Avec ce nouveau roman, Marie-Bernadette Dupuy, avec la capacité d'évocation qu'on lui connaît, nous plonge dans un monde regorgeant de parfums, d'images et de bruits qui restent gravés dans l'imaginaire du lecteur. Son récit, qui rappelle à notre mémoire une époque depuis longtemps révolue, se laisse lire comme les gabares qui glissent calmement sur le fleuve tout au long de la vie de son héros. Un délice pour les sens.

A stunning new companion series to 2001 A SPACE ODYSSEY from the world's most important SF writer and his acknowledged heir 1885, the North West Frontier. Rudyard Kipling is witness to a bizarre encounter between the British army and what appears to be an impossibly advanced piece of Russian technology. And then to a terrifying intervention by a helicopter from 2037. Before the full impact of this extraordinary event has even begun to sink in, Kipling, his friends and the helicopter crew stumble across Alexander the Great's army. Mankind's time odyssey has begun. It is a journey that will see Alexander avoid his premature death and carve out an Empire that expands from Carthage to China, beating the time-slipped army of Ghenghis Khan in a battle outside the ruins of Babylon in the process. And it will present mankind with two devastating truths. Aliens are amongst us and have been manipulating our past and our future. And that future extends only as far as 2037, for that is the date Earth will be destroyed. This is SF that spans countless centuries and carries cutting edge ideas on time travel and alien intervention. It shows two of the genre's masters at their groundbreaking best.

Anyone who has read J.D. Salinger's New Yorker stories, particularly A Perfect Day for Bananafish, Uncle Wiggily in Connecticut, The Laughing Man, and For Esme--With Love and Squalor, will not be surprised by the fact that his first novel is full of children. The hero-narrator of THE CATCHER IN THE RYE is an ancient child of sixteen, a native New Yorker named Holden Caulfield. Through circumstances that tend to preclude adult, secondhand description, he leaves his prep school in Pennsylvania and goes underground in New York City for three days. The boy himself is at once too simple and too complex for us to make any final comment about him or his story. Perhaps the safest thing we can say about Holden is that he was born in the world not just strongly attracted to beauty but, almost, hopelessly impaled on it. There are many voices in this novel: children's voices, adult voices, underground voices--but Holden's voice is the most eloquent of all. Transcending his own vernacular, yet remaining marvelously faithful to it, he issues a perfectly articulated cry of mixed pain and pleasure. However, like most lovers and clowns and poets of the higher orders, he keeps most of the pain to, and for, himself. The pleasure he gives away, or sets aside, with all his heart. It is there for the reader who can handle it to keep.

'My most anticipated book of the year' - Peter F. Hamilton, Britain's no.1 science fiction writer Children of Ruin follows Adrian Tchaikovsky's extraordinary Children of Time, winner of the Arthur C. Clarke award. It is set in the same universe, with new characters and a thrilling narrative. It has been waiting through the ages. Now it's time . . . Thousands of years ago, Earth's terraforming program took to the stars. On the world they called Nod, scientists discovered alien life - but it was their mission to overwrite it with the memory of Earth. Then humanity's great empire fell, and the program's decisions were lost to time. Aeons later, humanity and its new spider allies detected fragmentary radio signals between the stars. They dispatched an exploration vessel, hoping to find cousins from old Earth. But those ancient terraformers woke something on Nod better left undisturbed. And it's been waiting for them. 'Books like this are why we read science fiction' - Ian McDonald, author of the Luna series All underpinned by great ideas. And it is crisply modern - but with the sensibility of classic science fiction' Stephen Baxter, author of the Long Earth series (with Terry Pratchett)

The Gate of Days Quirk Books

Greg Bear's Nebula Award-winning novel, Darwin's Radio, painted a chilling portrait of humankind on the threshold of a radical leap in evolution—one that would alter our species forever. Now Bear continues his provocative tale of the human race confronted by an uncertain future, where "survival of the fittest" takes on astonishing and controversial new dimensions. Eleven years have passed since SHEVA, an ancient retrovirus, was discovered in human DNA—a retrovirus that caused mutations in the human genome and heralded the arrival of a new wave of genetically enhanced humans. Now these changed children have reached adolescence . . . and face a world that is outraged about their very existence. For these special youths, possessed of remarkable, advanced traits that mark a major turning point in human development, are also ticking time bombs harboring hosts of viruses that could exterminate the "old" human race. Fear and hatred of the virus children have made them a persecuted underclass, quarantined by the government in special "schools," targeted by federally sanctioned bounty hunters, and demonized by hysterical segments of the population. But pockets of resistance have sprung up among those opposed to treating the children like dangerous diseases—and who fear the worst if the government's draconian measures are

carried to their extreme. Scientists Kaye Lang and Mitch Rafelson are part of this small but determined minority. Once at the forefront of the discovery and study of the SHEVA outbreak, they now live as virtual exiles in the Virginia suburbs with their daughter, Stella—a bright, inquisitive virus child who is quickly maturing, straining to break free of the protective world her parents have built around her, and eager to seek out others of her kind. But for all their precautions, Kaye, Mitch, and Stella have not slipped below the government's radar. The agencies fanatically devoted to segregating and controlling the new-breed children monitor their every move—watching and waiting for the opportunity to strike the next blow in their escalating war to preserve “humankind” at any cost.

Ami, Child of the Stars Scholastic Inc.

Winner of the 2014 Prix du Style "Masterful . . . An eloquent addition to a violent episode in the history of science in the twentieth century." —*Nature* In 1934, the highly respected head of the Soviet Union's meteorology department, Alexei Feodosievich Wangerheim, was suddenly arrested without cause and sentenced to a gulag. Less than a year after being hailed by Stalin as a national hero, he ended up with thousands of other "political prisoners" in a camp on Solovetsky Island, under vast northern skies and surrounded by water that was, for more than six months of the year, a sheet of motionless ice. He was violently executed in 1937—a fact kept from his family for nearly twenty years. Olivier Rolin masterfully weaves together Alexei's story and his eventual fate, drawing on an archive of letters and delicate drawings of the natural world that Wangerheim sent to his family from prison. Tragically, Wangerheim never stopped believing in the Revolution, maintaining that he'd been incarcerated by accident, that any day Stalin would find out and free him. His stubbornness suffuses the narrative with tension, and offers insight as to how he survived an impossible situation for so long. Stalin's Meteorologist is a fascinating work that casts light on the devastating consequences of politically inspired paranoia and the mindlessness and trauma of totalitarianism—relevant revelations for our time.
