*Dictionnaire universel des contemporains* Yale University Press  
 While earlier studies have focused predominantly on artist François Boucher's artistic style and identity, this book presents the first full-length interdisciplinary study of Boucher's prolific collection of around 13,500 objects including paintings, sculpture, prints, drawings, porcelain, shells, minerals, and other imported curios. It discusses the types of objects he collected, the networks through which he acquired them, and their spectacular display in his custom-designed studio at the Louvre, where he lived and worked for nearly two decades. This book explores the role his collection played in the development of his art, his studio, his friendships, and the burgeoning market for luxury goods in mid-eighteenth-century France. In doing so,

it sheds new light on the relationship between Boucher's artistic and collecting practices, which attracted both praise and criticism from period observers. The book will appeal to scholars working in art history, museum studies, and French history.

*Dictionnaire universel des contemporains, contenant toutes les personnes notables de la France et des pays étrangers ...* Metropolitan Museum of Art

The tumultuous years of the French Revolution left France's prestigious decorative arts industries poised on the brink of ruin. It was not until after the fall of the monarchy and the ascendancy of the Consulat and Empire under Napoleon that they began to recover so that by the middle of the nineteenth century they stood at the pinnacle of their achievement. This book is the first in depth study of the renowned porcelain works at Sèvres during its virtual rebirth under the 47 year direction of the scientist, teacher, and administrator Alexandre Brongniart. Some 110 working

drawings from the Sèvres Archive are reproduced here for the first time in color. They celebrate the high skill of the artists whose work often documented contemporary events in France. There are table services in the 'Egyptian' and 'Etruscan' taste as well as individual pieces that recall Napoleonic military campaigns. There are also exquisite Neoclassical decorations using motifs such as birds, butterflies, and insects that reflect the century's early fascination with the natural sciences. The repertoire of nineteenth century eclecticism is evident in the output of Sèvres from the revival of Gothic and renaissance motifs to the outburst of naturalism. Eleven essays by leading authorities assess this dynamic period.

One of the most imaginative and fascinating artists of eighteenth-century France, Edme Bouchardon (1698-1762) was instrumental in the transition from Rococo to Neoclassicism and in the artistic rediscovery of classical antiquity. Much celebrated in his time, Bouchardon created some of the most iconic images of the age of Louis XV. His oeuvre demonstrates a remarkable variety of themes (from copies after the antique to subjects of history and mythology, portraiture, anatomical studies, ornament, fountains and tombs), media (drawings, sculptures, medals, prints), and techniques (chalk, plaster, wax, terracotta, marble, bronze). With five essays by experts on Bouchardon's sculpture and graphic arts, more than 140 catalogue entries, and a detailed chronology, this book aims to

demonstrate the originality of Bouchardon's art within the cultural and social context of the period, while suggesting the subtle relationship between, as well as the relative autonomy of, the artist's two careers as a sculptor and a draftsman. This lavishly illustrated publication represents an unprecedented and thorough survey on this major and unique artist from the Age of Enlightenment, offering in-depth scholarship based on unpublished material.

The French Revolution had a marked impact on the ways in which citizens saw the newly liberated spaces in which they now lived. Painting, gardening, cinematic displays of landscape, travel guides, public festivals, and tales of space flight and devilabduction each shaped citizens' understanding of space. Through an exploration of landscape painting over some 40 years, Steven Adams examines the work of artists, critics and contemporary observers who have largely escaped art historical attention to show the importance of landscape as a means of crystallising national identity in a period of unprecedented political and social change.

Characters in some languages, particularly Hebrew and Arabic, may not display properly due to device limitations. Transliterations of terms appear before the representations in foreign characters. This is an

encyclopedic dictionary of close to 400 important philosophical, literary, and political terms and concepts that defy easy—or any—translation from one language and culture to another. Drawn from more than a dozen languages, terms such as Dasein (German), pravda (Russian), saudade (Portuguese), and stato (Italian) are thoroughly examined in all their cross-linguistic and cross-cultural complexities. Spanning the classical, medieval, early modern, modern, and contemporary periods, these are terms that influence thinking across the humanities. The entries, written by more than 150 distinguished scholars, describe the origins and meanings of each term, the history and context of its usage, its translations into other languages, and its use in notable texts. The dictionary also includes essays on the special characteristics of particular languages—English, French, German, Greek, Italian, Portuguese, Russian, and Spanish. Originally published in French, this one-of-a-kind reference work is now available in English for the first time, with new contributions from Judith Butler, Daniel Heller-Roazen, Ben Kafka, Kevin McLaughlin, Kenneth Reinhard, Stella Sandford, Gayatri Chakravorty Spivak, Jane Tylus, Anthony Vidler, Susan Wolfson, Robert J. C. Young, and many more. The result is an invaluable reference for students, scholars, and general readers interested in the multilingual lives of some of our most influential words and ideas. This book provides a new way of thinking about eighteenth-century French art and visual culture by prioritizing production over reception. Abandoning the ideologically driven discourse that distinguished fine from decorative art between the 1690s and 1770s, *The Mobile Image* reveals how the two have been inextricably bound from the earliest stages of artistic instruction through the daily life of painters' workshops. In this study, author David Pullins defines artisanal and artistic means of learning, seeing, and making through a system of "mobile images": motifs that were effectively engineered for mobility and designed never to be definitive, always awaiting replication and circulation. He examines the careers of Antoine Watteau, Jean-Baptiste Oudry, and François Boucher, situating them against a much broader cast of actors—such as printmakers, publishers, anonymous studio assistants, and architects, among others—to place eighteenth-century painting within a wider context of media and making.

Over the past years, studies have begun not only to identify the factors that impeded the full participation of women artists in French cultural life, such as women's limited access to professional art education, but also to bring to light the considerable artistic accomplishments of women occluded by historians for over a century. A similar effort at historical revision has been under way for French women writers. Works of fiction that enjoyed many editions in the nineteenth-century receded from our field of vision for almost a century before being rediscovered and reissued during the last decades of the twentieth century. Such efforts have resulted in scholarship that has helped revise the history of both artistic and literary expression in nineteenth-century France. Similarly, many women in nineteenth-century France had their art criticism published both in journal reviews and in book form, often for decades, in a number of the most influential venues of their day. However, it is perplexing that they remain almost totally invisible in histories of French culture. *Women Art Critics in Nineteenth-Century France: Vanishing Acts* is the first sustained effort to bring these prolific and influential critics out from the shadows. Although each of the chapters in this volume results from an interdisciplinary approach, the fact that they are written by scholars in art history and in literature means that there will be inevitable differences in approach and methodology. Thus, we study the women's reception of specific artworks and aesthetic movements, discuss intersections of aesthetics and politics in their essays and the literary styles and rhetorical strategies of individual critics, explore the social conditions that

allowed or impeded their successes, and suggest reasons for their all but disappearance in the twentieth century. In bringing to light for twenty-first-century readers the "vanished" writings of heretofore unrecognized or underrecognized women art critics, the authors hope to contribute to the ongoing revision of women's role in cultural history. The multifaceted approaches to word/image studies modeled in this book, and the many avenues for further research it identifies, will inspire scholars in a number of disciplines to continue the work of reinscribing women in the history of cultural life.

Communicating art and cultural heritage has become a crucial and challenging task, since these sectors, together with tourism heritage, represent a key economic resource worldwide. In order to activate this economic and social potential, art and cultural heritage need to be disseminated through effective communicative strategies. Adopting a wide variety of digital humanities approaches and a plurilingual perspective, the essays gathered in this book provide an extensive and up-to-date overview of digital linguistic resources and research methods that will contribute to the design and implementation of such strategies. Cultural and artistic content curators, specialised translators in the fields of art, architecture, tourism and web documentaries, researchers in art history and tourism communication, and cultural heritage management professionals, among others, will find this book extremely useful due to its provision of some concrete applications of innovative methods and tools for the study and dissemination of art and heritage knowledge.

Women Artists in Interwar France: Framing Femininities illuminates the importance of the Soci? des Femmes Artistes Modernes, more commonly known as FAM, and returns this group to its proper place in the history of modern art. In particular, this volume explores how FAM and its most famous members? Suzanne Valadon, Marie

Laurencin, and Tamara de Lempicka? brought a new approach to the most prominent themes of female embodiment: the self-portrait, motherhood, and the female nude. These women reimagined art's conventions and changed the direction of both art history and the politics of their contemporary art world. FAM has been excluded from histories of modern art despite its prominence during the interwar years. Paula Birnbaum's study redresses this omission, contextualizing the group's legacy in light of the conservative politics of 1930s France. The group's artistic response to the reactionary views and images of women at the time is shown to be a key element in the narrative of modernist formalism. Although many FAM works are missing? one reason for the lack of attention paid to their efforts? Birnbaum's extensive research, through archives, press clippings, and first-hand interviews with artists' families, reclaims FAM as an important chapter in the history of art from the interwar years.
