A Time Best YA Book of All

“searing work of historical  
fiction” (Booklist), Coretta  
Scott King Award-winning  
author Sharon M. Draper  
tells the epic story of a  
young girl torn from her  
African village, sold into  
slavery, and stripped of  
everything she has ever  
known—except hope.  
Amari's life was once  
perfect. Engaged to the  
handsomest man in her  
tribe, adored by her  
family, and fortunate

enough to live in a beautiful village, it never occurred to her that it could all be taken away in an instant. But that was what happened when her village was invaded by slave traders. Her family was brutally murdered as she was dragged away to a slave ship and sent to be sold in the Carolinas. There she was bought by a plantation owner and given to his son as a "birthday present". Now, survival is all Amari can dream about. As she struggles to hold on to her memories, she also

begins to learn English and make friends with a white indentured servant named Molly. When an opportunity to escape presents itself, Amari and Molly seize it, fleeing South to the Spanish colony in Florida at Fort Mose. Along the way, their strength is tested like never before as they struggle against hunger, cold, wild animals, hurricanes, and people eager to turn them in for reward money. The hope of a new life is all that keeps them going, but Florida feels so far away

and sometimes Amari wonders how far hopes and dreams can really take her.

This monograph, published to accompany Housley s solo exhibition of paintings at the Reg Vardy Gallery, 2005, is the result of a year-long residency at Durham Cathedral. Painting, for Housley, is a "dumb muse": a medium which, whilst only able to offer still, silent and hand-made single images, is also able to offer the most complex, nuanced and double-edged forms of visual experience. Working on an intimate scale, Housley's images elicit an unlikely poignancy and

tenderness from subject matter that might initially seem to offer slight returns.

The New Yorker's  
legendary Paris  
correspondent explores  
life and love in the Jazz  
Age in this novel inspired  
by her days in Greenwich

the 1970s, Janet Flanner  
kept Americans abreast of  
the goings-on in Paris with

with expectations,

 It's a sad fact: hip-hop album liners have always been reduced to a list of producer and sample credits, a publicity photo or two, and some hastily composed shout-outs. That's a damn shame, because few outside the game know about the true creative forces behind influential masterpieces like PE's It Takes a Nation of Millions. . . , De La's 3 Feet High and Rising, and Wu-Tang's Enter the Wu-Tang (36 Chambers). A longtime scribe for the hip-hop nation, Brian

Coleman fills this void, and delivers a thrilling, knockout oral history of the albums that define this dynamic and iconoclastic art form. The format: One chapter, one artist, one album, blow-by-blow and track-by-track, delivered straight from the original sources. Performers, producers, DJs, and b-boys—including Big Daddy Kane, Muggs and B-Real, Biz Markie, RZA, Ice-T, and Wyclef—step to the mic to talk about the influences, environment, equipment, samples, beats, beefs,

and surprises that went into making each classic record. Studio craft and street smarts, sonic inspiration and skate ramps, triumph, tragedy, and take-out food—all played their part in creating these essential albums of the hip-hop canon. Insightful, raucous, and addictive, *Check the Technique* transports you back to hip-hop's golden age with the greatest artists of the '80s and '90s. This is the book that belongs on the stacks next to your wax. "Brian Coleman's writing is a lot

like the albums he covers: direct, uproarious, and more than six-fifths genius." –Jeff Chang, author of *Can't Stop Won't Stop* "All producers and hip-hop fans must read this book. Concerns over the potential ecological effects of fishing have increased with the expansion of fisheries throughout the marine waters of the United States. Effects of Trawling and Dredging on Seafloor Habitat describes how assessment of fishing impacts depends on gear type, number and location of bottom tows, and the

physical and biological characteristics of seafloor habitats. Many experimental studies have documented acute, gear-specific effects of trawling and dredging on various types of habitat. These studies indicate that low mobility, long-lived species are more vulnerable to towed fishing gear than short-lived species in areas where the seabed is often disturbed by natural phenomena. Trawling and dredging may also change the composition and productivity of fish

communities dependent on seafloor habitats for food and refuge. The scale of these impacts depends on the level of fishing effort. This volume presents color maps of fishing effort for all regions with significant bottom trawl or dredge fisheries-the first time that such data has been assembled and analyzed for the entire nation.
