Written in a practical style, this book uses the Linux shell in many chapters, demonstrating the execution of commands and their output. With liberal use of screenshots and plenty of code samples accompanied by careful explanation, it will make the task of installing and configuring Koha easy and straightforward. All chapters are written in a way that makes them applicable to various Linux distributions. This book is aimed at Linux system administrators who need to install and maintain Koha. If you are a system administrator who wants to set up an open source integrated library system, then this book is for you. It will also be useful for system administrators who require help with specific aspects of implementing Koha.

Pre NEET Obstetrics and Gynaecology Wolters kluwer india Pvt Ltd

Bioremediation and Sustainability is an up-to-date and comprehensive treatment of research and applications for some of the most important low-cost, "green," emerging technologies in chemical and environmental engineering. Sustainable development requires the development and promotion of environmental management and a constant search for green technologies to treat a wide range of aquatic and terrestrial habitats contaminated by increasing anthropogenic activities with the main sources of contaminants being the chemical industries. Bioremediation is a technique that uses living organisms in order to degrade or transform contaminants into their less toxic forms. It is based on the existence of microorganisms with the capacity to attack the compounds on the enzymatic level. Bioremediation is an increasingly popular low-cost alternative to conventional methods for treating wastes and contaminated media with the possibility to degrade these contaminants using natural microbial activity mediated by different consortia of microbes. Over the last few years, the scientific literature has revealed the progressive emergence of various bioremediation techniques. Bioremediation and Sustainability presents an up-to-date and comprehensive collection of chapters prepared in bioremediation technology research and applications. The strategies covered in this volume can be applied in situ or ex situ, depending on the site in which they will be applied. In situ is the treatment done in the site of the contamination, and ex situ involves the removal of soil or water to subsequent treatment. There is a wide variety of techniques that have been developed in the past and are covered in this volume, such as natural attenuation, bioaugmentation, biostimulation, biosorption, composting, phytoremediation, rhizoremediation, and bioleaching.

Anatomy: Thorax & Upper Limb, (Vol. 2) Springer

Effectively master the most important principles and facts in pathology with this easy-to-use new edition of Robbins and Cotran Review of Pathology. More than 1,100 questions—reviewed and updated to reflect the new content in the parent text—reinforce the fundamentals of gross and microscopic pathology as well as the latest findings in molecular biology and genetics. This review book of multiple choice questions and answers, companion to Robbins and Cotran Pathologic Basis of Disease 9th Edition and Robbins Basic Pathology, 9th Edition, is the ideal study tool for coursework, self-assessment, and examinations, including the USMLE Step 1 examination in pathology. Develop a thorough, clinically relevant understanding of pathology through clinical vignette-style questions emphasizing problem solving over rote memorization. Single-best-answer and extended-matching formats reflect levels of difficulty that prepare you for examinations. Efficiently review a wide spectrum of topics with page references and a parallel organization to both Robbins and Cotran Pathologic Basis of Disease and Robbins Basic Pathology, making additional information easy to locate. Reinforce your understanding of key content with answers and detailed explanations for every question at the end of each chapter. Enhance your understanding of pathophysiology and integrate pathology with other medical disciplines by examining correlative

laboratory, radiologic, and physical diagnostic data. Visualize key pathologic concepts and conditions and test your diagnostic skills with over 1,100 full-color images. Features new questions that reflect today's hot topics in pathology, keeping you up to date. Includes many new illustrations to enhance visual guidance. Uses a new chapter arrangement to conform to the new Table of Contents in Robbins and Cotran Pathologic Basis of Disease, 8th Edition, for easier cross referencing.

Physics Galaxy 2020-21 Elsevier Health Sciences

An unprecedented and intimate behind-the-scenes look at London designer fashion over the last fifteen years, edited by Tania Fares and Sarah Mower and profiling 50 leading London fashion designers, from Paul Smith and Stella McCartney to Erdem and Simone Rocha. London has long been a fashion-world capital, and the past fifteen years have been an especially fertile period in its centuries-long history of setting trends. This stunning book is an all-access pass into the world of designer fashion - an exclusive behind-the-scenes studio tour that calls in on fifty of the city's leading design talents - London-based global superstars - all of whom open up about their practice and philosophy, and share a wealth of images from their private collections.

Previous Years Papers (Solved) have been provided in the book. Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates.

Anatomy Head, Neck & Brain, (Vol. 1) Scientific Publishers

This volume provides practical solutions and introduces recent theoretical developments in risk management, pricing of credit derivatives, quantification of volatility and copula modeling. This third edition is devoted to modern risk analysis based on quantitative methods and textual analytics to meet the current challenges in banking and finance. It includes 14 new contributions and presents a comprehensive, state-of-the-art treatment of cutting-edge methods and topics, such as collateralized debt obligations, the high-frequency analysis of market liquidity, and realized volatility. The book is divided into three parts: Part 1 revisits important market risk issues, while Part 2 introduces novel concepts in credit risk and its management along with updated quantitative methods. The third part discusses the dynamics of risk management and includes risk analysis of energy markets and for cryptocurrencies. Digital assets, such as blockchain-based currencies, have become popular but are theoretically challenging when based on conventional methods. Among others, it introduces a modern text-mining method called dynamic topic modeling in detail and applies it to the message board of Bitcoins. The unique synthesis of theory and practice supported by computational tools is reflected not only in the selection of topics, but also in the fine balance of scientific contributions on practical implementation and theoretical concepts. This link between

theory and practice offers theoreticians insights into considerations of applicability and, vice versa, provides practitioners convenient access to new techniques in quantitative finance. Hence the book will appeal both to researchers, including master and PhD students, and practitioners, such as financial engineers. The results presented in the book are fully reproducible and all quantlets needed for calculations are provided on an accompanying website. The Quantlet platform quantlet.de, quantlet.com, quantlet.org is an integrated QuantNet environment consisting of different types of statistics-related documents and program codes. Its goal is to promote reproducibility and offer a platform for sharing validated knowledge native to the social web. QuantNet and the corresponding Data-Driven Documents-based visualization allows readers to reproduce the tables, pictures and calculations inside this Springer book.

Bioremediation and Sustainability CBS Publishers & Distributors Private Limited

The present book is specially published for the aspirants of 'Sainik School Entrance Exam for admission to Class VI'. Based on the Latest Pattern of Exam, the book also comprises Previous Year Solved Papers for aspirants to be familiar with the current exam pattern and the type of questions asked with their answers. Detailed Explanatory Answers have also been provided for Selected Questions for Better Understanding of readers. The book contains adequate Study and Practice Material with numerous Multiple Choice Question-Answers on all the relevant subjects, important from the point of view of the exam. All the practice questions in the book have been modelled on previous exam-questions and solved by respective subject-experts with due diligence. The book is highly recommended for the aspirants to Sharpen their Problem Solving Skills with thorough practice of actual exam-style questions among numerous practice questions provided in the book, and prepare themselves to face the exam with Confidence, Successfully. While the specialised study and practice material of this book Paves the Way for your Success, your own diligent study and practice with it will ensure you a seat in the Sainik School.

Aiims Essence 2019-2018 (vol. 1 Part & Ramesh Publishing House

The ultimate aim of any teaching system is to produce the best scholars & the best professionals in the today's scenario with futuristic approach so that when given a chance they must be able to exhibit their past knowledge. To verify or quantify this knowledge the student/scholar has to undergo certain exam. Nowadays the best exams are supposed to be those having Multiple Choice Questions i.e. MCQ's as integral part because of two important reasons, First easy to conduct & uniform evaluation for all students, that is no bias, Second MCQ's checks memory/recall memory/reasoning & ability to be precise in terms of reading /understanding and speed with ability to record answers with accuracy too. The book on this subject "Exam Success Review ANATOMY MCQ's-Volume-3, Abdomen & Lowerlimb for Medical Students - MBBS 1st Prof & PG Entrance" will be helpful as a companion for fast revision during examination and will help them certainly to secure full marks in the Multiple Choice Questions in examination. I must let you know that MCQ's make about 20% to 40% of total marks in the 1st prof. MBBS exam and anybody who knows the concepts and art to answer the MCQ's is going to be winner not only at MBBS level but also at various Postgraduate entrance Examinations at national & state level to get the PG Course of their choices.

Data Intelligence and Cognitive Informatics G.K Publications Pvt.Limited

Over the last decade, Indian banks in general and the government-owned public sector ones in particular have gradually got themselves into a big mess. Their bad loans, or loans which haven't been repaid for ninety days or more, crossed Rs 10 lakh crore as of 31 March 2018. To put it in perspective, this figure is approximately seven times the value of farm loan waivers given by all state governments in India put together. And this became the bad money of the Indian financial system. Why were the corporates unable to return these loans? Was it because they had no intention of doing so? Who were the biggest defaulters of them all? Are Vijay Mallya and Nirav Modi just the tip of the iceberg? How much money has the government spent trying to rescue these banks? How are the private sector banks gradually taking over Indian banking? Is your money in public sector banks safe? How are you paying for this in different ways? And what are the solutions to deal with this? In *Bad Money*, Vivek Kaul answers these and many more questions, peeling layer after layer of the NPA (non-performing assets) problem. He goes back to the history of Indian banking, providing a long, deep and hard look at the overall Indian economy. The result is a gripping financial thriller that is a must for understanding a crisis that threatens our banking system and economy.
