him the reputation of being a dandy. In 1845 he was named a Chevalier of the Legion of Honor. Musset was elected to the French Academy in 1852. Nowadays Musset's popularity is second only to Racine and Moliere. "My glass is not big, but I drink out of my own glass," he once stated self-consciously. Musset had a profound grasp of the psychology of love and his portraits of women were multidimensional.

In this groundbreaking work, Carlo Sini, one of Italy's leading contemporary philosophers, brings American pragmatism to the Milan school of phenomenology. Appearing in English for the first time, this book explores the constitutive role of alphabetic writing in the emergence of dominant forms of knowledge in the Western world (philosophy, mathematics, science, and historiography).

Taking stock of the contingent nature of what are held as logical truths, he offers an ethical framework for considering different ways of thinking about writing, focusing on possibilities involving "practice" as a basis for a renewal of theoretical philosophy. Such a framework, Sini argues, opens the door for more productive and ethical communication with non-Western cultures, and indeed for a reconsideration of forms of knowledge beyond mere writing.
