Synopsis coming soon.....

*Windows to Our Children*

Indiana University Press

Fairytales have amused  
and delighted generations  
of both children and  
adults. They possess the  
unique quality of bringing

together the human and  
otherworldly, creating a  
special kind of magic. In  
this major work by the  
distinguished Swiss  
folklorist Max Lüthi, the  
traditional fairytale is  
examined from two points  
of view, that of aesthetics  
and that of anthropology.  
According to the author,  
fairytales have been told  
time and again because  
they provide pleasure.  
Therefore, an aesthetics

of the fairytale must be  
concerned with why these  
stories are still a source of  
pleasure. Lüthi shows that  
fairytales are more than  
just pleasing form; they  
present a particularly way  
of looking at the world  
and at human existence.  
Thus, they must be  
evaluated in terms of  
what they say about man  
and the human condition.  
-- From publisher's  
description.

*The Fairytale as Art Form  
and Portrait of Man*

Sidgwick & Jackson

This updated edition of the Handbook of Autism explores and expands on the practical and jargon free information of the best-selling first edition. The authors dispel many of the myths surrounding this puzzling and complex disorder. They provide practical information that makes sense, covering both medical and educational issues.

Revised research and new case-studies, including follow-ups to the case-

studies featured in the first edition reflect the developments made over the last eight years both in the understanding and management of autism. A list of contacts and services at the back of the book underlines its practical approach.

*Everything Has a Shadow,  
Except Ants* Arcade

Publishing

The children's encounter with shadows is told in this book. Documents the experience and emotions of children at the Diana and Gulliver preschools as they explore this

immaterial companion of our everyday lives.

*Erziehung und Unterricht*

Elliot describes how his neighbor Stella taught him about cooking, nutrition, and foods, and shares recipes for potatoes, dairy products, eggs, bread, vegetables, main dishes, desserts, and other dishes.

*Die Neue Bücherei*

Oxygen-deprived for two hours at birth, Christopher Nolan lived to write, at age twenty-one, the autobiography of his childhood, told as the story of Joseph Meehan.

He wrote the book, using a "unicorn stick" attached to his head, letter by painful letter. The result is astonishingly lyrical, filled with powerful description, touching moments of triumph and humiliation, and, above all, disarming wit. It is, in the words of London's Daily Express, "a book of sheer wonder". German books in print When originally published, this book filled a void in child therapy literature. Counselors and therapists, in schools, mental health centers and private practice,

embraced this book. It is the largest selling book on the subject in the world. This brand-new 2nd edition includes over 300 pages of methods, materials, and techniques for working with children and adolescents. Also included are session transcripts, case examples and discussions. This edition includes a new introduction by Oaklander's long-time professional colleague and friend Christiane Elsbree and concludes with an in-depth interview

with Oaklander by Elsbree.
