Social Work Career Development Hanley & Belfus

It is a troubling time to be a therapist. Despite decades of powerful evidence that psychotherapy works, and tremendous advances in both policy and technology making therapy available to more of those who need it, the number of people actually going to therapy is flat or even declining. While training to be a therapist continues to get more expensive, therapists' salaries aren't even keeping up with inflation. Saving Psychotherapy addresses some of the troubling realities behind these truths. There is strong data to suggest:- The field avoids claiming meaningful values, leaving clients uncertain about the kind of guidance and support - if any - they will receive- The modern training process for therapists rewards wealth much more than merit- Many therapists express an open hostility to science and knowledge, even when it supports our work- There is little accountability for therapists to ever prove that they know what they're doing- Therapists are generally uninvolved in public debate, freely giving up their roles as society's experts on mental health and positive changePsychotherapy deserves a brighter future than the one we're on track for. And the first step toward getting that brighter future is for individual therapists at all career levels to take personal responsibility for it. In this data-driven, unflinching, and relentlessly optimistic look at the state of psychotherapy today, you will learn simple steps any therapist can take to make your practice more reputable and successful -- while improving the health and reputation of the entire field.

It shows in countless practical ways how knowledge of each of these is most useful in your recovery and everyday life.

DBT? Skills Training Manual, Second Edition Jayne Blanchard Supervision is currently a "hot topic" in social work. The editors of this volume, both social work educators and researchers, believe that good supervision is fundamental to the development and maintenance of effective practice in social work. Supervision is seen as a key vehicle for continuing development of professional skills, the safeguarding of competent and ethical practice and oversight of the wellbeing of the practitioner. As a consequence the demand for trained and competent supervisors has increased and a perceived gap in availability can create a call for innovation and development in supervision. This book offers a collection of chapters which contribute new insights to the field. Authors from Australia and New Zealand, where supervision inquiry is strong, offer research-informed ideas and critical commentary with a dual focus on supervision of practitioners and students. Topics include external and interprofessional supervision, retention of practitioners, practitioner resilience and innovation in student supervision. This book will be of interest to supervisors of both practitioners and students and highly relevant to social work academics. This book was originally published as a special issue of *Australian Social Work*.

The Beginning Counselor's Survival Guide Volcano Press

"In this timely update of the seminal classic, author and activist Jodee Blanco reveals how she simply set out to share her story--and ended up igniting a grassroots movement in the nation's schools. The first survivor of school bullying to look back on those experiences as an adult, Jodee brings you up to speed on her life and work since the book's initial release with a new chapter, all-new Letter to My Readers, and Reader's Guide. She also offers the latest information on digital and cyberbullying, the Adult Survivor of Peer Abuse, her in-school antibullying program, INJJA (It's NOT Just Joking Around!), and provides discussion questions for schools. While other children were daydreaming about dances, first kisses, and college, Jodee Blanco was trying to figure out how to go from homeroom to study hall without being taunted or spit upon as she walked through the halls. This powerful, unforgettable memoir chronicles how one child was shunned and even physically abused-by her classmates from elementary school through high school. It is an unflinching look at what it means to be the outcast, how even the most loving parents can get it all wrong, why schools are often unable to prevent disaster, and how bullying has been misunderstood and mishandled by the mental health community"--
