Creating Canada's Peacekeeping Past illuminates how Canada's participation in the United Nations' peacekeeping efforts from 1956 to 1997 was used as a symbol of national identity - in Quebec and the rest of the country. Delving into four decades' worth of documentaries, newspaper coverage, textbooks, political rhetoric, and more, Colin McCullough outlines continuity and change in the production and reception of messages about peacekeeping. Engaging in debates about Canada's international standing, as well as its broader national character, this book is welcome addition to the history of Canada's changing national identity.

Advances In The History Of Mathematics Education Routledge

In recent years interest in the thought of Kierkegaard has grown dramatically, and with it the body of secondary literature has expanded so quickly that it has become impossible for even the most conscientious scholar to keep pace. The problem of the explosion of secondary literature is made more acute by the fact that much of what is written about Kierkegaard appears in languages that most Kierkegaard scholars do not know. Kierkegaard has become a global phenomenon, and new research traditions have emerged in different languages, countries and regions. The present volume is dedicated to trying to help to resolve these two problems in Kierkegaard studies. Its purpose is, first, to provide book reviews of some of the leading monographic studies in the Kierkegaard secondary literature so as to assist the community of scholars to become familiar with the works that they have not read for themselves. The aim is thus to offer students and scholars of Kierkegaard a comprehensive survey of works that have played a more or less significant role in the research. Second, the present volume also tries to make accessible many works in the Kierkegaard secondary literature that are written in different languages and thus to give a glimpse into various and lesser-known research traditions. The six tomes of the present volume present reviews of works written in Catalan, Chinese, Czech, Danish, Dutch, English, Finnish, French, Galician, German, Greek, Hebrew, Hungarian, Italian, Japanese, Norwegian, Polish, Portuguese, Romanian, Russian, Slovak, Spanish, and Swedish.

Masato Kamioda, jeune dévot aspirant à devenir prêtre, se trouve être le seul étudiant masculin accepté au sein de l'académie pour filles "Sainte Sophia". Dans un établissement destiné aux filles, il va devoir composer avec un environnement dont il ignore tout et combattre des pulsions dont il ne connaissait rien. Saura-t-il résister à la tentation ? Lui faudra-t-il choisir entre sa foi et l'amour charnel ? Va-t-il réussir à ne pas se faire expulser ?

Preparation of Teachers of the Social Studies for the Secondary Schools

This book is a collection of scholarly studies in the history of mathematics education, very abbreviated versions of which were presented at the ICMI Congress in 2021. The book discusses issues in education in Brazil and Belgium, in Poland and Spain, in Russia and the United States. Probably the main factor that unifies the chapters of the book is their attention to key moments in the formation of the field of mathematics education. Topics discussed in the book include the formation and development of mathematics education for women; the role of the research mathematician in the formation of standards for writing textbooks; the formation of curricula and the most active figures in this formation during the New Math period; the formation of certain distinctive features of curricula in Poland; the formation of the views of David Eugene Smith and the influence of European mathematics education on him; the formation of the American mathematics community; and the creation of such forms of student assessment as entrance exams to higher educational institutions. The book is of interest not only to historians of mathematics education, but also to wide segments of specialists in other areas of mathematics education.
